9 = Pacific

STATE AND REGION

NOTE: The following variable, STATE, is created at the sampling stage and analysts are advised to use this variable in State-level analyses. The levels of STATE represent the Federal Information Processing Standards (FIPS) State codes for the 50 States and the District of Columbia. The State FIPS codes are numeric values that range from 1 to 56 with 5 values (3, 7, 14, 43, and 52) not assigned to any State. Therefore, the levels of STATE are not consecutive. STATE does not contain any system missing values. To use this variable in software which may require a consecutive value variable, this variable should be recoded so that the 51 levels have consecutive values. An alternative (if allowed by the software) would be use STATE as defined with 56 levels, allow the software to generate missing data for the 5 unassigned values, and then delete the missing data from the analysis.

COUNTY

COUNTY

NOTE: The Rural-Urban Continuum Codes, also known as Beale Codes, are classifications for all U.S. counties created by the U.S. Department of Agriculture (USDA). Rural-Urban Continuum Codes form a classification scheme that distinguishes metro counties by the population size of their metro area, and nonmetro counties by degree of urbanization and adjacency to a metro area or areas. The metro and nonmetro categories have been subdivided into three metro and six nonmetro groupings, resulting in a nine-part county codification. All U.S. counties and county equivalents are grouped according to their official metro-nonmetro status based on the June 2003 statistical area definitions provided by OMB. Metro counties are distinguished by population size of the metro area of which they are part. Nonmetro counties are classified according to the aggregate size of their urban population. Nonmetro areas include counties in micropolitan statistical areas as well as counties outside of both metropolitan and micropolitan statistical areas. All population counts are from the 2000 Census representing the resident population. Within the three urban size categories, nonmetro counties are further identified by whether or not they have some functional adjacency to a metro area or areas. A nonmetro county is defined as adjacent if it physically adjoins one or more metro areas, and has at least 2 percent of its employed labor force commuting to central metro counties. Nonmetro counties that do not meet these criteria are classed as nonadjacent. Note: the USDA combined nonmetro independent cities in Virginia with their counties of origin when computing the Rural-Urban Continuum Codes. However, independent cities in Virginia that have a population of 100,000 or more were treated as county equivalents.

RUCC03

- Len : 1 RURAL/URBAN CONTINUUM CODE (2003)
- 1 = Counties in metro areas, pop>=1 million
- 2 = Counties in metro areas, pop 250,000-1,000,000
- 3 = Counties in metro areas, pop<250,000
- 4 = Urban pop>=20,000, adjacent to metro area
- 5 = Urban pop>=20,000, not adjacent to metro area
- 6 = Urban pop 2,500-19,999, adjacent to metro area
- 7 = Urban pop 2,500-19,999, not adjacent to metro
- 8 = Rural or < 2,500 urban pop, adj to metro
- 9 = Rural or < 2,500 urban pop, not adj to metro

NOTE: COUTYP1 and COUTYP2 are recodes based on the 2003 Rural/Urban Continuum Codes (RUCC03).

*(RUCC03)*

COUTYP1

- Len : 1 COUNTY METRO/NONMETRO STATUS (6-LEVEL)
- 1 = Large Metro (RUCC03=1)
- 2 = Small Metro, pop 250K-1,000,000 (RUCC03=2)
- 3 = Small Metro, <250K population (RUCC03=3)
- 4 = Nonmetro, 20K or more urban pop (RUCC03=4,5)
- 5 = Nonmetro, 2,500-19,999 urban pop (RUCC03=6,7)
- 6 = Nonmetro, <2,500 urban pop (RUCC03=8,9)

DEMOGRAPHICS

DEMOGRAPHICS

DEMOGRAPHICS

NOTE: After a respondent has entered his/her birthdate in the first part of the questionnaire, he/she has multiple opportunities to change his/her age in response to consistency checks throughout the questionnaire. It is therefore possible for the age recorded by the respondent at the beginning of the questionnaire (CALCAGE) to be different than the age at the end of the questionnaire (NEWAGE). The final age variable, AGE, is determined using these two variables, in addition to the age calculated from the raw birthdate (AGE1) and the final edited interview date (INTDATE), the age entered in the questionnaire roster (if it exists), and the pre-interview screener age. Priority is given to CALCAGE, NEWAGE, and the age calculated from AGE1 and INTDATE. In the labels for the levels of the variable E1AGE, if an age is listed as being consistent with the screener age, and the roster age exists, then it is also consistent with the roster age. If the final age (AGE) does not agree with the originally entered birthdate (AGE1), then the birthdate must also be edited. Note that the edits of AGE and BRTHDATE implemented since 2000 are more thorough than those used in 1999.

AGE Len : 2 FINAL EDITED AGE  
RANGE = 12 - 98

Are you now married, widowed, divorced or separated, or have you never married?

(QD07)  
MARITAL Len : 2 CURRENT MARITAL STATUS  
1 = Married  
2 = Widowed  
3 = Divorced or Separated  
4 = Never Married  
94 = DON'T KNOW  
97 = REFUSED  
98 = BLANK (NO ANSWER)  
99 = LEGITIMATE SKIP

How many times have you been married?

(QD08)  
NOMARR Len : 2 NUMBER OF TIMES MARRIED  
RANGE = 1 - 9  
94 = DON'T KNOW  
97 = REFUSED  
98 = BLANK (NO ANSWER)  
99 = LEGITIMATE SKIP

Have you ever been in the United States Armed Forces?

(QD09)  
SERVICE Len : 2 EVER BEEN IN THE US ARMED FORCES  
1 = Yes  
2 = No  
94 = DON'T KNOW

Do you have difficulty with self-care, such as washing all over or dressing?

(CARE)

LVLDFCARE

Len : 2 LEVEL OF DIFFICULTY WITH SELF-CARE

- 1 = No Difficulty
- 2 = Some difficulty
- 3 = A lot of difficulty
- 4 = Cannot do at all
- 85 = BAD DATA Logically assigned
- 94 = DON'T KNOW
- 97 = REFUSED
- 98 = BLANK (NO ANSWER)

DEMOGRAPHICS

Using your usual language, do you have difficulty communicating, for example understanding or being understood?

*(COMM)*

LVLDFCOMM

Len : 2 LEVEL OF DIFFICULTY COMMUNICATING USING YOUR USUAL LANGUAGE

- 1 = No Difficulty
- 2 = Some difficulty
- 3 = A lot of difficulty
- 4 = Cannot do at all
- 85 = BAD DATA Logically assigned
- 94 = DON'T KNOW
- 97 = REFUSED
- 98 = BLANK (NO ANSWER)

IMPUTED DEMOGRAPHICS

**IMPUTED DEMOGRAPHICS**

Beginning with the 2002 survey, missing values for the gender question (QD01) were no longer permitted. Thus, no imputation was required. This variable has the prefix 'IR', which stands for 'Imputation Revised', only for the sake of consistency with data sets from earlier surveys.

(QD01)

IRSEX Len : 1 GENDER - IMPUTATION REVISED  
1 = Male  
2 = Female

(ASIAHISP, ASIARACE, PIHISP, PIRACE, QD03, QD04HISP, QD05HISP, QD05RACE)

IRHOIND Len : 1 HISPANIC ORIGIN - IMPUTATION REVISED  
1 = Hispanic  
2 = Non-Hispanic

(ASIAHISP, ASIARACE, PIHISP, PIRACE, QD03, QD04HISP, QD05HISP, QD05RACE)

IIRHOIND Len : 1 HISPANIC ORIGIN INDICATOR - IMPUTATION REVISED  
1 = Hispanicity from questionnaire (agrees w/specifies)  
2 = Logically assigned data  
3 = Hispanicity statistically imputed

IRRACEWH, IRRACEBK, IRRACENA, IRRACENH, IRRACEGC, IRRACESM, IRRACPI2, IRRACPIANY and IRRACEAS indicate whether each level of QD05 or QD05PI was mentioned by the respondent. These could have either been directly selected in QD05, QD05PI or QD05ASIA, or mentioned in an other-specify response to QD05, QD05PI, QD05ASIA, and/or QD04.

(ASIAHISP, ASIARACE, PIHISP, PIRACE, QD04HISP, QD04RACE, QD055, QD05HISP, QD05RACE)

IRRACEWH Len : 1 WHITE MENTIONED - IMPUTATION REVISED  
0 = Not mentioned  
1 = Mentioned

(QD051)

1 = Directly selected or not selected  
2 = From other-specify  
3 = From census data  
4 = Statistically imputed

IMPUTED DEMOGRAPHICS

IRHOGRP4 is equivalent to IRHOGRP3, the Hispanic group variable created prior to 2004. In 2004 there were two more levels (Dominican and Spanish (from Spain)) added to QD04. IRHOGRP4 has level 6 as Dominican and level 7 as Spanish (from Spain).

(ASIAHISP, IRHOIND, PIHISP, QD041, QD042, QD043, QD044, QD045, QD04HISP, QD05HISP)

- IRHOGRP4 Len : 2 HISPANIC-ORIGIN GROUP - IMPUTATION REVISED
- 1 = Puerto Rican
- 2 = Mexican
- 3 = Cuban
- 4 = Other
- 5 = Central or South American
- 6 = Dominican
- 7 = Spanish (from Spain)
- 99 = LEGITIMATE SKIP Respondent is not Hispanic

NOTE: Some of the respondents with IRHOGRP4=1 are members of more than one Hispanic group. A priority rule is used to assign IRHOGRP4 to one of the groups mentioned. This "priority rule" Hispanic group could have been either a selected category from QD04, or a write-in answer from QD04, QD05, or QD05ASIA.

(ASIAHISP, IRHOIND, PIHISP, QD041, QD042, QD043, QD044, QD045, QD04HISP, QD05HISP)

- IIHOGRP4 Len : 1 HISPANIC-ORIGIN GROUP - IMPUTATION INDICATOR
- 1 = Single Hispanic group from questionnaire
- 2 = Single Hisp grp from alpha-specify response(s)
- 3 = Stat imp (unrestricted), or IRHOIND imputed to 2
- 4 = Statistically imputed (restricted by race)
- 9 = LEGITIMATE SKIP Resp is not Hisp, non-imputed

(QD041, QD042, QD043, QD044, QD045, QD046, QD047)

- I2HOGRP4 Len : 1 HISPANIC-ORIGIN GROUP - DETAILED IMPUTATION INDICATOR
- 1 = Single Hispanic group from questionnaire
- 2 = Single Hisp grp from alpha-specify response(s)
- 3 = Single Hisp grp determined from multi responses
- 4 = Stat imp (unrestricted), or IRHOIND imputed to 2
- 5 = Statistically imputed (restricted by race)
- 9 = LEGITIMATE SKIP Resp is not Hisp, non-imputed

IRHOGRPM is created since 2004. It keeps track of respondents that are from multiple Hispanic groups. Each of the level 1 thru level 7 corresponds to a single Hispanic group. Level 8 refers to the people who chose multiple Hispanic groups in QD04.

(QD041, QD042, QD043, QD044, QD045, QD046, QD047)

- IRHOGRPM Len : 2 SINGLE/MULTIPLE HISPANIC-ORIGIN GROUP - IMPUTATION REVISED
- 1 = Puerto Rican Only
- 2 = Mexican Only
- 3 = Cuban Only
- 4 = Other, Hispanic Only
- 5 = Central or South American Only
- 6 = Dominican Only
- 7 = Spanish (from Spain) Only
- 8 = More than one Hispanic group
- 99 = LEGITIMATE SKIP Respondent is not Hispanic

(QD041, QD042, QD043, QD044, QD045, QD046, QD047)

- IIHOGRPM Len : 1 SINGLE/MULTIPLE HISPANIC-ORIGIN GROUP - IMPUTATION INDICATOR
- 1 = Single or multiple groups from questionnaire only
- 2 = Single or multiple groups from other-specify only
- 3 = Multi grps from questionnaire and other specify
- 4 = Unrestricted imputation, or IRHOIND imputed to 2
- 5 = Imputation restricted by race
- 9 = LEGITIMATE SKIP Resp is not Hisp, non-imputed

IMPUTED DEMOGRAPHICS

NOTE: The variable IRMARIT reflects the move of the marital status questions from self-administration in 2015 back to interviewer administration in 2016. This variable is considered to be comparable with corresponding variables in 2002 to 2014 (when this question also was interviewer-administered) but is not considered to be comparable with the marital status variable IRMARITSTAT in 2015. Analytic goals should be considered prior to pooling or comparing marital status data from 2015 with data from other years.

(MARITAL)

IRMARIT

Len : 2 IMPUTATION REVISED MARITAL STATUS

1 = Questionnaire data  
2 = Logically assigned data  
3 = Statistically imputed data

IMPUTED DEMOGRAPHICS

IRIMENTAGE replaces IRENTAG2 which was created from 2004 to 2014. The name for this variable was changed to reflect a change in skip logic and break in comparability. The number of years living in the United States (Q16b) is now also asked of those who were not born in the United States (QD14) and reported no moves (or DK/REF) in the past 12 months (QD13). The variable, IRIMENTAGE, gives the age at which an immigrant to the United States entered this country. It was derived from the respondent's age and the variables IMMYRSNUM and IMMOSNUM which gave the number of years that an immigrant to the U.S. has lived in this country. Any respondents born in the U.S. (IRIMMBORNUS=1) were coded as 999.

*(BRTHDATE, IMMOSNUM, IMMYRSNUM, INTDATE)*

IRIMENTAGE Len : 12 IMMIGRANT AGE OF ENTRY IN US - IMPUTATION REVISED  
RANGE = 0.0047912389 - 81.936344969  
999 = LEGITIMATE SKIP (IRIMMBORNUS=1)

*(BRTHDATE, IMMOSNUM, IMMYRSNUM, INTDATE)*

IIMENTAGE Len : 1 IMMIGRANT AGE OF ENTRY IN US - IMPUTATION INDICATOR  
1 = Questionnaire data  
2 = Logically assigned data  
3 = Statistically imputed data  
9 = LEGITIMATE SKIP

3 = 10 Yrs or More (See comment above)  
4 = US Born (IRIMMBORNUS=1)

EDUCATION

EDUCATION

The variable EDUHGHEDT is a supplemental, edited version of the interviewer-administered education variable EDUHIGHEST. In situations where respondents reported being currently enrolled in school (see below), EDUHGHEDT was edited for consistency with the current reported grade and the respondent's age; only limited editing was done for EDUHGHEDT when consistency checks were triggered between the highest level of education and the current grade or year in school. Consequently, the values in EDUHGHEDT could differ from those in EDUHIGHEST and the imputed education variable IREDUC. In addition, EDUHGHEDT in subsequent years could be affected by any changes in the content of the self-administered education variables in this section of the interview.

- 97 = REFUSED

NOTE: EDUSCHLGO takes into account information from follow-up probes if respondents originally reported that they were not enrolled in school. Based on these probes, respondents were coded as yes (i.e., enrolled) if they were on break from school and intended to return to school once their break was over. EDUSCHLGO was assigned a code of 11 if the respondent reported currently being enrolled but there was uncertainty about the respondent's school enrollment status.

The next questions are about school. By 'school', we mean elementary school, junior high or middle school, high school, or a college or university. Please include home schooling as well. Do you go to school?

If you are on a holiday or break from school, such as spring break or summer vacation, but plan to return when the break is over, please answer yes.

RECODED EDUCATION

**RECODED EDUCATION**

NOTE: Certain source variables that were used to create recoded variables have valid values that might not have been reported or assigned for the current survey year. However, these values have been included in the general specifications in the codebook on how the recoded variables were created. See additional details about this issue in the Organization of the Data File section of this codebook introduction.

NOTE: Starting with the 2021 NSDUH, the following college enrollment variables, ENRLCOLLFT and ENRLCOLLST were defined so that respondents aged 18-22 edited to "bad data" for the 3 source variables (EDUSCHLGO=85 and EDUSCHGRD=85 and EDUFULPAR=85) are coded as a system missing.

A respondent was defined as a full-time college student if they were aged 18 to 22 (AGE=18-22), enrolled in school (EDUSCHLGO =1, 3, 5, 11), enrolled at the college level (EDUSCHGRD=13-17, 33-37), and a full-time student (EDUFULPAR=1). Respondents in the category "Other Persons Aged 18-22" include those not enrolled in school, enrolled in college part-time, enrolled in other grades either full or part-time, or enrolled with no other information available. Respondents aged 18-22 who were edited to "bad data" or reported don't know, refused, or blank to being enrolled in school (EDUSCHLGO=85, 94, 97, 98), their school enrollment level (EDUSCHGRD=85, 94, 97, 98) and their full or part time status (EDUFULPAR=85, 94, 97, 98) are defined as system missing.

(AGE, EDUFULPAR, EDUSCHGRD, EDUSCHLGO)  
ENRLCOLLFT Len : 1 RC-COLLEGE ENROLLMENT-FULL TIME  
. = Unknown Enrollment, Aged 18-22 (See comment above)  
1 = Full Time College Student Aged 18-22 (See comment above)  
2 = Other Persons Aged 18-22 (See comment above)  
3 = Persons Aged 12-17, 23 or Older

A respondent was defined as a full or part-time college student if they were aged 18 to 22 (AGE=18-22), enrolled in school (EDUSCHLGO=1, 3, 5,11), enrolled at the college level (EDUSCHGRD=13-17, 33-37), and either a full-time student (EDUFULPAR=1) or part-time (EDUFULPAR=2) student. Respondents aged 18-22 who were edited to "bad data" or reported don't know, refused, or blank to being enrolled in school (EDUSCHLGO=85, 94, 97, 98), their school enrollment level (EDUSCHGRD=85, 94, 97, 98), and their full or part time status (EDUFULPAR=85, 94, 97, 98) are defined as system missing. Otherwise, a respondent was defined as not enrolled in college (EDUSCHLGO=2, 4) or in the category "Other Persons Aged 18-22" (enrolled in other grades either full or part-time, or enrolled with no other information available).

(AGE, EDUFULPAR, EDUSCHGRD, EDUSCHLGO)  
ENRLCOLLST Len : 1 RC-COLLEGE ENROLLMENT  
. = Unknwn Enrollment, Aged 18-22 (See comment above)  
1 = Full Time College Student Aged 18-22 (See comment above)  
2 = Part Time College Student Aged 18-22 (See comment above)  
3 = Not Enrolled Aged 18-22 (See comment above)  
4 = Other Persons Aged 18-22 (See comment above)  
5 = Persons Aged 12-17, 23 or Older

EMPLOYMENT

**EMPLOYMENT**

NOTE: The variable WRKSTATWK was created from the variables WRKDPSTWK, WRK35WKUS, WRKRSNNOT, WRKRSNJOB, WRKEFFORT, and WRKDPSTYR. Respondents who did not know or refused to report whether they worked in the past week but indicated that they did not work in the past 12 months were classified in WRKSTATWK as not having a job. In addition, respondents who reported that they had no job but were looking for work and did not report that they made specific efforts to find work (WRKRSNJOB = 1 and WRKEFFORT not answered as yes) were classified as not in the labor force.

(WRK35WKUS, WRKDPSTWK, WRKDPSTYR, WRKEFFORT, WRKRSNJOB, WRKRSNNOT)

- WRKSTATWK      Len : 3    WORK SITUATION IN PAST WEEK - RECODE
- 1 = Worked at full-time job, past week

- 1 = Employment status from questionnaire
- 3 = Emp. statistically imputed (unrestricted)
- 4 = Emp. stat. imp. (restr. to full-time or part-time)
- 9 = 12-17 years old

HOUSEHOLD COMPOSITION (ROSTER)

HOUSEHOLD COMPOSITION (ROSTER)

The variables in the household composition (roster) section were created from the questionnaire roster. For each member of the respondent's household, the sex, age, and relationship to the respondent are reported. The result is a grid with rows corresponding to the respondent's household size and columns corresponding to the sex, age, and relationship code for each household member. These characteristics are edited according to logical consistency checks. For example, when a household member could not possibly have a particular relationship to the respondent with a given age (e.g., a 12-year-old respondent older than his grandmother), the age and relationship code are set to bad data. The household composition variables are counts of various ages and relationship-types across the grid. Missing values in these household composition variables are the result of one or more household members having an age or relationship code that is either bad or missing. For two respondents who are members of a pair within a household, no attempt was made to reconcile disagreements in these counts between pair members. Also, if a respondent's information was missing, neither the other pair member's information nor the screener was used to fill in the missing data, which was left to be imputed. The justification for this: the screener interview and interviews of different members of pairs were conducted at different times, and the household composition could conceivably change between interviews. Variables are available in the roster pairs section that reconcile counts between pair members.

NOTE: Starting from 2003, the following variable, EDFAM18, replaced the variable IRFAM18 (the imputation-revised indicator for having family members in the household aged 18 or older). Prior to 2003, the edited proxy variables were created using IRFAM18. However in 2003, the procedures for creating the edited proxy variables changed due to changes in the proxy questions in the questionnaire. The new procedures required an edited form of this indicator.

HEALTH INSURANCE

HEALTH INSURANCE

The next questions are about [SAMPLE MEMBER POSS] health insurance coverage and the kinds and amounts of income that [SAMPLE MEMBER] and other people in your family receive. This information will help in planning health care services and finding ways to lower costs of care.

NOTE: Beginning in 2003, respondents under the age of 65 who reported that they were covered by Medicare were asked to confirm their answer.

Several government programs provide medical care or help pay medical bills.

Medicare is a health insurance program for people aged 65 and older and for certain people with disabilities. Is [SAMPLE MEMBER A] covered by Medicare?

(QHI01, QHI01V)

MEDICARE

Len : 2 COVERED BY MEDICARE

1 = Yes

2 = No

85 = BAD DATA Logically assigned

94 = DON'T KNOW

97 = REFUSED

98 = BLANK (NO ANSWER)

NOTE: The variable CAIDCHIP was created from responses to the first question shown below for respondents who were aged 20 or older. For respondents who were aged 12 to 19, CAIDCHIP was created from responses to the two questions shown below. This variable replaces the variable MEDICAID that was present in prior years. Beginning in 2003, respondents aged 65 or older who reported that they were covered by Medicaid were asked to confirm their answer.

Medicaid is a public assistance program that pays for medical care for people with low income and people with disabilities. The Medicaid program in [STATE FILL] is also called [MEDIFILL]. Medicaid may also be called Medical Assistance.

Is [SAMPLE MEMBER A] covered by Medicaid?

Is [SAMPLE MEMBER A] currently covered by [CHIPFILL]?

(QHI02, QHI02A, QHI02V)

CAIDCHIP

Len : 2 COVERED BY MEDICAID/CHIP

1 = Yes

2 = No

85 = BAD DATA Logically assigned

94 = DON'T KNOW

97 = REFUSED

98 = BLANK (NO ANSWER)

There are certain programs that cover active duty and retired career military personnel and their dependents and survivors and also disabled veterans and their dependents and survivors.

Is [SAMPLE MEMBER A] currently covered by TRICARE, or CHAMPUS, CHAMPVA, the VA, or military health care?

(QHI03)

CHAMPUS

Len : 2 COV BY TRICARE, CHAMPUS, CHAMPVA, VA, MILITARY

1 = Yes

2 = No

85 = BAD DATA Logically assigned

94 = DON'T KNOW

97 = REFUSED

98 = BLANK (NO ANSWER)

HEALTH INSURANCE

Private health insurance can be obtained through work, such as through an employer, union, or professional association, by paying premiums directly to a health insurance company, or by purchasing a plan through the Health Insurance Marketplace. It includes coverage by a health maintenance organization or HMO, fee for service plans, and single service plans.

Is [SAMPLE MEMBER A] currently covered by private health insurance?

(QHI06)

For IRINSUR4, a respondent is classified as having any health insurance (IRINSUR4=1) if they satisfied ANY of the following conditions.

- (1) Covered by Medicare (IRMEDICR=1)
- (2) Covered by Medicaid/CHIP (IRMCDCHP=1)
- (3) Covered by Tricare, Champus, ChampVA, VA, or Military (IRCHMPUS=1)
- (4) Covered by private insurance (IRPRVHLT=1)
- (5) Covered by other health insurance (IROTTHLT=1)

A respondent is classified as NOT having any health insurance (IRINSUR4=2) if they meet EVERY one of the following conditions

- (1) Not covered by Medicare (IRMEDICR=2)
- (2) Not covered by Medicaid/CHIP (IRMCDCHP=2)
- (3) Not covered by Tricare, Champus, ChampVA, VA, or Military (IRCHMPUS=2)
- (4) Not covered by private insurance (IRPRVHLT=2)
- (5) Not covered by other health insurance (IROTTHLT=2)

(*IRCHMPUS, IRMCDCHP, IRMEDICR, IROTTHLT, IRPRVHLT*)  
IRINSUR4            Len : 1    RC-OVERALL HEALTH INSURANCE - IMPUTATION REVISED

RECODED INCOME

**RECODED INCOME**

NOTE: The variables in this section are recoded variables that were created from one or more of the edited or imputed variables from the two preceding sections.

The following variable, GOVTPROG, was created by examination of these government assistance program variables: Supplemental Security Income (IRFAMSSI), food stamps (IRFSTAMP), cash assistance (IRFAMPMT), and non-cash assistance (IRFAMSVC).

(*IRFAMPMT, IRFAMSSI, IRFAMSVC, IRFSTAMP*)  
GOVTPROG Len : 1 RC-PARTICIPATED IN ONE OR MORE GOVT ASSIST PROGR  
1 = Yes (Any source variable=1)  
2 = No (All source variables=2)

(*IRFMLYIN3*)  
INCOME Len : 1 RC-TOTAL FAMILY INCOME RECODE  
1 = Less than \$20,000  
2 = \$20,000 - \$49,999  
3 = \$50,000 - \$74,999  
4 = \$75,000 or More

(*IRFMLYIN3*)  
INCOMES Len : 1 RC-TOTAL FAMILY INCOME RECODE, 5 LEVELS  
1 = Less than \$20,000  
2 = \$20,000 - \$49,999  
3 = \$50,000 - \$74,999  
4 = \$75,000 - \$99,999  
5 = \$100,000 or more

NOTE: The following variables, POVPER2 and POVERTY3, indicate a person's family income relative to poverty thresholds. The U.S. Census Bureau assigns a poverty threshold for each combination of family size (IRFMLYSZ) and number of children (IRKDFMLY) in the household. To be at 100% of the poverty threshold is equivalent to having a family income that is the same as the poverty threshold. A poverty level less than 100% indicates having a family income less than the poverty threshold and therefore defined by the Federal government as living in poverty. A poverty level greater than 100% indicates having a family income greater than the poverty threshold.

POVPER2 was created for each individual based on their poverty threshold (determined by their age (AGE), family size (IRFMLYSZ), the number of children in the household (IRKDFMLY), and total family income (IRFMLYIN3)). Since NSDUH only collects categorical values of family income, for each level of income (IRFMLYIN3), the midpoint of each range was assigned as the effective family income. The highest level of income, \$150,000 or more, was assigned a value of \$180,000. Family income was divided by the poverty threshold and multiplied by 100 to show family income as a percentage of the federal poverty threshold. Respondents aged 18 to 22 currently living in a college dormitory (AGE=18-22 and GQTYPE='C') were set to system missing and do not have a valid value for this variable.

(*AGE, GQTYPE, IRFMLYIN3, IRFMLYSZ, IRKDFMLY*)  
POVPER2 Len : 12 RC-CONT POVERTY LEVEL-NEW INC (% OF US CENSUS POV THRESHOLD)  
RANGE = 0.8681007691 - 1450.0926448  
. = Persons Aged 18-22 in a College Dorm

(*POVPER2*)  
POVERTY3 Len : 1 RC-POVERTY LEVEL-NEW INC (% OF US CENSUS POVERTY THRESHOLD)  
. = Persons Aged 18-22 in a College Dorm (POVPER2=.)  
1 = Living in Poverty (POVPER2=0 to <100)  
2 = Income Up to 2X Fed Pov Thresh (POVPER2=100 to <200)  
3 = Income More Than 2X Fed Pov Thresh (POVPER2>=200)

RECODED INCOME

The following variable, *POVPRHHS2*, indicates a person's family income relative to the U.S. Department of Health and Human Services (HHS) poverty guidelines for the current year. The HHS poverty guidelines are a simplified version of the poverty thresholds assigned by the U.S. Census Bureau (used to create *POVPER2* and *POVERTY3*), based only on state of residence, income, and family size. The HHS poverty guidelines are used for administrative purposes such as determining financial eligibility for certain federal programs, whereas the Census Bureau poverty thresholds are used for statistical purposes such as determining number of persons in poverty. The variable *POVPRHHS* uses HHS guidelines that are determined separately for Alaska, Hawaii, and for the contiguous states including D.C. To be at 100% of the poverty guideline is equivalent to having a family income that is the same as the HHS-specified poverty guideline. A level less than 100% indicates having a family income less than the poverty guideline and a level greater than 100% indicates having a family income greater than the poverty guideline.

*POVPRHHS2* was created for each individual based on their HHS poverty guideline (determined by their state of residence (*STATE*), family size (*IRFMLYSZ*), and total family income (*IRFMLYIN3*)). Since *NSDUH* only collects categorical values of family income, for each level of income (*IRFMLYIN3*), the midpoint of each range was assigned as the effective family income. However, for the highest level of income, \$150,000 or more, an effective family income of \$180,000 was assigned. Effective family income was divided by the HHS poverty guideline and multiplied by 100 to show family income as a percentage of the HHS poverty guideline. Respondents aged 18 to 22 currently living in a college dormitory (*AGE=18-22* and *GQTYPE='C'*) were set to system missing and do not have a valid value for this variable.

(*AGE, GQTYPE, IRFMLYIN3, IRFMLYSZ, STATE*)

*POVPRHHS2*      Len : 12    RC-CONT POVERTY LEVEL-NEW INC (% OF US HHS POV GUIDELINES)

RANGE = 0.742280285 - 1397.515528

. = Persons Aged 18-22 in a College Dorm

SPECIAL TOPICS

SPECIAL TOPICS

*The values in this section may be inconsistent with values for variables in other sections of the interview. Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in earlier sections. Otherwise, variables in one section of the interview generally were not edited to make them consistent with variables in another section of the interview. This note applies to variables in this section marked by a<sup>1</sup>.*

The next questions are about encounters with the police or the court system.

Not counting minor traffic violations, have you ever been arrested and booked for breaking the law?

Being "booked" means that you were taken into custody and processed by the police or by someone connected with the courts, even if you were then released.

(SP01)

BOOKED<sup>1</sup>

Len : 2 EVER ARRESTED AND BOOKED FOR BREAKING THE LAW

1 = Yes

2 = No

3 = Yes LOGICALLY ASSIGNED

85 = BAD DATA Logically assigned

94 = DON'T KNOW

97 = REFUSED

98 = BLANK (NO ANSWER)

NOTE: For the variable NOBOOKYR and the variables pertaining to arrests for specific offenses in the past 12 months (BKMVTHFT through BKOTHOFF), data are included from follow-up questions that were added to the interview in 2002. Respondents who initially reported that they were arrested/booked for 1 or more offenses in the past 12 months but did not answer "yes" to any of the subsequent questions about the specific offenses for which they were arrested were routed to these follow-up questions. If respondents changed their answer to "0" for the number of times they were arrested/booked in the past 12 months, it was logically inferred that any previously answered questions about arrests for specific offenses should have been skipped, and codes of 89 were assigned to the edited variables. If respondents confirmed that they were arrested/booked at least once in the past 12 months, they had additional opportunity to specify one of the offenses for which they were arrested. These data also were used to edit BKMVTHFT through BKOTHOFF. For these reasons, the distributions of NOBOOKYR through BKOTHOFF may not be comparable to those observed in 1999 through 2001.

Not counting minor traffic violations, how many times during the past 12 months have you been arrested and booked for breaking a law?

(SP02, SP03S)

SPECIAL TOPICS

NOTE: For the variable BKOTH, a code of 3 indicates that respondents did not originally answer "yes" to any of the questions about specific offenses for which they were arrested/booked in the past 12 months, including the question about "some other offense." However, these respondents subsequently specified a valid response for an offense in the past 12 months. A code of 5 in BKOTH indicates that respondents reported being arrested/booked at least once in the past 12 months but did not indicate at least one offense for which they were arrested in that period.

In the past 12 months, were you arrested and booked for some other offense besides these that have been named? Please do not include minor traffic violations.

(SP03Q)  
BKOTH<sup>1</sup>

- Len : 2 ARRSTD & BOOKED FOR SOME OTHER OFF PAST 12 MOS

**RECODED SPECIAL TOPICS**

NOTE: The variables in this section are recoded variables that were created from one or more of the edited variables from the preceding section.

NOTE: Certain source variables that were used to create recoded variables have valid values that might not have been reported or assigned for the current survey year. However, these values have been included in the general specifications in the codebook on how the recoded variables were created. See additional details about this issue in the Organization of the Data File section of this codebook introduction.

(*DRVINALCO*)

DRVINALCO2 Len : 1 RC-DROVE UNDER INFLUENCE OF ALCOHOL IN PAST YEAR  
 . = Unknown (Otherwise)  
 0 = No (DRVINALCO=2,91,93,99)  
 1 = Yes (DRVINALCO=1)

(*DRVINMARJ*)

98 = BLANK (NO ANSWER)

NOTE: The following dependence variables were defined based on the dependence criteria according to the Nicotine Dependence Syndrome Scale (NDSS) and the Fagerstrom Test of Nicotine Dependence (FTND) for respondents who smoked cigarettes in the past month (i.e., CIGMON=1). The NDSS criteria for dependence was based on 17 questions pertaining to five aspects of dependence. Based on the NDSS, a respondent was defined as having nicotine dependence, NDSSDEPND=1, if the sum of the valid responses (based on actual reporting) was greater than or equal to 46.75. The FTND measure is defined by assessing how soon after waking a respondent had their first cigarette (CIGWAKE). Based on the FTND scale, a respondent was defined as having nicotine dependence, FTNDDEPND=1, if the first cigarette was smoked within 30 minutes of waking up on the days they smoked (CIGWAKE=1 or 2) and the respondent smoked cigarettes in the past month (CIGMON=1). Based on the NDSS and the FTND, a respondent who smoked cigarettes in the past month was defined as having nicotine dependence, PMNICDEP=1, if they met either the NDSS or the FTND criteria for dependence. Specific details are provided in the Nicotine Dependence and Substance Use Disorder appendix.

- 1 = Edited for consistency with ALCYRTOT or ALCBNG30D
- 98 = BLANK (NO ANSWER)

NOTE: Beginning in 2015, level 975 was updated to "AT LEAST 4 or 5 Logically assigned" to reflect the change in the threshold for binge alcohol use among female respondents from 5 or more drinks on an occasion prior to 2015 to 4 or more drinks on an occasion in 2015. See the note below for ALCBNG30D.

On the ALC30DAY/ALCESTFL days that you drank during the past 30 days, how many drinks did you usually have? Count as a drink a can or bottle of beer; a wine cooler or a glass of wine, champagne, or sherry; a shot of liquor or a mixed drink or cocktail.

(AL07)  
ALCUS30D

- Len : 3 USUAL # OF DRINKS PER DAY PAST 30 DAYS
- RANGE = 1 - 90
- 975 = AT LEAST 4 OR 5 Logically assigned
- 985 = BAD DATA Logically assigned
- 991 = NEVER USED ALCOHOL
- 993 = DID NOT USE ALCOHOL IN THE PAST 30 DAYS
- 994 = DON'T KNOW
- 997 = REFUSED
- 998 = BLANK (NO ANSWER)

NOTE: Beginning in 2015, female respondents were asked ALCBNG30D to report the number of days that they had 4 or more drinks on the same occasion in the past 30 days. As in prior years, male respondents in 2015 were asked for ALCBNG30D to report the number of days that they had 5 or more drinks on the same occasion in the past 30 days.

During the past 30 days, that is since [DATEFILL], on how many days did you have [4 or more]/[5 or more] drinks on the same occasion? By "occasion," we mean at the same time or within a couple of hours of each other.

(AL08)  
ALCBNG30D

- Len : 2 # DAYS HAD FOUR/FIVE OR MORE DRINKS PAST 30 DYS
- RANGE = 0 - 30
- 80 = NO OCCAS OF 4+ or 5+ DRINKS PST 30 DAYS Log assn
- 85 = BAD DATA Logically assigned

- 97 = REFUSED
- 98 = BLANK (NO ANSWER)

CONSUMPTION OF ALCOHOL

CONSUMPTION OF ALCOHOL

*The values in this section may be inconsistent with values for variables in other sections of the interview. Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in earlier sections. Otherwise, variables in one section of the interview generally were not edited to make them consistent with variables in another section of the interview. This note applies to variables in this section marked by a <sup>1</sup>.*

NOTE: Beginning in 2017, respondents who reported that they used alcohol on 0 days in the past 30 days are no longer asked questions in the consumption of alcohol module that pertain to the past 30 days. This change has resulted in an increase in the number of respondents who were coded as "blank" compared with data from 2016 and prior years. However, this change was determined not to have affected the comparability of estimates since 2017 with those prior to 2017.

Next we return to the topic of alcohol. Remember that by a "drink", we mean a can or bottle of beer, a glass of wine or a wine cooler, a shot of liquor, or a mixed drink with liquor in it. We are not asking about times when you only had a sip or two from a drink.

Earlier, the computer recorded that you drank at least one alcoholic beverage within the past 30 days, that is, since [DATEFILL].

Please think about the last time you drank any alcoholic beverage. How many drinks did you have that time?

CONSUMPTION OF ALCOHOL

NOTE: EIBINGAGE is an "editing indicator" for the variable CABINGAGE. The default value of EIBINGAGE is 1, when no editing has been done to CABINGAGE, other than to replace values with "bad data" codes or to assign relevant LEGITIMATE SKIP/NEVER USED ALCOHOL codes when the question did not apply. EIBINGAGE has values of 2 when values in CABINGAGE have logically been replaced with other values as part of the data editing procedures.

EIBINGAGE<sup>1</sup>      Len : 1    EDITING INDICATOR FOR CABINGAGE  
1 = Questionnaire data (or bad data/legitimate skip)  
2 = Logically assigned data

RECODED CONSUMPTION OF ALCOHOL

**RECODED CONSUMPTION OF ALCOHOL**

NOTE: The variables in this section are recoded variables that were created from one or more of the edited variables from the preceding section.

NOTE: Certain source variables that were used to create recoded variables have valid values that might not have been reported or assigned for the current survey year. However, these values have been included in the general specifications in the codebook on how the recoded variables were created. See additional details about this issue in the Organization of the Data File section of this codebook introduction.

The following variable defines the social context of a respondent's last alcohol use, including whether they drank alone or if they were with one or more persons.

(CADRPEOP)

UADPEOP

Len : 1 RC-SOCIAL CONTEXT OF MOST RECENT ALCOHOL USE

BLUNTS

**BLUNTS**

*The values in this section may be inconsistent with values for variables in other sections of the interview. Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in earlier sections. Otherwise, variables in one section of the interview generally were not edited to make them consistent with variables in another section of the interview. This note applies to variables in this section marked by a<sup>1</sup>.*

NOTE: When respondents previously reported never using marijuana but reported lifetime use of cigars with marijuana in them (i.e., "blunts"), a consistency check was triggered only when respondents reported using blunts in the past 30 days. Therefore, BLNTEVER was assigned a code of 11 when respondents reported using blunts but they did not report use in the past 30 days, and they previously had reported never using marijuana.

Sometimes people take some tobacco out of a cigar and replace it with marijuana. This is sometimes called a "blunt".

Have you ever smoked part or all of a cigar with marijuana in it?

(BL01)

BLNTEVER<sup>1</sup>

- Len : 2 EVER SMOKED CIGAR WITH MARIJUANA IN IT
- 1 = Yes
- 2 = No
- 4 = No LOGICALLY ASSIGNED
- 11 = Yes (see note)
- 85 = BAD DATA Logically assigned
- 94 = DON'T KNOW
- 97 = REFUSED
- 98 = BLANK (NO ANSWER)

How old were you the first time you smoked part or all of a cigar with marijuana in it?

(BL08)

BLNTAGE<sup>1</sup>

- Len : 3 AGE WHEN FIRST SMOKED CIGAR WITH MJ IN IT
- RANGE = 1 - 78
- 981 = NEVER USED BLUNTS Logically assigned
- 985 = BAD DATA Logically assigned
- 991 = NEVER USED BLUNTS
- 994 = DON'T KNOW
- 997 = REFUSED
- 998 = BLANK (NO ANSWER)

NOTE: When respondents previously reported using marijuana but reported less recent use of marijuana than they reported for blunts, a consistency check was triggered only when respondents reported using blunts in the past 30 days. Therefore, BLNTREC was assigned a code of 12 when respondents reported last using marijuana more than 12 months ago but reported using blunts more than 30 days ago but within the past 12 months.

How long has it been since you last smoked part or all of a cigar with marijuana in it?

(BL02)

BLNTREC<sup>1</sup>

- Len : 2 TIME SINCE LAST SMOKED CIGAR WITH MJ IN IT
- 1 = Within the past 30 days
- 2 = More than 30 days ago but within the past 12 mos
- 3 = More than 12 months ago
- 9 = Used at some point in lifetime LOG ASSN
- 12 = More than 30 dys ago but in pst 12 mos (see note)
- 19 = More than 30 days ago LOGICALLY ASSIGNED
- 81 = NEVER USED BLUNTS Logically assigned
- 85 = BAD DATA Logically assigned
- 91 = NEVER USED BLUNTS
- 97 = REFUSED
- 98 = BLANK (NO ANSWER)

NOTE: BLRECFLG has nonblank values when data on initiation of use from BLNTAGE, BLNTYFU, or BLNTMFU indicate more recent use of blunts than was reported in BLNTREC.

BLRECFLG<sup>1</sup>

- Len : 2 INCONSISTENCY BETW BLNTREC AND INCIDENCE DATA
- 1 = Incidence data suggest past month use
- 2 = Incidence data suggest past year use (fr BLNTAGE)
- 3 = Incidence suggests pst yr use (fr BLNTYFU&BLNTMFU)
- 98 = BLANK (NO INCONSISTENCY)

BLUNTS

On how many of the past 30 days, that is, since [DATEFILL], did you smoke part or all of a cigar with marijuana in it?

(BL02A, BL03A, BL04A)

BLNT30DY<sup>1</sup>

- Len : 2 # DAYS USED CIGAR WITH MJ IN IT PAST 30 DAYS
- RANGE = 1 - 30
- 85 = BAD DATA Logically assigned
- 91 = NEVER USED BLUNTS

- 98 = BLANK (NO ANSWER)
- 99 = LEGITIMATE SKIP

Why did you report earlier that you did not use marijuana or any cannabis product during the past 30 days?

(BL06)

RSNMRJMO<sup>1</sup>

- Len : 2 WHY REPRT EARLIER NOT USE MJ/CANNABIS PAST 30 DAYS
- 1 = I didn't consider a "blunt" to be mj or any cannabis product
- 2 = I made mistake answering earlier question about mj
- 3 = Some other reason
- 89 = LEGITIMATE SKIP Logically assigned
- 98 = BLANK (NO ANSWER)
- 97 = REFUSED
- 99 = LEGITIMATE SKIP

NOTE: The variable BLNTNOMJ was assigned a code of 5 if respondents were not asked this question because they reported in the TOBACCO module that they smoked cigars in the past 30 days but reported in the BLUNTS module that they did not smoke cigars with marijuana in them in the past 30 days. It could be logically inferred that all of the cigars that these respondents smoked in the past 30 days did not have marijuana in them. BLNTNOMJ was assigned codes of 14 or 24 if respondents were not asked this question and they reported in the BLUNTS module that they smoked a cigar with marijuana in it in the past 30 days. A code of 14 was assigned if respondents reported in the TOBACCO module that they had smoked cigars but not in the past 30 days. A code of 24 was assigned if respondents reported in the TOBACCO module that they had never smoked part or all of a cigar.

Earlier, you reported that you had smoked part or all of a cigar during the past 30 days. During the past 30 days, did you smoke any cigars that did not have marijuana in them?

(BL07)

HALLUCINOGENS

HALLUCINOGENS

The next questions are about substances called hallucinogens. These drugs often cause people to see or experience things that are not real.

A list of some common hallucinogens is shown below. These and many other substances that people use as hallucinogens are often known by street names, and we can't list them all. Please take a moment to look at the substances listed below so you know what kind of drugs the next questions are about.

- LSD, also called 'acid'
- PCP, also called 'angel dust' or phencyclidine
- Peyote
- Mescaline
- Psilocybin
- 'Ecstasy' or 'Molly', also called MDMA
- Ketamine, also called 'Special K' or 'Super K'
- DMT, also called dimethyltryptamine
- AMT, also called alpha-methyltryptamine
- Foxy, also called 5-MeO-DIPT
- Salvia divinorum

Have you ever, even once, used LSD, also called 'acid'?

(LS01A, LSREF1)

- LSD                    Len : 2    EVER USED LSD ("ACID")
- 1 = Yes
- 2 = No
- 3 = Yes LOGICALLY ASSIGNED
- 91 = NEVER USED HALLUCINOGENS
- 94 = DON'T KNOW
- 97 = REFUSED

Have you ever, even once, used PCP, also called 'angel dust' or phencyclidine?

(LS01B, LSREF2)

- PCP                    Len : 2    EVER USED PCP ("ANGEL DUST," PHENCYCLIDINE)
- 1 = Yes
- 2 = No

INHALANTS

INHALANTS

These next questions are about liquids, sprays, and gases that people sniff or inhale to get high or to make them feel good.

We are not interested in times when you inhaled a substance accidentally — such as when painting, cleaning an oven, or filling a car with gasoline. The questions use the word ‘inhalant’ to include all the things listed below, as well as any other substances that people sniff or inhale for kicks or to get high. Take a moment to look at the substances listed below so you know what kinds of liquids, sprays, and gases these questions are about.

- Amyl nitrite, 'poppers,' locker room odorizers, or 'rush'
- Correction fluid, degreaser, or cleaning fluid
- Gasoline or lighter fluid
- Glue, shoe polish, or toluene
- Halothane, ether, or other anesthetics
- Lacquer thinner, or other paint solvents
- Lighter gases, such as butane or propane
- Nitrous oxide or 'whippits'
- Felt-tip pens, felt-tip markers, or magic markers
- Spray paints
- Computer keyboard cleaner, also known as air duster
- Other aerosol sprays

Have you ever, even once, inhaled amyl nitrite, 'poppers,' locker room odorizers, or 'rush' for kicks or to get high?

The answers that people give us about their use of inhalants are important to this study's success. We know that this information is personal, but remember your answers will be kept confidential.

Please think again about answering this question: Have you ever, even once, used any type of inhalant for kicks or to get high?

NOTE: This variable was coded as 1 if respondents answered yes to the above question and 91 if respondents answered the above question as no (see below). This variable also was coded as 1 if the questions corresponding to any of the following variables were answered as yes: AMYLNIT, CLEFLU, GAS, GLUE, ETHER, SOLVENT, LGAS, NITOXID, FELTMARKR, SPPAINT, AIRDUSTER, OTHAEROS, or INHALOTH. This variable also was coded as 91 if all of the above variables were coded as 91.

(AIRDUSTER, AMYLNIT, CLEFLU, ETHER, FELTMARKR, GAS, GLUE, INHALOTH, INREF, LGAS, NITOXID, OTHAEROS, SOLVENT, SPPAINT)

FENTANYR      Len : 1   FENTANYL PRODUCTS - ANY PAST YEAR USE  
. = Missing  
0 = No  
1 = Yes (See comment above)

PAIN RELIEVERS

PAIN RELIEVERS

The next question asks about using prescription pain relievers in any way a doctor did not direct you to use them.

When you answer these questions, please think only about your use of the drug in any way a doctor did not direct you to use it, including:

- Using it without a prescription of your own
- Using it in greater amounts, more often, or longer than you were told to take it
- Using it in any other way a doctor did not direct you to use it

Have you ever, even once, used any prescription pain reliever in any way a doctor did not direct you to use it?

(PRL01, PRL02)

PNRNMLIF

Len : 2 EVER USED PAIN RELIEVER NOT DIRECTED BY DR  
 1 = Yes  
 2 = No  
 5 = Yes LOGICALLY ASSIGNED (from skip pattern)  
 85 = BAD DATA Logically assigned  
 91 = NEVER USED/MISUSED PAIN RELIEVERS  
 94 = DON'T KNOW  
 97 = REFUSED  
 98 = BLANK (NO ANSWER)

Earlier you reported having used certain **prescription pain relievers** during the past year. Now please think about whether you used any of these pain relievers in any way **a doctor did not direct you to use them**.

When you answer these questions, please think only about your use of the drug in any way **a doctor did not direct you to use it**, including:

- Using it without a prescription of your own
- Using it in greater amounts, more often, or longer than you were told to take it
- Using it in **any other way** a doctor did not direct you to use it

Earlier, the computer recorded that, in the past 12 months, you used [PRFILL].

In the past 12 months, did you use Vicodin in any way **a doctor did not direct you to use it**?

(PRY01)

VICONMYR

PAIN RELIEVERS

NOTE: PNRNMINIT is "reverse coded" from the answers in PRL03. PRL03=1 (yes) was recoded to 2 in PNRNMINIT because this answer means that the respondent misused pain relievers before the past 12 months (and therefore is not a past year initiate for misuse of pain relievers). PRL03=2 (no) was recoded to 1 in PNRNMINIT because this answer means that the respondent did not misuse pain relievers before the past 12 months (and therefore is a past year initiate for misuse of pain relievers).

Earlier questions were about the past 12 months. This question is about any time before then, that is, any time in your life before [DATEFILL].

At any time before [DATEFILL], did you ever use any prescription pain reliever in a way a doctor did not direct you to use it?

(PRL03)

PNRNMINIT Len : 2 PAST YEAR INITIATE FOR ANY PAIN RELIEVER MISUSE  
1 = Past year initiate

TRANQUILIZERS

TRANQUILIZERS

The next question asks about using prescription tranquilizers in any way a doctor did not direct you to use them.

When you answer these questions, please think only about your use of the drug in any way a doctor did not direct you to use it, including:

- Using it without a prescription of your own
- Using it in greater amounts, more often, or longer than you were told to take it
- Using it in any other way a doctor did not direct you to use it

Have you ever, even once, used any prescription tranquilizer in any way a doctor did not direct you to use it?

(TRL01, TRL02)

TRQNMLIF

997 = REFUSED  
998 = BLANK (NO ANSWER)

NOTE: The variable TRQNMREC is a recoded variable that was created from TRQNMLIF, the 12-month misuse variables for XNAXNMYR through TRQOTNMYR, and TRQNM30D.

[TRQNMREC](#)

Len : 2 RC - MOST RECENT TRANQUILIZER MISUSE (RECODE)  
1 = Within the past 30 days  
2 = More than 30 days ago but within the past 12 mos  
3 = More than 12 months ago  
8 = Misused at some point in past 12 mos LOG ASSN  
9 = Misused at some point in lifetime LOG ASSN  
83 = DID NOT MISUSE PST 12 MOS (LIFETIME UNK) Log assn  
91 = NEVER USED/MISUSED TRANQUILIZERS  
98 = BLANK (NO ANSWER)

TRANQUILIZERS

NOTE: TRQNMINT is "reverse coded" from the answers in TRL03. TRL03=1 (yes) was recoded to 2 in TRQNMINT because this answer means that the respondent misused tranquilizers before the past 12 months (and therefore is not a past year initiate for misuse of tranquilizers). TRL03=2 (no) was recoded to 1 in TRQNMINT because this answer means that the respondent did not misuse tranquilizers before the past 12 months (and therefore is a past year initiate for misuse of tranquilizers).

Earlier questions were about the past 12 months. This question is about any time before then, that is, any time in your life before [DATEFILL].

At any time before [DATEFILL], did you ever use any prescription tranquilizer in a way a doctor did not direct you to use it?

(TRL03)

TRQNMINT Len : 2 PAST YEAR INITIATE FOR ANY TRANQUILIZER MISUSE  
1 = Past year initiate  
2 = Not a past year initiate  
4 = Not past yr initiate LOG ASSN (from skip pattern)  
83 = NOT PAST YR INITIATE (AT-RISK STATUS UNKNOWN)  
91 = NEVER USED/MISUSED TRANQUILIZERS  
93 = DID NOT MISUSE TRANQUILIZERS IN THE PAST 12 MOS  
94 = DON'T KNOW  
97 = REFUSED  
98 = BLANK (NO ANSWER)

NOTE: The variables TRQNMAGE, TRQNMYSFU, and TRQNMMSFU show the age, year, and month of first misuse, respectively, for respondents who initiated misuse of tranquilizers in the 12 months prior to being interviewed (TRQNMINT=1).

TRQNMAGE Len : 3 RC - AGE AT 1ST MISUSE FOR PAST YR TRANQ INITIATES  
RANGE = 12 - 84  
983 = NOT A PAST YEAR INITIATE Log assn  
991 = NEVER USED/MISUSED TRANQUILIZERS  
993 = NOT A PAST YEAR INITIATE  
998 = BLANK (NO ANSWER)

In the past 30 days, that is, from [DATEFILL] up to and including today, did you use [TRNAMEFILL] in any way a doctor did not direct you to use [TRNUMFILL]?

(TRM01)

STIMULANTS

The next question asks about using prescription stimulants in any way a doctor did not direct you to use them.

When you answer these questions, please think only about your use of the drug in any way a doctor did not direct you to use it, including:

- Using it without a prescription of your own
- Using it in greater amounts, more often, or longer than you were told to take it
- Using it in any other way a doctor did not direct you to use it

Have you ever, even once, used any prescription stimulant in any way a doctor did not direct you to use it?

(STL01, STL02)

STMNMLIF

SEDATIVES

The next question asks about using prescription sedatives in any way a doctor did not direct you to use them.

When you answer these questions, please think only about your use of the drug in any way a doctor did not direct you to use it, including:

- Using it without a prescription of your own
- Using it in greater amounts, more often, or longer than you were told to take it
- Using it in any other way a doctor did not direct you to use it

Have you ever, even once, used any prescription sedative in any way a doctor did not direct you to use it?

(SVL01, SVL02)

## SEDATIVES

NOTE: The variable SEDNMREC is a recoded variable that was created from SEDNMLIF, the 12-month misuse variables for AMBINMYR through SEDOTNMYR, and SEDNM30D.

SEDNMREC Len : 2 RC - MOST RECENT SEDATIVE MISUSE (RECODE)  
1 = Within the past 30 days  
2 = More than 30 days ago but within the past 12 mos  
3 = More than 12 months ago  
8 = Misused at some point in past 12 mos LOG ASSN  
9 = Misused at some point in lifetime LOG ASSN  
83 = DID NOT MISUSE PST 12 MOS (LIFETIME UNK) Log assn  
91 = NEVER USED/MISUSED SEDATIVES  
98 = BLANK (NO ANSWER)

NOTE: SEDNMINIT is "reverse coded" from the answers in SVL03. SVL03=1 (yes) was recoded to 2 in SEDNMINIT because this answer means that the respondent misused sedatives before the past 12 months (and therefore is not a past year initiate for misuse of sedatives). SVL03=2 (no) was recoded to 1 in SEDNMINIT because this answer means that the respondent did not misuse sedatives before the past 12 months (and therefore is a past year initiate for misuse of sedatives).

Earlier questions were about the past 12 months. This question is about any time before then, that is, any time in your life before [DATEFILL].

At any time before [DATEFILL], did you ever use any prescription sedative in a way a doctor did not direct you to use it?

(SVL03)  
SEDNMINIT Len : 2 PAST YEAR INITIATE FOR ANY SEDATIVE MISUSE  
1 = Past year initiate  
2 = Not a past year initiate  
4 = Not past yr initiate LOG ASSN (from skip pattern)  
83 = NOT PAST YR INITIATE (AT-RISK STATUS UNKNOWN)  
91 = NEVER USED/MISUSED SEDATIVES  
93 = DID NOT MISUSE SEDATIVES IN THE PAST 12 MOS  
94 = DON'T KNOW  
98 = BLANK (NO ANSWER)

NOTE: The variables SEDNMAGE, SEDNMYFU, and SEDNMMFU show the age, year, and month of first misuse, respectively, for respondents who initiated misuse of sedatives in the 12 months prior to being interviewed (SEDNMINIT=1).

SEDNMAGE Len : 3 RC - AGE AT 1ST MISUSE FOR PAST YR SED INITIATES  
RANGE = 11 - 77  
983 = NOT A PAST YEAR INITIATE Log assn  
991 = NEVER USED/MISUSED SEDATIVES  
993 = NOT A PAST YEAR INITIATE  
998 = BLANK (NO ANSWER)

In the past 30 days, that is, from [DATEFILL] up to and including today, did you use [SVNAMEFILL] in any way a doctor did not direct you to use [SVNUMFILL]?

(SVM01)  
SEDNM30D Len : 2 USED SEDATIVE NOT DIRECTED BY DR PAST 30 DAYS

NOTE: The following 18 variables refer to any use of prescription drugs. Any Use of prescription drugs is defined as either the use of one's own prescription medication as directed by a doctor or the misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Due to potential underreporting of lifetime prescription drug use, users are cautioned against using the levels 'More than 12 months ago' and 'NEVER USED XXX' in analysis for the following variables: IRPNRANYREC, IRTRQANYREC, IRSTMANYREC, and IRSEDANYREC.

"Binge" Alcohol Frequency, IRALCBNG30D, is defined as the number of days in the past month on which the respondent reported drinking five or more drinks on the same occasion for males or four or more drinks on the same occasion for females. For this variable, "occasion" means at the same time or within a couple hours of each other. Prior to 2015, "binge" alcohol frequency was defined as the number of days in the past month on which the respondent reported drinking five or more drinks on the same occasion for everyone, regardless of sex. Therefore, IRALCBNG30D is comparable to the version of this variable created from 2002-2014, IRALCD5, among males but not overall or among females.

1 = Used in past month (Any source variable = 1)

Due to potential underreporting of lifetime prescription drug use, users are cautioned against using the lifetime use of marijuana only variable in analysis. This variable may overestimate lifetime users of only marijuana.

(COCFLAG, HALLUCFLAG, HERFLAG, INHALFLAG, METHAMFLAG, MRJFLAG, PNRNMFLAG, SEDNMFLAG, STMNMFLAG, TRQNMFLAG)

MJONLYFLAG Len : 1 RC-MARIJUANA ONLY - EVER USED  
0 = Never used MJ/has used both MJ & anothr illct drug  
1 = Marijuana is only (illicit) drug ever used

(COCYR, HALLUCYR, HERYR, INHALYR, METHAMYR, MRJYR, PNRNMYR, SEDNMYR, STMNMYR, TRQNMYSR)

MJONLYYR Len : 1 RC-MARIJUANA ONLY - PAST YEAR USE  
0 = MJ not used past yr/Used MJ & othr drug past yr  
1 = Marijuana is only (illicit) drug in past year

(COCMON, HALLUCMON, HERMON, INHALMON, METHAMMON, MRJMON, PNRNMMON, SEDNMMON, STMNMMON, TRQNMMON)

MJONLYMON Len : 1 RC-MARIJUANA ONLY - PAST MONTH USE  
0 = MJ not used past mnth/Used MJ & othr drug past mo  
1 = Marijuana only (illicit) drug in past month

Due to potential underreporting of lifetime prescription drug use, users are cautioned against using the lifetime use of illicit drugs other than marijuana variable in analysis. This caution does not apply to lifetime use of any illicit drug variable given it is dominated by lifetime marijuana use.

(COCFLAG, HALLUCFLAG, HERFLAG, INHALFLAG, METHAMFLAG, PSYCHFLAG)

ILLEMFLAG Len : 1 RC-ILLICIT DRUG OTHER THAN MARIJUANA - EVER USED  
0 = Never used drug/used only marijuana  
1 = Ever used an Illicit drug except for marijuana

(COCYR, HALLUCYR, HERYR, INHALYR, METHAMYR, PSYCHYR)

ILLEMYR Len : 1 RC-ILLICIT DRUG OTHER THAN MARIJUANA - PAST YEAR  
0 = Never used drug/used only marijuana past year  
1 = Illicit drug except for marijuana used past year

(COCMON, HALLUCMON, HERMON, INHALMON, METHAMMON, PSYCHMON)

ILLEMMON Len : 1 RC-ILLICIT DRUG OTHER THAN MARIJUANA-PAST MONTH  
0 = Never used drug/used only marijuana past month  
1 = Illicit drug except for marijuana used past month

(IRCDUAGE)

CDUFLAG Len : 1 RC-CIGARETTES DAILY - EVER USED  
0 = Never Used/Never Used Daily (Otherwise)  
1 = Ever Used (IRCDUAGE=1-90)

RECODED DRUG USE

(*IRCIGFM*)  
CDIGMON

Len : 1 RC-PAST MONTH DAILY CIGARETTE USE  
0 = Did Not Use Daily in Past Mon (IRCIGFM=1-29,91,93)  
1 = Used Daily in the Past Month (IRCIGFM=30)

(*CDUFLAG, CIGMON*)  
CDCGMO

Len : 1 RC-EVER USED CIG DAILY AND PAST MONTH CIG USE  
0 = No (Otherwise)  
1 = Yes (CDUFLAG=1 and CIGMON=1)

(*CDUFLAG, CIGMON*)  
CDNOCGMO

Len : 1 RC-EVER USED CIG DAILY AND NO PAST MONTH CIG USE  
0 = No (Otherwise)  
1 = Yes (CDUFLAG=1 and CIGMON=0)

"Binge" Alcohol Use, BNGDRKMON, is defined as drinking five or more drinks on the same occasion for males or four or more drinks on the same occasion for females on at least one day in the past 30 days. For this variable, "occasion" means at the same time or within a couple hours of each other.

(*IRALCBNG30D*)  
BNGDRKMON

Len : 1 RC-BINGE ALCOHOL USE PAST 30 DAYS  
0 = Never/No "Binge" alc use (IRALCBNG30D = 0,91,93)  
1 = "Binge" alcohol use (IRALCBNG30D = 1-30)

Heavy Alcohol Use, HVYDRKMON, is defined as drinking five or more drinks on the same occasion for males or four or more drinks on the same occasion for females on each of 5 or more days in the past 30 days. For this variable, "occasion" means at the same time or within a couple hours of each other. All Heavy Alcohol Users are also "Binge" Alcohol Users.

(*IRALCBNG30D*)  
HVYDRKMON

Len : 1 RC-HEAVY ALCOHOL USE PAST 30 DAYS  
0 = Never/No heavy alc use (IRALCBNG30D = 0-4,91,93)  
1 = Heavy alcohol use (IRALCBNG30D = 5-30)

(*ALCFLAG, ILLFLAG, TOBFLAG*)  
ILTOBALCFG

Len : 1 RC-ILLICIT DRUG, TOBACCO PRD, OR ALCOHOL - EVER USED  
0 = No drug, tob, or alcohol lifetime use (Otherwise)  
1 = Drg, tob or alc lifetime use (ILLFLAG, TOBFLAG or ALCFLAG=1)

(*ALCYR, ILLYR, TOBYR*)  
ILTOBALCYR

1 = Yes (OTHAEROS=1,3)

RECODED DRUG USE

NOTE: The following 12 variables pertain to prescription pain reliever subtype use. These variables were revised starting with the 2021 NSDUH so that respondents with unknown past year use of the specific pain reliever subtype were coded as a system missing.

The following variable for any past year use of Hydrocodone Products, RXHYDCANY, was assigned a positive response if a respondent indicated any past year use of Vicodin (VICOANYR=1, 3, 5), Lortab (LTABANYR=1, 3, 5), Norco (NRCOANYR=1, 3, 5), Zohydro ER (ZOHYANYR=1, 3, 5), generic hydrocodone (HYCDANYR=1, 3, 5), or past year misuse of other pain relievers that contain hydrocodone (from PNOTNSP1, PNOTNSP2, PNOTNSP3, PNOTNSP4, or PNOTNSP5 in (434, 4033, 4036, 4044, 4097, 4105, 4125, 4143, 4144, 4501, 4502, 4503, 4504)). A negative response was assigned if a respondent was not a past year user of prescription pain relievers (PNRANYR=0) or if a respondent indicated no past year use of Vicodin (VICOANYR=2, 81, 91, 93, 95), Lortab (LTABANYR=2, 81, 91, 93, 95), Norco (NRCOANYR=2, 81, 91, 93, 95), Zohydro ER (ZOHYANYR=2, 81, 91, 93, 95), and generic hydrocodone (HYCDANYR=2, 81, 91, 93, 95).

(HYCDANYR, LTABANYR, NRCOANYR, PNRANYR, PNOTNSP1, PNOTNSP2, PNOTNSP3, PNOTNSP4, PNOTNSP5, VICOANYR, ZOHYANYR)

RXHYDCANY Len : 1 RC-HYDROCODONE PRODUCTS - ANY PAST YEAR USE  
. = Unknown (Otherwise)  
0 = No (See comment above)  
1 = Yes (See comment above)

(PNRANYR, ZOHYANYR)

RXZOHYANY Len : 1 RC-ZOXYDRO ER - ANY PAST YEAR USE  
. = Unknown (Otherwise)  
0 = No (ZOHYANYR=2,81,91,93,95 or PNRANYR=0)  
1 = Yes (ZOHYANYR=1,3,5)

The following variable for any past year use of Oxycodone Products, RXOXCOANY, was assigned a positive response if a respondent indicated any past year use of OxyContin (OXYCNANYR=1), Percocet (PRCTANYR=1, 3, 5), Percodan (PRDNANYR=1, 3, 5), Roxicodone (ROXIANYR=1, 3, 5), generic oxycodone (OXYDANYR=1, 3, 5), or past year misuse of other pain relievers that contain oxycodone (from PNOTNSP1, PNOTNSP2, PNOTNSP3, PNOTNSP4, or PNOTNSP5 in (406, 423, 431, 4046, 4047, 4052, 4065, 4067, 4068, 4072, 4117, 4505)). A negative response was assigned if a respondent was not a past year user of prescription pain relievers (PNRANYR=0) or if a respondent indicated no past year use of OxyContin (OXYCNANYR=0), Percocet (PRCTANYR=2, 81, 91, 93, 95), Percodan (PRDNANYR=2, 81, 91, 93, 95), Roxicodone (ROXIANYR=2, 81, 91, 93, 95), and generic oxycodone (OXYDANYR=2, 81, 91, 93, 95).

(OXYCNANYR, OXYDANYR, PNRANYR, PNOTNSP1, PNOTNSP2, PNOTNSP3, PNOTNSP4, PNOTNSP5, PRCTANYR, PRDNANYR, ROXIANYR)

RXOXCOANY Len : 1 RC-OXYCODONE PRODUCTS - ANY PAST YEAR USE  
. = Unknown (Otherwise)  
0 = No (See comment above)  
1 = Yes (See comment above)

The following variable for any past year use of Tramadol Products, RXTRAMANY, was assigned a positive response if a respondent indicated any past year use of Ultram (ULTMANYR=1, 3, 5), Ultram ER (ULERANYR=1, 3, 5), Ultracet (ULCTANYR=1, 3, 5), generic tramadol (TMDLANYR=1, 3, 5), generic extended-release tramadol (TMERANYR=1, 3, 5), or past year misuse of other pain relievers that contain tramadol (from PNOTNSP1, PNOTNSP2, PNOTNSP3, PNOTNSP4, or PNOTNSP5 in (496, 4043, 4083, 4133, 4134)). A negative response was assigned if a respondent was not a past year user of prescription pain relievers (PNRANYR=0) or if a respondent indicated no past year use of Ultram (ULTMANYR=2, 81, 91, 93, 95), Ultram ER (ULERANYR=2, 81, 91, 93, 95), Ultracet (ULCTANYR=2, 81, 91, 93, 95), generic tramadol (TMDLANYR=2, 81, 91, 93, 95), and generic extended-release tramadol (TMERANYR=2, 81, 91, 93, 95).

(PNRANYR, PNOTNSP1, PNOTNSP2, PNOTNSP3, PNOTNSP4, PNOTNSP5, TMDLANYR, TMERANYR, ULCTANYR, ULERANYR, ULTMANYR)

RXTRAMANY Len : 1 RC-TRAMADOL PRODUCTS - ANY PAST YEAR USE  
. = Unknown (Otherwise)  
0 = No (See comment above)  
1 = Yes (See comment above)

RECODED DRUG USE

The following variable for any past year use of Codeine Products, RXCODEANY, was assigned a positive response if a respondent indicated any past year use of Codeine (CODNANYR=1, 3, 5), Tylenol with Codeine 3 or 4 (TYLCANYR=1, 3, 5), or past year misuse of other pain relievers that contain codeine (from PNOTNSP1, PNOTNSP2, PNOTNSP3, PNOTNSP4, or PNOTNSP5 in (409, 410, 415, 444, 453, 455, 4093, 4101, 4127, 4167, 8293)). A negative response was assigned if a respondent was not a past year user of prescription pain relievers (PNRANYR=0) or if a respondent indicated no past year use of Codeine (CODNANYR=2, 81, 91, 93, 95) and Tylenol with Codeine 3 or 4 (TYLCANYR=2, 81, 91, 93, 95).

(CODNANYR, PNRANYR, PNOTNSP1, PNOTNSP2, PNOTNSP3, PNOTNSP4, PNOTNSP5, TYLCANYR)

RXCODEANY Len : 1 RC-CODEINE PRODUCTS - ANY PAST YEAR USE  
. = Unknown (Otherwise)  
0 = No (See comment above)  
1 = Yes (See comment above)

The following variable for any past year use of Morphine Products, RXMORPANY, was assigned a positive response if a respondent indicated any past year use of Avinza (AVNZANYR=1, 3, 5), Kadian (KADNANYR=1, 3, 5), MS Contin (MSCTANYR=1, 3, 5), generic morphine (MRPHANYR=1, 3, 5), generic extended-release morphine (MRERANYR=1, 3, 5), or past year misuse of other pain relievers that contain morphine (from PNOTNSP1, PNOTNSP2, PNOTNSP3, PNOTNSP4, or PNOTNSP5 in (417, 4037, 4061, 4080, 4110, 4132, 4153, 4507)). A negative response was assigned if a respondent was not a past year user of prescription pain relievers (PNRANYR=0) or if a respondent indicated no past year use of Avinza (AVNZANYR=2, 81, 91, 93, 95), Kadian (KADNANYR=2, 81, 91, 93, 95), MS Contin (MSCTANYR=2, 81, 91, 93, 95), generic morphine (MRPHANYR=2, 81, 91, 93, 95), and generic extended-release morphine (MRERANYR=2, 81, 91, 93, 95).

(AVNZANYR, KADNANYR, MRERANYR, MRPHANYR, MSCTANYR, PNRANYR, PNOTNSP1, PNOTNSP2, PNOTNSP3, PNOTNSP4, PNOTNSP5)

RXMORPANY Len : 1 RC-MORPHINE PRODUCTS - ANY PAST YEAR USE  
. = Unknown (Otherwise)  
0 = No (See comment above)  
1 = Yes (See comment above)

The following variable for any past year use of Buprenorphine Products, RXBUPRANY, was assigned a positive response if a respondent indicated any past year use of Suboxone (SBOXANYR=1, 3, 5), generic buprenorphine (BUPRANYR=1, 3, 5), buprenorphine plus naloxone (BUNLANYR=1, 3, 5), or past year misuse of other pain relievers that contain buprenorphine (from PNOTNSP1, PNOTNSP2, PNOTNSP3, PNOTNSP4, or PNOTNSP5 in (4022, 4073, 4109, 4119, 4148, 4150, 4163)). A negative response was assigned if a respondent was not a past year user of prescription pain relievers (PNRANYR=0) or if a respondent indicated no past year use of Suboxone (SBOXANYR=2, 81, 91, 93, 95), generic buprenorphine (BUPRANYR=2, 81, 91, 93, 95), and buprenorphine plus naloxone (BUNLANYR=2, 81, 91, 93, 95).

(BUNLANYR, BUPRANYR, PNRANYR, PNOTNSP1, PNOTNSP2, PNOTNSP3, PNOTNSP4, PNOTNSP5, SBOXANYR)

RXBUPRANY Len : 1 RC-BUPRENORPHINE PRODUCTS - ANY PAST YEAR USE  
. = Unknown (Otherwise)  
0 = No (See comment above)  
1 = Yes (See comment above)

The following variable for any past year use of Oxymorphone Products, RXOXYMANY, was assigned a positive response if a respondent indicated any past year use of Opana (OPANANYR=1, 3, 5), Opana ER (OPERANYR=1, 3, 5), generic oxymorphone (OXMPANYR=1, 3, 5), generic extended-release oxymorphone (OXERANYR=1, 3, 5), or past year misuse of other pain relievers that contain oxymorphone (from PNOTNSP1, PNOTNSP2, PNOTNSP3, PNOTNSP4, or PNOTNSP5 in (4120, 4140, 4510)). A negative response was assigned if a respondent was not a past year user of prescription pain relievers (PNRANYR=0) or if a respondent indicated no past year use of Opana (OPANANYR=2, 81, 91, 93, 95), Opana ER (OPERANYR=2, 81, 91, 93, 95), generic oxymorphone (OXMPANYR=2, 81, 91, 93, 95), and generic extended-release oxymorphone (OXERANYR=2, 81, 91, 93, 95).

(OPANANYR, OPERANYR, OXERANYR, OXMPANYR, PNRANYR, PNOTNSP1, PNOTNSP2, PNOTNSP3, PNOTNSP4, PNOTNSP5)

1 = Yes (PNROTANYR=1,3,5)

RECODED DRUG USE

NOTE: The following nine variables pertain to prescription tranquilizer subtype use. These variables were revised starting with the 2021 NSDUH so that respondents with unknown past year use of the specific tranquilizer subtype were coded as a system missing.

The following variable for any past year use of Benzodiazepine Tranquilizers, **RXBZOTANY**, was assigned a positive response if a respondent indicated any past year use of alprazolam products (Xanax (XNAXANYR=1, 3, 5), Xanax XR (XNXRANYR=1, 3, 5), generic alprazolam (APZMANYR=1, 3, 5), generic extended-release alprazolam (APXRANYR=1, 3, 5)), lorazepam products (Ativan (ATVNANYR=1, 3, 5), generic lorazepam (LRZMANYR=1, 3, 5)), clonazepam products (Klonopin (KLPNANYR=1, 3, 5), generic clonazepam (CLZMANYR=1, 3, 5)), diazepam products (Valium (VALMANYR=1, 3, 5), generic diazepam (DIZMANYR=1, 3, 5)), or past year misuse of other benzodiazepine tranquilizers (from TRQOTNSP1, TRQOTNSP2, TRQOTNSP3, TRQOTNSP4, or TRQOTNSP5 in (201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 219, 229, 237, 246, 266, 268, 276, 278, 296, 2004, 2016, 2022, 2025, 2026, 2030, 2031, 2032, 2033, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508)). A negative response was assigned if a respondent was not a past year user of prescription tranquilizers (TRQANYR=0), if a respondent was not a past year user of any benzodiazepines (IRBZOANYR=0), or if a respondent indicated no past year use of alprazolam products (Xanax (XNAXANYR=2, 81, 91, 93, 95), Xanax XR (XNXRANYR=2, 81, 91, 93, 95), generic alprazolam (APZMANYR=2, 81, 91, 93, 95), generic extended-release alprazolam (APXRANYR=2, 81, 91, 93, 95)), lorazepam products (Ativan (ATVNANYR=2, 81, 91, 93, 95), generic lorazepam (LRZMANYR=2, 81, 91, 93, 95)), clonazepam products (Klonopin (KLPNANYR=2, 81, 91, 93, 95), generic clonazepam (CLZMANYR=2, 81, 91, 93, 95)), diazepam products (Valium (VALMANYR=2, 81, 91, 93, 95) and generic diazepam (DIZMANYR=2, 81, 91, 93, 95)).

(APXRANYR, APZMANYR, ATVNANYR, CLZMANYR, DIZMANYR, IRBZOANYR, KLPNANYR, LRZMANYR, TRQANYR, TRQOTNSP1, TRQOTNSP2, TRQOTNSP3, TRQOTNSP4, TRQOTNSP5, VALMANYR, XNAXANYR, XNXRANYR)  
RXBZOTANY Len : 1 RC-BENZODIAZEPINE TRANQUILIZERS - ANY PAST YEAR USE  
 . = Unknown (Otherwise)  
 0 = No (See comment above)  
 1 = Yes (See comment above)

The following variable for any past year use of Alprazolam Products, **RXALPRANY**, was assigned a positive response if a respondent indicated any past year use of Xanax (XNAXANYR=1, 3, 5), Xanax XR (XNXRANYR=1, 3, 5), generic alprazolam (APZMANYR=1, 3, 5), generic extended-release alprazolam (APXRANYR=1, 3, 5), or past year misuse of other tranquilizers that contain alprazolam (from TRQOTNSP1, TRQOTNSP2, TRQOTNSP3, TRQOTNSP4, or TRQOTNSP5 in (209, 2016, 2501, 2502)). A negative response was assigned if a respondent was not a past year user of prescription tranquilizers (TRQANYR=0), if a respondent was not a past year user of any benzodiazepines (IRBZOANYR=0), or if a respondent indicated no past year use of Xanax (XNAXANYR=2, 81, 91, 93, 95), Xanax XR (XNXRANYR=2, 81, 91, 93, 95), generic alprazolam (APZMANYR=2, 81, 91, 93, 95), and generic extended-release alprazolam (APXRANYR=2, 81, 91, 93, 95).

(APXRANYR, APZMANYR, IRBZOANYR, TRQANYR, TRQOTNSP1, TRQOTNSP2, TRQOTNSP3, TRQOTNSP4, TRQOTNSP5, XNAXANYR, XNXRANYR)  
RXALPRANY Len : 1 RC-ALPRAZOLAM PRODUCTS - ANY PAST YEAR USE  
 . = Unknown (Otherwise)

RECODED DRUG USE

NOTE: The following nine variables pertain to prescription sedative subtype use. These variables were revised starting with the 2021 NSDUH so that respondents with unknown past year use of the specific sedative subtype were coded as a system missing.

The following variable for any past year use of Zolpidem Products, RXZOLPANY, was assigned a positive response if a respondent indicated any past year use of Ambien (AMBIANYR=1, 3, 5), Ambien CR (AMCRANYR=1, 3, 5), generic zolpidem (ZLPDANYR=1, 3, 5), extended-release generic zolpidem (ZLXRANYR=1, 3, 5), or past year misuse of other sedatives that contain zolpidem (from SEDOTNSP1, SEDOTNSP2, SEDOTNSP3, SEDOTNSP4, or SEDOTNSP5 in (174, 1013, 1031, 1501)). A negative response was assigned if a respondent was not a past year user of prescription sedatives (SEDANYR=0) or if a respondent indicated no past year use of Ambien (AMBIANYR=2, 81, 91, 93, 95), Ambien CR (AMCRANYR=2, 81, 91, 93, 95), generic zolpidem (ZLPDANYR=2, 81, 91, 93, 95), and extended-release generic zolpidem (ZLXRANYR =2, 81, 91, 93, 95).

(AMBIANYR, AMCRANYR, SEDANYR, SEDOTNSP1, SEDOTNSP2, SEDOTNSP3, SEDOTNSP4, SEDOTNSP5, ZLPDANYR, ZLXRANYR)  
RXZOLPANY Len : 1 RC-ZOLPIDEM PRODUCTS - ANY PAST YEAR USE  
. = Unknown (Otherwise)  
0 = No (See comment above)  
1 = Yes (See comment above)

The following variable for any past year use of Eszopiclone Products, RXESZOANY, was assigned a positive response if a respondent indicated any past year use of Lunesta or generic eszopiclone (LNESANYR=1, 3, 5), or past year misuse of other sedatives that contain eszopiclone (from SEDOTNSP1, SEDOTNSP2, SEDOTNSP3, SEDOTNSP4, or SEDOTNSP5 in (1011)). A negative response was assigned if a respondent was not a past year user of prescription sedatives (SEDANYR=0) or if a respondent indicated no past year use of Lunesta or generic eszopiclone (LNESANYR=2, 81, 91, 93, 95).

(LNESANYR, SEDANYR, SEDOTNSP1, SEDOTNSP2, SEDOTNSP3, SEDOTNSP4, SEDOTNSP5)  
RXESZOANY Len : 1 RC-ESZOPICLONE PRODUCTS - ANY PAST YEAR USE  
. = Unknown (Otherwise)  
0 = No (See comment above)  
1 = Yes (See comment above)

The following variable for any past year use of Zaleplon Products, RXZALEANY, was assigned a positive response if a respondent indicated any past year use of Sonata or generic zaleplon (SNZLANYYR=1, 3, 5), or past year misuse of other sedatives that contain zaleplon (from SEDOTNSP1, SEDOTNSP2, SEDOTNSP3, SEDOTNSP4, or SEDOTNSP5 in (189)). A negative response was assigned if a respondent was not a past year user of prescription sedatives (SEDANYR=0) or if a respondent indicated no past year use of Sonata or generic zaleplon (SNZLANYYR=2, 81, 91, 93, 95).

(SEDANYR, SEDOTNSP1, SEDOTNSP2, SEDOTNSP3, SEDOTNSP4, SEDOTNSP5, SNZLANYYR)  
RXZALEANY Len : 1 RC-ZALEPLON PRODUCTS - ANY PAST YEAR USE  
. = Unknown (Otherwise)  
0 = No (See comment above)

1 = Yes (See comment above)

RECODED DRUG USE

The following variable for the past year misuse of any other pain relievers, OTHRPNRMIS, was assigned a positive response if a respondent indicated past year misuse of any other pain relievers (PNROTMYR =1, 3, 5) and the respondent did not report their only misuse of any other pain relievers in their write-in responses as containing the following: hydrocodone products, oxycodone products, tramadol products, codeine products, morphine products, fentanyl products, buprenorphine products, oxymorphone products, meperidine products, hydromorphone products, methadone products, or over-the-counter products (At least one of these variables (PNROTNSP1, PNROTNSP2, PNROTNSP3, PNROTNSP4, or PNROTNSP5) has a valid value not equal to [hydrocodone products, oxycodone products, tramadol products, codeine products, morphine products, fentanyl products, buprenorphine products, oxymorphone products, meperidine products, hydromorphone products, methadone products values] 406, 407, 408, 409, 410, 415, 417, 418, 423, 431, 434, 444, 453, 455, 465, 496, 4022, 4033, 4036, 4037, 4043, 4044, 4046, 4047, 4052, 4061, 4065, 4067, 4068, 4072, 4073, 4080, 4083, 4093, 4097, 4101, 4105, 4109, 4110, 4117, 4119, 4120, 4125, 4127, 4132, 4133, 4134, 4140, 4143, 4144, 4148, 4150, 4153, 4163, 4501, 4502, 4503, 4504, 4505, 4507, 4508, 4509, 4510, 4512, 8293, [OTC products values] 122, 123, 126, 127, 128, 132, 171, 172, 176, 180, 181, 190, 194, 196, 333, 353, 354, 364, 425, 430, 435, 436, 450, 466, 468, 499, 814, 815, 829, 840, 841, 843, 848, 849, 883, 885, 1001, 1004, 1007, 1014, 1018, 1019, 1023, 1025, 1026, 1027, 1029, 1030, 1032, 3003, 3017, 3033, 3036, 3044, 3045, 3047, 3048, 3054, 3056, 3057, 3058, 3059, 3060, 3061, 3063, 3065, 3066, 3068, 3071, 3072, 3073, 3074, 3076, 3085, 3088, 3095, 3098, 3100, 3101, 3103, 3104, 3107, 3109, 3120, 3128, 3129, 3134, 3188, 3189, 3190, 4018, 4023, 4048, 4049, 4050, 4070, 4074, 4076, 4079, 4085, 4099, 4100, 4128, 4129, 4136, 4146, 4147, 4151, 4154, 4159, 5155, 6083, 8005, 8006, 8010, 8012, 8013, 8014, 8015, 8016, 8022, 8023, 8025, 8027, 8028, 8029, 8030, 8034, 8037, 8039, 8041, 8042, 8045, 8046, 8047, 8050, 8051, 8053, 8056, 8059, 8062, 8064, 8065, 8070, 8075, 8089, 8091, 8093, 8094, 8095, 8096, 8100, 8101, 8102, 8104, 8106, 8109, 8110, 8113, 8115, 8116, 8123, 8125, 8127, 8128, 8130, 8131, 8133, 8137, 8138, 8145, 8146, 8147, 8148, 8149, 8150, 8152, 8161, 8169, 8174, 8175, 8176, 8183, 8185, 8192, 8193, 8194, 8205, 8209, 8215, 8216, 8219, 8220, 8244, 8248, 8249, 8256, 8257, 8258, 8259, 8260, 8261, 8262, 8263, 8264, 8266, 8269, 8270, 8271, 8275, 8277, 8280, 8282, 8294, 8298, 8299, 8300, 8303, 8304, 8307, 8309, 8321, 8339, 8340, 8349, 8354, 8357, 8369, 8370, 8374, 8377, 8389, 8390, 8394, 8395, 8397, 8398, 8401, 8402, 8403, 8404, 8407, 8416, 8419, 8440, 8445, 8449, 8453, 8463, 8502, 8504, 8545, 8559). Codes for bad data (9985), don't know (9994), refused (9997) and blank (9998) are not considered valid values. OTHRPNRMIS was assigned a negative response if a respondent was not a past year misuser of prescription pain relievers (PNRMYR=0), if a respondent did not indicate past year misuse of any other pain relievers (PNROTMYR=2, 4, 81, 91, 93), or a respondent indicated their only misuse of any other pain relievers in their write-in responses as containing the following: hydrocodone products, oxycodone products, tramadol products, codeine products, morphine products, fentanyl products, buprenorphine products, oxymorphone products, meperidine products, hydromorphone products, methadone products, or over-the-counter products (All of these variables (PNROTNSP1, PNROTNSP2, PNROTNSP3, PNROTNSP4, or PNROTNSP5) equals [hydrocodone products, oxycodone products, tramadol products, codeine products, morphine products, fentanyl products, buprenorphine products, oxymorphone products, meperidine products, hydromorphone products, methadone products values] 406, 407, 408, 409, 410, 415, 417, 418, 423, 431, 434, 444, 453, 455, 465, 496, 4022, 4033, 4036, 4037, 4043, 4044, 4046, 4047, 4052, 4061, 4065, 4067, 4068, 4072, 4073, 4080, 4083, 4093, 4097, 4101, 4105, 4109, 4110, 4117, 4119, 4120, 4125, 4127, 4132, 4133, 4134, 4140, 4143, 4144, 4148, 4150, 4153, 4163, 4501, 4502, 4503, 4504, 4505, 4507, 4508, 4509, 4510, 4512, 8293, [OTC products values] 122, 123, 126, 127, 128, 132, 171, 172, 176, 180, 181, 190, 194, 196, 333, 353, 354, 364, 425, 430, 435, 436, 450, 466, 468, 499, 814, 815, 829, 840, 841, 843, 848, 849, 883, 885, 1001, 1004, 1007, 1014, 1018, 1019, 1023, 1025, 1026, 1027, 1029, 1030, 1032, 3003, 3017, 3033, 3036, 3044, 3045, 3047, 3048, 3054, 3056, 3057, 3058, 3059, 3060, 3061, 3063, 3065, 3066, 3068, 3071, 3072, 3073, 3074, 3076, 3085, 3088, 3095, 3098, 3100, 3101, 3103, 3104, 3107, 3109, 3120, 3128, 3129, 3134, 3188, 3189, 3190, 4018, 4023, 4048, 4049, 4050, 4070, 4074, 4076, 4079, 4085, 4099, 4100, 4128, 4129, 4136, 4146, 4147, 4151, 4154, 4159, 5155, 6083, 8005, 8006, 8010, 8012, 8013, 8014, 8015, 8016, 8022, 8023, 8025, 8027, 8028, 8029, 8030, 8034, 8037, 8039, 8041, 8042, 8045, 8046, 8047, 8050, 8051, 8053, 8056, 8059, 8062, 8064, 8065, 8070, 8075, 8089, 8091, 8093, 8094, 8095, 8096, 8100, 8101, 8102, 8104, 8106, 8109, 8110, 8113, 8115, 8116, 8123, 8125, 8127, 8128, 8130, 8131, 8133, 8137, 8138, 8145, 8146, 8147, 8148, 8149, 8150, 8152, 8161, 8169, 8174, 8175, 8176, 8183, 8185, 8192, 8193, 8194, 8205, 8209, 8215, 8216, 8219, 8220, 8244, 8248, 8249, 8256, 8257, 8258, 8259, 8260, 8261, 8262, 8263, 8264, 8266, 8269, 8270, 8271, 8275, 8277, 8280, 8282, 8294, 8298, 8299, 8300, 8303, 8304, 8307, 8309, 8321, 8339, 8340, 8349, 8354, 8357, 8369, 8370, 8374, 8377, 8389, 8390, 8394, 8395, 8397, 8398, 8401, 8402, 8403, 8404, 8407, 8416, 8419, 8440, 8445, 8449, 8453, 8463, 8502, 8504, 8545, 8559). If a respondent had a least one valid write-in value, the respondent would still be assigned a negative response even if the remaining write-in responses are 9998.

RECODED DRUG USE

NOTE: The following nine variables pertain to prescription tranquilizer subtype misuse. These variables were revised starting with the 2021 NSDUH so that respondents with unknown past year misuse of the specific tranquilizer subtype were coded as a system missing.

The following variable for past year misuse of Benzodiazepine Tranquilizers, RXBZOTMIS, was assigned a positive response if a respondent indicated past year misuse of alprazolam products (Xanax (XNAXNMYR=1, 3, 5), Xanax XR (XNXRNMYR=1, 3, 5), generic alprazolam (APZMNMYSR=1, 3, 5), generic extended-release alprazolam (APXRNMYSR=1, 3, 5)), lorazepam products (Ativan (ATVNNMYSR=1, 3, 5) or generic lorazepam (LRZMNMYSR=1, 3, 5)), clonazepam products (Klonopin (KLPNNMYSR=1, 3, 5), generic clonazepam (CLZMNMYSR=1, 3, 5)), or diazepam products (Valium (VALMNMYSR=1, 3, 5), generic diazepam (DIZMNMYSR=1, 3, 5)), or other benzodiazepine tranquilizers (from TRQOTNSP1, TRQOTNSP2, TRQOTNSP3, TRQOTNSP4, or TRQOTNSP5 in (201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 219, 229, 237, 246, 266, 268, 276, 278, 296, 2004, 2016, 2022, 2025, 2026, 2030, 2031, 2032, 2033, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508)). A negative response was assigned if a respondent was not a past year misuser of prescription tranquilizers (TRQNMYSR=0), if a respondent was not a past year misuser of any benzodiazepines (IRBZONMYSR=0), or if a respondent indicated no past year misuse of alprazolam products (Xanax (XNAXNMYR=2, 81, 91, 93, 95) and Xanax XR (XNXRNMYR=2, 81, 91, 93, 95), generic alprazolam (APZMNMYSR=2, 81, 91, 93, 95), generic extended-release alprazolam (APXRNMYSR=2, 81, 91, 93, 95)), lorazepam products (Ativan (ATVNNMYSR=2, 81, 91, 93, 95) and generic lorazepam (LRZMNMYSR=2, 81, 91, 93, 95)), clonazepam products (Klonopin (KLPNNMYSR=2, 81, 91, 93, 95) and generic clonazepam (CLZMNMYSR=2, 81, 91, 93, 95)), and diazepam products (Valium (VALMNMYSR=2, 81, 91, 93, 95) and generic diazepam (DIZMNMYSR=2, 81, 91, 93, 95)).

RECODED DRUG USE

The following variable for the past year misuse of any other tranquilizers, OTHRTRQMIS, was assigned a positive response if a respondent indicated past year misuse of any other tranquilizers (TRQOTNMYR =1, 3, 5) and the respondent did not report their only misuse of any other tranquilizers in their write-in responses as containing the following: benzodiazepine tranquilizers, muscle relaxants, or over-the-counter products (At least one of these variables (TRQOTNSP1, TRQOTNSP2, TRQOTNSP3, TRQOTNSP4, or TRQOTNSP5) has a valid value not equal to [benzodiazepine tranquilizers, muscle relaxants values] 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 219, 223, 229, 234, 237, 246, 266, 268, 276, 278, 288, 290, 296, 462, 2001, 2002, 2004, 2006, 2014, 2016, 2019, 2022, 2023, 2024, 2025, 2026, 2028, 2030, 2031, 2032, 2033, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, [OTC products values] 122, 123, 126, 127, 128, 132, 171, 172, 176, 180, 181, 190, 194, 196, 333, 353, 354, 364, 425, 430, 435, 436, 450, 466, 468, 499, 814, 815, 829, 840, 841, 843, 848, 849, 883, 885, 1001, 1004, 1007, 1014, 1018, 1019, 1023, 1025, 1026, 1027, 1029, 1030, 1032, 3003, 3017, 3033, 3036, 3044, 3045, 3047, 3048, 3054, 3056, 3057, 3058, 3059, 3060, 3061, 3063, 3065, 3066, 3068, 3071, 3072, 3073, 3074, 3076, 3085, 3088, 3095, 3098, 3100, 3101, 3103, 3104, 3107, 3109, 3120, 3128, 3129, 3134, 3188, 3189, 3190, 4018, 4023, 4048, 4049, 4050, 4070, 4074, 4076, 4079, 4085, 4099, 4100, 4128, 4129, 4136, 4146, 4147, 4151, 4154, 4159, 5155, 6083, 8005, 8006, 8010, 8012, 8013, 8014, 8015, 8016, 8022, 8023, 8025, 8027, 8028, 8029, 8030, 8034, 8037, 8039, 8041, 8042, 8045, 8046, 8047, 8050, 8051, 8053, 8056, 8059, 8062, 8064, 8065, 8070, 8075, 8089, 8091, 8093, 8094, 8095, 8096, 8100, 8101, 8102, 8104, 8106, 8109, 8110, 8113, 8115, 8116, 8123, 8125, 8127, 8128, 8130, 8131, 8133, 8137, 8138, 8145, 8146, 8147, 8148, 8149, 8150, 8152, 8161, 8169, 8174, 8175, 8176, 8183, 8185, 8192, 8193, 8194, 8205, 8209, 8215, 8216, 8219, 8220, 8244, 8248, 8249, 8256, 8257, 8258, 8259, 8260, 8261, 8262, 8263, 8264, 8266, 8269, 8270, 8271, 8275, 8277, 8280, 8282, 8294, 8298, 8299, 8300, 8303, 8304, 8307, 8309, 8321, 8339, 8340, 8349, 8354, 8357, 8369, 8370, 8374, 8377, 8389, 8390, 8394, 8395, 8397, 8398, 8401, 8402, 8403, 8404, 8407, 8416, 8419, 8440, 8445, 8449, 8453, 8463, 8502, 8504, 8545, 8559). Codes for bad data (9985), don't know (9994), refused (9997) and blank (9998) are not considered valid values. OTHRTRQMIS was assigned a negative response if a respondent was not a past year misuser of prescription tranquilizers (TRQNMYR=0), if a respondent did not indicate past year misuse of any other tranquilizers (TRQOTNMYR=2, 4, 81, 91, 93), or a respondent indicated their only misuse of any other pain relievers in their write-in responses as containing the following: benzodiazepine tranquilizers, muscle relaxants, or over-the-counter products (All of these variables (TRQOTNSP1, TRQOTNSP2, TRQOTNSP3, TRQOTNSP4, or TRQOTNSP5) equals [benzodiazepine tranquilizers, muscle relaxants values] 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 219, 223, 229, 234, 237, 246, 266, 268, 276, 278, 288, 290, 296, 462, 2001, 2002, 2004, 2006, 2014, 2016, 2019, 2022, 2023, 2024, 2025, 2026, 2028, 2030, 2031, 2032, 2033, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, [OTC products values] 122, 123, 126, 127, 128, 132, 171, 172, 176, 180, 181, 190, 194, 196, 333, 353, 354, 364, 425, 430, 435, 436, 450, 466, 468, 499, 814, 815, 829, 840, 841, 843, 848, 849, 883, 885, 1001, 1004, 1007, 1014, 1018, 1019, 1023, 1025, 1026, 1027, 1029, 1030, 1032, 3003, 3017, 3033, 3036, 3044, 3045, 3047, 3048, 3054, 3056, 3057, 3058, 3059, 3060, 3061, 3063, 3065, 3066, 3068, 3071, 3072, 3073, 3074, 3076, 3085, 3088, 3095, 3098, 3100, 3101, 3103, 3104, 3107, 3109, 3120, 3128, 3129, 3134, 3188, 3189, 3190, 4018, 4023, 4048, 4049, 4050, 4070, 4074, 4076, 4079, 4085, 4099, 4100, 4128, 4129, 4136, 4146, 4147, 4151, 4154, 4159, 5155, 6083, 8005, 8006, 8010, 8012, 8013, 8014, 8015, 8016, 8022, 8023, 8025, 8027, 8028, 8029, 8030, 8034, 8037, 8039, 8041, 8042, 8045, 8046, 8047, 8050, 8051, 8053, 8056, 8059, 8062, 8064, 8065, 8070, 8075, 8089, 8091, 8093, 8094, 8095, 8096, 8100, 8101, 8102, 8104, 8106, 8109, 8110, 8113, 8115, 8116, 8123, 8125, 8127, 8128, 8130, 8131, 8133, 8137, 8138, 8145, 8146, 8147, 8148, 8149, 8150, 8152, 8161, 8169, 8174, 8175, 8176, 8183, 8185, 8192, 8193, 8194, 8205, 8209, 8215, 8216, 8219, 8220, 8244, 8248, 8249, 8256, 8257, 8258, 8259, 8260, 8261, 8262, 8263, 8264, 8266, 8269, 8270, 8271, 8275, 8277, 8280, 8282, 8294, 8298, 8299, 8300, 8303, 8304, 8307, 8309, 8321, 8339, 8340, 8349, 8354, 8357, 8369, 8370, 8374, 8377, 8389, 8390, 8394, 8395, 8397, 8398, 8401, 8402, 8403, 8404, 8407, 8416, 8419, 8440, 8445, 8449, 8453, 8463, 8502, 8504, 8545, 8559). If a respondent had a least one valid write-in value, the respondent would still be assigned a negative response even if the remaining write-in responses are 9998.

RECODED DRUG USE

NOTE: The following six variables pertain to prescription stimulant subtype misuse. These variables were revised starting with the 2021 NSDUH so that respondents with unknown past year misuse of the specific stimulant subtype were coded as a system missing.

The following variable for past year misuse of Amphetamine or Methylphenidate Products, RXAMMEMIS, was assigned a positive response if a respondent indicated past year misuse of Adderall (ADRLNMYR=1, 3, 5), Adderall XR (ADXRNMYR=1, 3, 5), Dexedrine (DEXDNMYR=1, 3, 5), Vyvanse (VYVNNMYR=1, 3, 5), generic dextroamphetamine (DXAMNMYR=1, 3, 5), generic amphetamine-dextroamphetamine combinations (MADXNMYR=1, 3, 5), generic extended-release amphetamine-dextroamphetamine combinations (MAXRNMYR=1, 3, 5), Ritalin (RTLNNMYR=1, 3, 5), Ritalin LA (RLANMYR=1, 3, 5), Concerta (CNCTNMYR=1, 3, 5), Daytrana (DYTRNMYR=1, 3, 5), Metadate CD (MTCDNMYR=1, 3, 5), Metadate ER (MTERNMYR=1, 3, 5), Focalin (FOCANMYR=1, 3, 5), Focalin XR (FOXRNMYR=1, 3, 5), generic methylphenidate (MPHDNMYR=1, 3, 5), generic extended-release methylphenidate (MPXRNMYR=1, 3, 5), generic dexmethylphenidate (DMPDNMYR=1, 3, 5), generic extended-release dexmethylphenidate (DMERNMYR=1, 3, 5), or other amphetamine that are prescribed for attention-deficit/hyperactivity disorder (ADHD) or other stimulants that contain methylphenidate (from STMOTNSP1, STMOTNSP2, STMOTNSP3, STMOTNSP4, or STMOTNSP5 in (301, 306, 318, 320, 3023, 3069, 3077, 3086, 3092, 3094, 3102, 3111, 3112, 3114, 3124, 3135, 3141, 3501, 3502, 3503)). A negative response was assigned if a respondent was not a past year misuser of prescription stimulants (STMNMYR=0) or if a respondent indicated no past year misuse of Adderall (ADRLNMYR=2, 81, 91, 93, 95), Adderall XR (ADXRNMYR=2, 81, 91, 93, 95), Dexedrine (DEXDNMYR=2, 81, 91, 93, 95), Vyvanse (VYVNNMYR=2, 81, 91, 93, 95), generic dextroamphetamine (DXAMNMYR=2, 81, 91, 93, 95), generic amphetamine-dextroamphetamine combinations (MADXNMYR=2, 81, 91, 93, 95), generic extended-release amphetamine-dextroamphetamine combinations (MAXRNMYR=2, 81, 91, 93, 95), Ritalin (RTLNNMYR=2, 81, 91, 93, 95), Ritalin LA (RLANMYR=2, 81, 91, 93, 95), Concerta (CNCTNMYR=2, 81, 91, 93, 95), Daytrana (DYTRNMYR=2, 81, 91, 93, 95), Metadate CD (MTCDNMYR=2, 81, 91, 93, 95), Metadate ER (MTERNMYR=2, 81, 91, 93, 95), Focalin (FOCANMYR=2, 81, 91, 93, 95), Focalin XR (FOXRNMYR=2, 81, 91, 93, 95), generic methylphenidate (MPHDNMYR=2, 81, 91, 93, 95), generic extended-release methylphenidate (MPXRNMYR=2, 81, 91, 93, 95), generic dexmethylphenidate (DMPDNMYR=2, 81, 91, 93, 95), and generic extended-release dexmethylphenidate (DMERNMYR=2, 81, 91, 93, 95). Amphetamine and methylphenidate products are primarily prescribed for the treatment of attention-deficit/hyperactivity disorder (ADHD). Vyvanse® is included with amphetamine products because its active ingredient (lisdexamfetamine) is metabolized to dextroamphetamine.

(ADRLNMYR, ADXRNMYR, CNCTNMYR, DEXDNMYR, DMERNMYR, DMPDNMYR, DXAMNMYR, DYTRNMYR, FOCANMYR, FOXRNMYR, MADXNMYR, MAXRNMYR, MPHDNMYR, MPXRNMYR, MTCDNMYR, MTERNMYR, RLANMYR, RTLNNMYR, STMNMYR, STMOTNSP1, STMOTNSP2, STMOTNSP3, STMOTNSP4, STMOTNSP5, VYVNNMYR)

RECODED DRUG USE

The following variable for the past year misuse of any other stimulants, OTHRSTMMIS, was assigned a positive response if a respondent indicated past year misuse of any other stimulants (STMOTNMYR=1, 3, 5) and the respondent did not report their only misuse of any other stimulants in their write-in responses as containing the following: amphetamine or methylphenidate products, anorectic (weight-loss) stimulants, modafinil products, or over-the-counter products (At least one of these variables (STMOTNSP1, STMOTNSP2, STMOTNSP3, STMOTNSP4, or STMOTNSP5) has a valid value not equal to [amphetamine or methylphenidate products, anorectic (weight-loss) stimulants, modafinil products values] 301, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 320, 323, 336, 349, 366, 383, 3015, 3023, 3038, 3069, 3077, 3086, 3090, 3092, 3094, 3099, 3102, 3110, 3111, 3112, 3114, 3122, 3124, 3135, 3141, 3501, 3502, 3503, 3504, 3505, 3506, 3507, 3508, [OTC products values] 122, 123, 126, 127, 128, 132, 171, 172, 176, 180, 181, 190, 194, 196, 333, 353, 354, 364, 425, 430, 435, 436, 450, 466, 468, 499, 814, 815, 829, 840, 841, 843, 848, 849, 883, 885, 1001, 1004, 1007, 1014, 1018, 1019, 1023, 1025, 1026, 1027, 1029, 1030, 1032, 3003, 3017, 3033, 3036, 3044, 3045, 3047, 3048, 3054, 3056, 3057, 3058, 3059, 3060, 3061, 3063, 3065, 3066, 3068, 3071, 3072, 3073, 3074, 3076, 3085, 3088, 3095, 3098, 3100, 3101, 3103, 3104, 3107, 3109, 3120, 3128, 3129, 3134, 3188, 3189, 3190, 4018, 4023, 4048, 4049, 4050, 4070, 4074, 4076, 4079, 4085, 4099, 4100, 4128, 4129, 4136, 4146, 4147, 4151, 4154, 4159, 5155, 6083, 8005, 8006, 8010, 8012, 8013, 8014, 8015, 8016, 8022, 8023, 8025, 8027, 8028, 8029, 8030, 8034, 8037, 8039, 8041, 8042, 8045, 8046, 8047, 8050, 8051, 8053, 8056, 8059, 8062, 8064, 8065, 8070, 8075, 8089, 8091, 8093, 8094, 8095, 8096, 8100, 8101, 8102, 8104, 8106, 8109, 8110, 8113, 8115, 8116, 8123, 8125, 8127, 8128, 8130, 8131, 8133, 8137, 8138, 8145, 8146, 8147, 8148, 8149, 8150, 8152, 8161, 8169, 8174, 8175, 8176, 8183, 8185, 8192, 8193, 8194, 8205, 8209, 8215, 8216, 8219, 8220, 8244, 8248, 8249, 8256, 8257, 8258, 8259, 8260, 8261, 8262, 8263, 8264, 8266, 8269, 8270, 8271, 8275, 8277, 8280, 8282, 8294, 8298, 8299, 8300, 8303, 8304, 8307, 8309, 8321, 8339, 8340, 8349, 8354, 8357, 8369, 8370, 8374, 8377, 8389, 8390, 8394, 8395, 8397, 8398, 8401, 8402, 8403, 8404, 8407, 8416, 8419, 8440, 8445, 8449, 8453, 8463, 8502, 8504, 8545, 8559). Codes for bad data (9985), don't know (9994), refused (9997) and blank (9998) are not considered valid values. OTHRSTMMIS was assigned a negative response if a respondent was not a past year misuser of prescription stimulants (STMNMYR=0), if a respondent did not indicate past year misuse of any other stimulants (STMOTNMYR=2, 4, 81, 91, 93), or a respondent indicated their only misuse of any other pain relievers in their write-in responses as containing the following: amphetamine or methylphenidate products, anorectic (weight-loss) stimulants, modafinil products, or over-the-counter products (All of these variables (STMOTNSP1, STMOTNSP2, STMOTNSP3, STMOTNSP4, or STMOTNSP5) equals [amphetamine or methylphenidate products, anorectic (weight-loss) stimulants, modafinil products values] 301, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 320, 323, 336, 349, 366, 383, 3015, 3023, 3038, 3069, 3077, 3086, 3090, 3092, 3094, 3099, 3102, 3110, 3111, 3112, 3114, 3122, 3124, 3135, 3141, 3501, 3502, 3503, 3504, 3505, 3506, 3507, 3508, [OTC products values] 122, 123, 126, 127, 128, 132, 171, 172, 176, 180, 181, 190, 194, 196, 333, 353, 354, 364, 425, 430, 435, 436, 450, 466, 468, 499, 814, 815, 829, 840, 841, 843, 848, 849, 883, 885, 1001, 1004, 1007, 1014, 1018, 1019, 1023, 1025, 1026, 1027, 1029, 1030, 1032, 3003, 3017, 3033, 3036, 3044, 3045, 3047, 3048, 3054, 3056, 3057, 3058, 3059, 3060, 3061, 3063, 3065, 3066, 3068, 3071, 3072, 3073, 3074, 3076, 3085, 3088, 3095, 3098, 3100, 3101, 3103, 3104, 3107, 3109, 3120, 3128, 3129, 3134, 3188, 3189, 3190, 4018, 4023, 4048, 4049, 4050, 4070, 4074, 4076, 4079, 4085, 4099, 4100, 4128, 4129, 4136, 4146, 4147, 4151, 4154, 4159, 5155, 6083, 8005, 8006, 8010, 8012, 8013, 8014, 8015, 8016, 8022, 8023, 8025, 8027, 8028, 8029, 8030, 8034, 8037, 8039, 8041, 8042, 8045, 8046, 8047, 8050, 8051, 8053, 8056, 8059, 8062, 8064, 8065, 8070, 8075, 8089, 8091, 8093, 8094, 8095, 8096, 8100, 8101, 8102, 8104, 8106, 8109, 8110, 8113, 8115, 8116, 8123, 8125, 8127, 8128, 8130, 8131, 8133, 8137, 8138, 8145, 8146, 8147, 8148, 8149, 8150, 8152, 8161, 8169, 8174, 8175, 8176, 8183, 8185, 8192, 8193, 8194, 8205, 8209, 8215, 8216, 8219, 8220, 8244, 8248, 8249, 8256, 8257, 8258, 8259, 8260, 8261, 8262, 8263, 8264, 8266, 8269, 8270, 8271, 8275, 8277, 8280, 8282, 8294, 8298, 8299, 8300, 8303, 8304, 8307, 8309, 8321, 8339, 8340, 8349, 8354, 8357, 8369, 8370, 8374, 8377, 8389, 8390, 8394, 8395, 8397, 8398, 8401, 8402, 8403, 8404, 8407, 8416, 8419, 8440, 8445, 8449, 8453, 8463, 8502, 8504, 8545, 8559). If a respondent had a least one valid write-in value, the respondent would still be assigned a negative response even if the remaining write-in responses are 9998.

NOTE: The following nine variables pertain to prescription sedative subtype misuse. These variables were revised starting with the 2021 NSDUH so that respondents with unknown past year misuse of the specific sedative subtype were coded as a system missing.

The following variable for past year misuse of Zolpidem Products, RXZOLPMIS, was assigned a positive response if a respondent indicated past year misuse of Ambien (AMBINMYR=1, 3, 5), Ambien CR (AMCRNMYR=1, 3, 5), generic zolpidem (ZLPDNMYR=1, 3, 5), extended-release generic zolpidem (ZLXRNMYR=1, 3, 5), or other sedatives that contain zolpidem (from SEDOTNSP1, SEDOTNSP2, SEDOTNSP3, SEDOTNSP4, or SEDOTNSP5 in (174, 1013, 1031, 1501)). A negative response was assigned if a respondent was not a past year misuser of prescription sedatives (SEDNMYR=0) or if a respondent indicated no past year misuse of Ambien (AMBINMYR=2, 81, 91, 93, 95), Ambien CR (AMCRNMYR=2, 81, 91, 93, 95), generic zolpidem (ZLPDNMYR=2, 81, 91, 93, 95), and extended-release generic zolpidem (ZLXRNMYR =2, 81, 91, 93, 95).

RECODED DRUG USE

The following variable for the past year misuse of any other sedatives, OTHRSEDMIS, was assigned a positive response if a respondent indicated past year misuse of any other sedatives (SEDOTNMYR=1, 3, 5) and the respondent did not report their only misuse of any other sedatives in their write-in responses as containing the following: zolpidem products, eszopiclone products, zaleplon products, benzodiazepine sedatives, barbiturates, or over-the-counter products (At least one of these variables (SEDOTNSP1, SEDOTNSP2, SEDOTNSP3, SEDOTNSP4, or SEDOTNSP5) has a valid value not equal to [zolpidem products, eszopiclone products, zaleplon products, benzodiazepine sedatives, barbiturates values] 101, 102, 103, 104, 108, 109, 110, 111, 112, 113, 114, 115, 118, 119, 152, 153, 154, 156, 157, 174, 186, 188, 189, 195, 1003, 1011, 1012, 1013, 1031, 1501, 1502, 1503, 1504, [OTC products values] 122, 123, 126, 127, 128, 132, 171, 172, 176, 180, 181, 190, 194, 196, 333, 353, 354, 364, 425, 430, 435, 436, 450, 466, 468, 499, 814, 815, 829, 840, 841, 843, 848, 849, 883, 885, 1001, 1004, 1007, 1014, 1018, 1019, 1023, 1025, 1026, 1027, 1029, 1030, 1032, 3003, 3017, 3033, 3036, 3044, 3045, 3047, 3048, 3054, 3056, 3057, 3058, 3059, 3060, 3061, 3063, 3065, 3066, 3068, 3071, 3072, 3073, 3074, 3076, 3085, 3088, 3095, 3098, 3100, 3101, 3103, 3104, 3107, 3109, 3120, 3128, 3129, 3134, 3188, 3189, 3190, 4018, 4023, 4048, 4049, 4050, 4070, 4074, 4076, 4079, 4085, 4099, 4100, 4128, 4129, 4136, 4146, 4147, 4151, 4154, 4159, 5155, 6083, 8005, 8006, 8010, 8012, 8013, 8014, 8015, 8016, 8022, 8023, 8025, 8027, 8028, 8029, 8030, 8034, 8037, 8039, 8041, 8042, 8045, 8046, 8047, 8050, 8051, 8053, 8056, 8059, 8062, 8064, 8065, 8070, 8075, 8089, 8091, 8093, 8094, 8095, 8096, 8100, 8101, 8102, 8104, 8106, 8109, 8110, 8113, 8115, 8116, 8123, 8125, 8127, 8128, 8130, 8131, 8133, 8137, 8138, 8145, 8146, 8147, 8148, 8149, 8150, 8152, 8161, 8169, 8174, 8175, 8176, 8183, 8185, 8192, 8193, 8194, 8205, 8209, 8215, 8216, 8219, 8220, 8244, 8248, 8249, 8256, 8257, 8258, 8259, 8260, 8261, 8262, 8263, 8264, 8266, 8269, 8270, 8271, 8275, 8277, 8280, 8282, 8294, 8298, 8299, 8300, 8303, 8304, 8307, 8309, 8321, 8339, 8340, 8349, 8354, 8357, 8369, 8370, 8374, 8377, 8389, 8390, 8394, 8395, 8397, 8398, 8401, 8402, 8403, 8404, 8407, 8416, 8419, 8440, 8445, 8449, 8453, 8463, 8502, 8504, 8545, 8559). Codes for bad data (9985), don't know (9994), refused (9997) and blank (9998) are not considered valid values. OTHRSEDMIS was assigned a negative response if a respondent was not a past year misuser of prescription sedatives (SEDNMYR=0), if a respondent did not indicate past year misuse of any other sedatives (SEDOTNMYR=2, 4, 81, 91, 93), or a respondent indicated their only misuse of any other sedatives in their write-in responses as containing the following: zolpidem products, eszopiclone products, zaleplon products, benzodiazepine sedatives, barbiturates, or over-the-counter products (All of these variables (SEDOTNSP1, SEDOTNSP2, SEDOTNSP3, SEDOTNSP4, or SEDOTNSP5) equals [zolpidem products, eszopiclone products, zaleplon products, benzodiazepine sedatives, barbiturates values] 101, 102, 103, 104, 108, 109, 110, 111, 112, 113, 114, 115, 118, 119, 152, 153, 154, 156, 157, 174, 186, 188, 189, 195, 1003, 1011, 1012, 1013, 1031, 1501, 1502, 1503, 1504, [OTC products values] 122, 123, 126, 127, 128, 132, 171, 172, 176, 180, 181, 190, 194, 196, 333, 353, 354, 364, 425, 430, 435, 436, 450, 466, 468, 499, 814, 815, 829, 840, 841, 843, 848, 849, 883, 885, 1001, 1004, 1007, 1014, 1018, 1019, 1023, 1025, 1026, 1027, 1029, 1030, 1032, 3003, 3017, 3033, 3036, 3044, 3045, 3047, 3048, 3054, 3056, 3057, 3058, 3059, 3060, 3061, 3063, 3065, 3066, 3068, 3071, 3072, 3073, 3074, 3076, 3085, 3088, 3095, 3098, 3100, 3101, 3103, 3104, 3107, 3109, 3120, 3128, 3129, 3134, 3188, 3189, 3190, 4018, 4023, 4048, 4049, 4050, 4070, 4074, 4076, 4079, 4085, 4099, 4100, 4128, 4129, 4136, 4146, 4147, 4151, 4154, 4159, 5155, 6083, 8005, 8006, 8010, 8012, 8013, 8014, 8015, 8016, 8022, 8023, 8025, 8027, 8028, 8029, 8030, 8034, 8037, 8039, 8041, 8042, 8045, 8046, 8047, 8050, 8051, 8053, 8056, 8059, 8062, 8064, 8065, 8070, 8075, 8089, 8091, 8093, 8094, 8095, 8096, 8100, 8101, 8102, 8104, 8106, 8109, 8110, 8113, 8115, 8116, 8123, 8125, 8127, 8128, 8130, 8131, 8133, 8137, 8138, 8145, 8146, 8147, 8148, 8149, 8150, 8152, 8161, 8169, 8174, 8175, 8176, 8183, 8185, 8192, 8193, 8194, 8205, 8209, 8215, 8216, 8219, 8220, 8244, 8248, 8249, 8256, 8257, 8258, 8259, 8260, 8261, 8262, 8263, 8264, 8266, 8269, 8270, 8271, 8275, 8277, 8280, 8282, 8294, 8298, 8299, 8300, 8303, 8304, 8307, 8309, 8321, 8339, 8340, 8349, 8354, 8357, 8369, 8370, 8374, 8377, 8389, 8390, 8394, 8395, 8397, 8398, 8401, 8402, 8403, 8404, 8407, 8416, 8419, 8440, 8445, 8449, 8453, 8463, 8502, 8504, 8545, 8559). If a respondent had a least one valid write-in value, the respondent would still be assigned a negative response even if the remaining write-in responses are 9998.

RECODED DRUG USE

The following variable for past year misuse of Miscellaneous Benzodiazepines, RXBZOMMIS, was revised starting with the 2021 NSDUH so that respondents with unknown past year misuse of miscellaneous benzodiazepines were coded as a system missing. A positive response was assigned if a respondent indicated past year misuse of Benzodiazepine Tranquilizers that were specified as other Sedatives (from SEDOTNSP1, SEDOTNSP2, SEDOTNSP3, SEDOTNSP4, or SEDOTNSP5 in (201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 219, 229, 237, 246, 266, 268, 276, 278, 296, 2004, 2016, 2022, 2025, 2026, 2030, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508)), or past year misuse of Benzodiazepine Sedatives that were specified as other Tranquilizers (from TRQOTNSP1, TRQOTNSP2, TRQOTNSP3, TRQOTNSP4, or TRQOTNSP5 in (111, 112, 113, 188, 1009, 1016, 1502, 1503, 1504)). A negative response was assigned if any of the following conditions was met.

- 1. Respondent was not a past month misuser of tranquilizers (TRQNMYSR=0) and sedatives (SEDNMYR=0).
2. Respondent was not a past year misuser of any benzodiazepines (IRBZONMYR=0).
3. Respondent did not indicate past year misuse of any other sedatives (SEDOTNMYR=2, 4, 81, 91, 93) and did not indicate past year misuse of any other tranquilizers (TRQOTNMYR=2, 4, 81, 91, 93).
4. Respondent did not indicate past year misuse of any other sedatives (SEDOTNMYR=2, 4, 81, 91, 93), indicated past year misuse of any other tranquilizer (TRQOTNMYR=1, 3, 5), and their write-in responses specified drugs other than Benzodiazepine sedatives (All of these variables (TRQOTNSP1, TRQOTNSP2, TRQOTNSP3, TRQOTNSP4, or TRQOTNSP5) have a valid value not equal to (111, 112, 113, 188, 1009, 1016, 1502, 1503, 1504)).
5. Respondent did not indicate past year misuse of any other tranquilizers (TRQOTNMYR=2, 4, 81, 91, 93), indicated past year misuse of any other sedatives (SEDOTNMYR=1, 3, 5), and their write-in responses specified drugs other than Benzodiazepine tranquilizers (All of these variables (SEDOTNSP1, SEDOTNSP2, SEDOTNSP3, SEDOTNSP4, or SEDOTNSP5) have a valid value not equal to (201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 219, 229, 237, 246, 266, 268, 276, 278, 296, 2004, 2016, 2022, 2025, 2026, 2030, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508)).
6. Respondent indicated past year misuse of any other sedatives (SEDOTNMYR=1, 3, 5), and their write-in responses specified drugs other than Benzodiazepine tranquilizers (All of these variables (SEDOTNSP1, SEDOTNSP2, SEDOTNSP3, SEDOTNSP4, or SEDOTNSP5) have a valid value not equal to (201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 219, 229, 237, 246, 266, 268, 276, 278, 296, 2004, 2016, 2022, 2025, 2026, 2030, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508)) and indicated past year misuse of any other tranquilizer (TRQOTNMYR=1, 3, 5), and their write-in responses specified drugs other than Benzodiazepine sedatives (All of these variables (TRQOTNSP1, TRQOTNSP2, TRQOTNSP3, TRQOTNSP4, or TRQOTNSP5) have a valid value not equal to (111, 112, 113, 188, 1009, 1016, 1502, 1503, 1504)).

This coding does not prevent the occurrence of 'double counting' if a respondent enters the same drug in both Tranquilizer and Sedative sections. For example, if respondents report the misuse of a benzodiazepine sedative in the sedatives module but also reported the misuse of that same benzodiazepine sedative as another tranquilizer they misused, they would be counted as a benzodiazepine sedative misuser as well as a misuser of miscellaneous benzodiazepines.

10.5 = 6 to 15 cigarettes (CIG30AV=4)
20.5 = 16 to 25 cigarettes (CIG30AV=5)
30.5 = 26 to 35 cigarettes (CIG30AV=6)
50 = More than 35 cigarettes (CIG30AV=7)

The following variable, CIGAVGM, was defined as the product of the number of days a user smoked cigarettes in the past month (IRCIGFM) and the average number of cigarettes smoked per day on the days cigarettes were smoked in the past month (CIGAVGD).

(CIGAVGD, IRCIGFM)
CIGAVGM Len : 6 RC-NUMBER OF CIGARETTES SMOKED PER USER IN PAST MONTH
RANGE = 0.5 - 1500
.= Not Used/Unknown (CIGAVGD=., or IRCIGFM=91,93)

The following variable, ALCNUMDKPM, was defined as the product of the number of days a user consumed alcohol in the past month (IRALCFM) and the average number of drinks consumed per day on the days alcohol was used in the past month (ALCUS30D). A value of missing was assigned whenever a respondent said that they had not used alcohol in the past month (IRALCFM=91, 93 or ALCUS30D=991, 993) or the average number of drinks consumed per day on the days alcohol was used in the past month was unknown (ALCUS30D=985, 994, 997, 998) or logically assigned to 5 or more (ALCUS30D=975).

(ALCUS30D, IRALCFM)
ALCNUMDKPM Len : 4 RC-NUMBER OF ALC BEVS DRANK PER USER IN PAST MONTH
RANGE = 1 - 2700
.= Not Used/Unknown (See comment above)

NOTE: This section includes the past year recent initiate recodes for the following substances: cigarettes (CIG), daily cigarette use (CCD), cigars (CGR), smokeless tobacco (SMKLSS), nicotine vaping (NICVAP), alcohol (ALC), marijuana (MJ), cocaine (COC), crack (CRK), heroin (HER), haluucinogens (HALLUC), LSD (LSD), PCP (PCP), ecstasy (ECSTMO), inhalants (INHAL), and methamphetamine (METHAM). XXX in the variable names below refer to the substance abbreviation in parenthesis.

Respondents who reported no use of a particular substance in their lifetime (IRXXXYFU=9999) or reported their initial use was during the time period 12 months prior to the interview date (as determined by the imputation revised month [IRXXMFM], day [IRXXDFU], and year [IRXXYFU] of first use and date of the interview) and, excluding daily cigarette use, reported past year use (XXXYR=1) were identified as members of the At-Risk population and classified as eligible initiates, ELIGXXX2=1 (or ELIGXXX for new variables). A negative response was assigned to all other respondents, ELIGXXX2=2 (or ELIGXXX for new variables), indicating that they are lifetime users whose initiation of use was before the 12 month period prior to the interview.

Specific details about the recoded variables described above can be found in the Initiation Documentation Appendix.

RECODED DRUG USE

NOTE: This section includes the past year recent initiate recodes for the following substances: cigarettes (CIG), daily cigarette use (CCD), cigars (CGR), smokeless tobacco (SMKLSS), nicotine vaping (NICVAP), alcohol (ALC), marijuana (MJ), cocaine (COC), crack (CRK), heroin (HER), hallucinogens (HALLUC), LSD (LSD), PCP (PCP), ecstasy (ECSTMO), inhalants (INHAL), and methamphetamine (METHAM). XXX in the variable names below refer to the substance abbreviation in parenthesis.

Respondents who reported initiation of a particular substance in the time period 12 months prior to the interview date (as determined by the imputation revised month [IRXXXMFU], day [IRXXXDFU] and year [IRXXXFYU] of first use and date of the interview) and, excluding daily cigarette use, reported past year use (XXXYR=1) were classified as recent initiates, RECCXX2=1 (or RECCXX for new variable names). A negative response was assigned to all other respondents, RECCXX2=0 (RECCXX for new variable names), indicating that they never used or are lifetime users whose initiation of use was before the 12 month period prior to the interview.

The recent initiate variables for the four prescription drug substances (pain relievers, tranquilizers, stimulants, and sedatives) are recoded directly from the imputation revised initiation variable IRXXXNMINIT. Specific details can be found in the documentation for each of these measures.

Specific details about the recoded variables described above can be found in the Initiation Documentation Appendix.

RECODED DRUG USE

The following main reason for misusing pain relievers, PNRRMAINRSN, is defined based on answers to questions about respondents' reasons for misusing pain relievers for their last misuse. Respondents could report more than one reason for misusing pain relievers the last time. If they reported more than one reason, then they were asked to report the main reason. If data existed for the main reason question, then that response was considered to be their main reason. If respondents reported only one reason for their last misuse, then that logically was the main reason (i.e., these respondents were not asked the question for their main reason). If respondents reported that some other reason was their main reason for their last misuse, then their response was logically assigned from the write in data. In the documentation below, values of 11-18 in PNRRSMMAIN reflect situations where respondents reported more than one reason for their last misuse, their "other" reason for their last misuse was their main reason for their last misuse, but the other reason was the reason specified as one of the eight categories below.

- 1. Main reason is to relieve physical pain (PNRRSMMAIN=1,11), reported only one reason which was to relieve physical pain (PNRRSMMAIN=99 and PNRRSPAIN=1), or reported some other reason as their only reason but specified that this other reason was to relieve physical pain (PNRRSMMAIN=99 and PNRRSPAIN=3).
2. Main reason is to relax or relieve tension (PNRRSMMAIN=2,12), reported only one reason which was to relax or relieve tension (PNRRSMMAIN=99 and PNRRSRELX=1), or reported some other reason as their only reason but specified that this other reason was to relax or relieve tension (PNRRSMMAIN=99 and PNRRSRELX=3).
3. Main reason is to experiment or see what it's like (PNRRSMMAIN=3,13), reported only one reason which was to experiment or see what it's like (PNRRSMMAIN=99 and PNRRSEXPT=1), or reported some other reason as their only reason but specified that this other reason was to experiment or see what it's like (PNRRSMMAIN=99 and PNRRSEXPT=3).
4. Main reason is to feel good or get high (PNRRSMMAIN=4,14), reported only one reason which was to feel good or get high (PNRRSMMAIN=99 and PNRRSHIGH=1), or reported some other reason as their only reason but specified that this other reason was to feel good or get high (PNRRSMMAIN=99 and PNRRSHIGH=3).
5. Main reason is to help with sleep (PNRRSMMAIN=5,15), reported only one reason which was to help with sleep (PNRRSMMAIN=99 and PNRRSSLEP=1), or reported some other reason as their only reason but specified that this other reason was to help with sleep (PNRRSMMAIN=99 and PNRRSSLEP=3).
6. Main reason is to help with feelings or emotions (PNRRSMMAIN=6,16), reported only one reason which was to help with feelings or emotions (PNRRSMMAIN=99 and PNRRSEMOT=1), or reported some other reason as their only reason but specified that this other reason was to help with feelings or emotions (PNRRSMMAIN=99 and PNRRSEMOT=3).
7. Main reason is to increase/decrease effects of other drugs (PNRRSMMAIN=7,17), reported only one reason which was to increase/decrease the effects of other drugs (PNRRSMMAIN=99 and PNRRSDGFX=1), or reported some other reason as their only reason but specified that this other reason was to increase/decrease the effects of other drugs (PNRRSMMAIN=99 and PNRRSDGFX=3).
8. Main reason is because hooked or have to have drug (PNRRSMMAIN=8,18), reported only one reason which was because they were hooked or had to have the drug (PNRRSMMAIN=99 and PNRRSHOOK=1), or reported some other reason as their only reason but specified that this other reason was because they were hooked or had to have the drug (PNRRSMMAIN=99 and PNRRSHOOK=3).
9. Main reason is some other reason (PNRRSMMAIN=9), or reported only one reason which was a valid other reason listed for pain relievers other than those defined above based on the write in data (PNRRSMMAIN=99 and PNRRSSOR=1 and PNRRSOTRS=9-69,71,77,79). Values of 9-12 are write in responses that do not correspond to reasons listed for pain relievers but are considered valid reasons, therefore are not excluded from the some other reason category. Values of 1-8 are write in other reason responses that are logically assigned into existing response categories.

(System Missing): Main reason is unknown (PNRRSMMAIN=85,94,97,98 or all nine reasons either have "no" or missing responses) or respondent reported only one reason and the other pain reliever reason was not a valid reason (PNRRSMMAIN=99 and PNRRSSOR=1 and PNRRSOTRS=72,73,74,80,985,994,997).

(PNRRSDGFX, PNRRSEMOT, PNRRSEXPT, PNRRSHIGH, PNRRSHOOK, PNRRSMMAIN, PNRRSOTRS, PNRRSPAIN, PNRRSRELX, PNRRSSLEP, PNRRSSOR)

RECODED DRUG USE

The following main reason for misusing tranquilizers, TRQMAINRSN, is defined based on answers to questions about respondents' reasons for misusing tranquilizers for their last misuse. Respondents could report more than one reason for misusing tranquilizers the last time. If they reported more than one reason, then they were asked to report the main reason. If data existed for the main reason question, then that response was considered to be their main reason. If respondents reported only one reason for their last misuse, then that logically was the main reason (i.e., these respondents were not asked the question for their main reason). If respondents reported that some other reason was their main reason for their last misuse, then their response was logically assigned from the write in data. In the documentation below, values of 11-17 in TRQRSMAN reflect situations where respondents reported more than one reason for their last misuse, their "other" reason for their last misuse was their main reason for their last misuse, but the other reason was the reason specified as one of the seven categories below.

- 1. Main reason is to relax or relieve tension (TRQRSMAN=1,11), reported only one reason which was to relax or relieve tension (TRQRSMAN=99 and TRQRSRELX=1), or reported some other reason as their only reason but specified that this other reason was to relax or relieve tension (TRQRSMAN=99 and TRQRSRELX=3).
2. Main reason is to experiment or see what it's like (TRQRSMAN=2,12), reported only one reason which was to experiment or see what it's like (TRQRSMAN=99 and TRQRSEXP=1), or reported some other reason as their only reason but specified that this other reason was to experiment or see what it's like (TRQRSMAN=99 and TRQRSEXP=3).
3. Main reason is to feel good or get high (TRQRSMAN=3,13), reported only one reason which was to feel good or get high (TRQRSMAN=99 and TRQRSHIGH=1), or reported some other reason as their only reason but specified that this other reason was to feel good or get high (TRQRSMAN=99 and TRQRSHIGH=3).
4. Main reason is to help with sleep (TRQRSMAN=4,14), reported only one reason which was to help with sleep (TRQRSMAN=99 and TRQRSSLEP=1), or reported some other reason as their only reason but specified that this other reason was to help with sleep (TRQRSMAN=99 and TRQRSSLEP=3).
5. Main reason is to help with feelings or emotions (TRQRSMAN=5,15), reported only one reason which was to help with feelings or emotions (TRQRSMAN=99 and TRQRSEMOT=1), or reported some other reason as their only reason but specified that this other reason was to help with feelings or emotions (TRQRSMAN=99 and TRQRSEMOT=3).
6. Main reason is to increase/decrease effects of other drugs (TRQRSMAN=6,16), reported only one reason which was to increase/decrease the effects of other drugs (TRQRSMAN=99 and TRQRSDGFX=1), or reported some other reason as their only reason but specified that this other reason was to increase/decrease the effects of other drugs (TRQRSMAN=99 and TRQRSDGFX=3).
7. Main reason is because hooked or have to have drug (TRQRSMAN=7,17), reported only one reason which was because they were hooked or had to have the drug (TRQRSMAN=99 and TRQRSHOOK=1), or reported some other reason as their only reason but specified that this other reason was because they were hooked or had to have the drug (TRQRSMAN=99 and TRQRSHOOK=3).
8. Main reason is some other reason (TRQRSMAN=8), or reported only one reason which was a valid other reason listed for tranquilizer other than those defined above based on the write in data (TRQRSMAN=99 and TRQRSSOR=1 and TRQRSOTRS=1,9-69,71,77,79). Values of 1 and 9-12 are write in responses that do not correspond to reasons listed for tranquilizers but are considered valid reasons, therefore are not excluded from the some other reason category. Values of 2-8 are write in other reason responses that are logically assigned into existing response categories.

(System Missing): Main reason is unknown (TRQRSMAN=85,94,98 or all eight reasons either have "no" or missing responses) or respondent reported only one reason and the other tranquilizer reason was not a valid reason (TRQRSMAN=99 and TRQRSSOR=1 and TRQRSOTRS=985,994,997).

RECODED DRUG USE

The following main reason for misusing stimulants, STMMAINRSN, is defined based on answers to questions about respondents' reasons for misusing stimulants for their last misuse. Respondents could report more than one reason for misusing stimulants the last time. If they reported more than one reason, then they were asked to report the main reason. If data existed for the main reason question, then that response was considered to be their main reason. If respondents reported only one reason for their last misuse, then that logically was the main reason (i.e., these respondents were not asked the question for their main reason). If respondents reported that some other reason was their main reason for their last misuse, then their response was logically assigned from the write in data. In the documentation below, values of 11-18 in STMRSMAIN reflect situations where respondents reported more than one reason for their last misuse, their "other" reason for their last misuse was their main reason for their last misuse, but the other reason was the reason specified as one of the eight categories below.

1. Main reason is to help lose weight (STMRSMAIN=1,11), reported only one reason which was to help lose weight (STMRSMAIN=99 and STMRSWGHT=1), or reported some other reason as their only reason but specified that this other reason was to help lose weight (STMRSMAIN=99 and STMRSWGHT=3).
2. Main reason is to help concentrate (STMRSMAIN=2,12), reported only one reason which was to help concentrate (STMRSMAIN=99 and STMRSCONC=1), or reported some other reason as their only reason but specified that this other reason was to help concentrate (STMRSMAIN=99 and STMRSCONC=3).
3. Main reason is to help be alert or stay awake (STMRSMAIN=3,13), reported only one reason which was to help be alert or stay awake (STMRSMAIN=99 and STMRSALRT=1), or reported some other reason as their only reason but specified that this other reason was to help be alert or stay awake (STMRSMAIN=99 and STMRSALRT=3).
4. Main reason is to help study (STMRSMAIN=4,14), reported only one reason which was to help study (STMRSMAIN=99 and STMRSSTDY=1), or reported some other reason as their only reason but specified that this other reason was to help study (STMRSMAIN=99 and STMRSSTDY=3).
5. Main reason is to experiment or see what it's like (STMRSMAIN=5,15), reported only one reason which was to experiment or see what it's like (STMRSMAIN=99 and STMRSXPT=1), or reported some other reason as their only reason but specified that this other reason was to experiment or see what it's like (STMRSMAIN=99 and STMRSXPT=3).
6. Main reason is to feel good or get high (STMRSMAIN=6,16), reported only one reason which was to feel good or get high (STMRSMAIN=99 and STMRSHIGH=1), or reported some other reason as their only reason but specified that this other reason was to feel good or get high (STMRSMAIN=99 and STMRSHIGH=3).
7. Main reason is to increase/decrease effects of other drugs (STMRSMAIN=7,17), reported only one reason which was to increase/decrease the effects of other drugs (STMRSMAIN=99 and STMRSDGF=1), or reported some other reason as their only reason but specified that this other reason was to increase/decrease the effects of other drugs (STMRSMAIN=99 and STMRSDGF=3).
8. Main reason is because hooked or have to have the drug (STMRSMAIN=8,18), reported only one reason which was because they were hooked or had to have the drug (STMRSMAIN=99 and STMRSHOOK=1), or reported some other reason as their only reason but specified that this other reason was because they were hooked or had to have the drug (STMRSMAIN=99 and STMRSHOOK=3).
9. Main reason is some other reason (STMRSMAIN=9), or reported only one reason which was a valid other reason listed for stimulant other than those defined above based on the write in data (STMRSMAIN=99 and STMRSOR=1 and STMRSOTRS=1,2,5,6,14-69,71,75,76,77,79). Values of 1,2,5, and 6 are write in responses that do not correspond to reasons listed for stimulants but are considered valid reasons, therefore are not excluded from the some other reason category. Values of 3,4, and 7-12 are write in other reason responses that are logically assigned into existing response categories.

(System Missing): Main reason is unknown (STMRSMAIN=85,94,98 or all nine reasons either have "no" or missing responses) or respondent reported only one reason and the other stimulant reason was not a valid reason (STMRSMAIN=99 and STMRSOR=1 and STMRSOTRS=70,73,985,994,997,998).

RECODED DRUG USE

The following main reason for misusing sedatives, SEDMAINRSN, is defined based on answers to questions about respondents' reasons for misusing sedatives for their last misuse. Respondents could report more than one reason for misusing sedatives the last time. If they reported more than one reason, then they were asked to report the main reason. If data existed for the main reason question, then that response was considered to be their main reason. If respondents reported only one reason for their last misuse, then that logically was the main reason (i.e., these respondents were not asked the question for their main reason). If respondents reported that some other reason was their main reason for their last misuse, then their response was logically assigned from the write in data. In the documentation below, values of 11-17 in SEDRSMAN reflect situations where respondents reported more than one reason for their last misuse, their "other" reason for their last misuse was their main reason for their last misuse, but the other reason was the reason specified as one of the seven categories below.

- 1. Main reason is to relax or relieve tension (SEDRSMAN=1,11), reported only one reason which was to relax or relieve tension (SEDRSMAN=99 and SEDRSRELX=1), or reported some other reason as their only reason but specified that this other reason was to relax or relieve tension (SEDRSMAN=99 and SEDRSRELX=3).
2. Main reason is to experiment or see what it's like (SEDRSMAN=2,12), reported only one reason which was to experiment or see what it's like (SEDRSMAN=99 and SEDRSEXPT=1), or reported some other reason as their only reason but specified that this other reason was to experiment or see what it's like (SEDRSMAN=99 and SEDRSEXPT=3).
3. Main reason is to feel good or get high (SEDRSMAN=3,13), reported only one reason which was to feel good or get high (SEDRSMAN=99 and SEDRSHIGH=1), or reported some other reason as their only reason but specified that this other reason was to feel good or get high (SEDRSMAN=99 and SEDRSHIGH=3).
4. Main reason is to help with sleep (SEDRSMAN=4,14), reported only one reason which was to help with sleep (SEDRSMAN=99 and SEDRSSLEP=1), or reported some other reason as their only reason but specified that this other reason was to help with sleep (SEDRSMAN=99 and SEDRSSLEP=3).
5. Main reason is to help with feelings or emotions (SEDRSMAN=5,15), reported only one reason which was to help with feelings or emotions (SEDRSMAN=99 and SEDRSEMOT=1), or reported some other reason as their only reason but specified that this other reason was to help with feelings or emotions (SEDRSMAN=99 and SEDRSEMOT=3).
6. Main reason is to increase/decrease effects of other drugs (SEDRSMAN=6,16), reported only one reason which was to increase/decrease the effects of other drugs (SEDRSMAN=99 and SEDRSDGFX=1), or reported some other reason as their only reason but specified that this other reason was to increase/decrease the effects of other drugs (SEDRSMAN=99 and SEDRSDGFX=3).
7. Main reason is because hooked or have to have the drug (SEDRSMAN=7,17), reported only one reason which was because they were hooked or had to have the drug (SEDRSMAN=99 and SEDRSHOOK=1), or reported some other reason as their only reason but specified that this other reason was because they were hooked or had to have the drug (SEDRSMAN=99 and SEDRSHOOK=3).
8. Main reason is some other reason (SEDRSMAN=8), or reported only one reason which was a valid other reason listed for sedative other than those defined above based on the write in data (SEDRSMAN=99 and SEDRSSOR=1 and SEDRSOTRS=1,9-34,77,79). Values of 1 and 9-12 are write in responses that do not correspond to reasons listed for sedatives but are considered valid reasons, therefore are not excluded from the some other reason category. Values of 2-8 are write in other reason responses that are logically assigned into existing response categories.

(System Missing): Main reason is unknown (SEDRSMAN=85,94,98 or all eight reasons either have "no" or missing responses) or respondent reported only one reason and the other reason was not a valid reason (SEDRSMAN=99 and SEDRSSOR=1 and SEDRSOTRS=985,994,997).

(SEDRSDGFX, SEDRSEMOT, SEDRSEXPT, SEDRSHIGH, SEDRSHOOK, SEDRSMAN, SEDRSOTRS, SEDRSRELX, SEDRSSLEP, SEDRSSOR) SEDMAINRSN Len : 1 RC-MAIN REASON FOR MISUSING SEDATIVES LAST EPISODE

RECODED DRUG USE

NOTE: The following four variables pertain to the source of a respondent's most recent misuse of prescription pain relievers (SRCPNRNM), prescription tranquilizers (SRCTRQNM), prescription stimulants (SRCSTMNM), and prescription sedatives (SRCSEDNM) within the past year.

For each variable there are eight mutually exclusive categories for specific sources, and a missing category for respondents with no past year misuse or unknown responses to the source questions. The categories for the specific sources take into account responses from a single question asking about a single, most recent source of misuse among respondents who misused in the past year.

Based on the following conditions, a respondent was classified in one of the following nine categories (including System Missing) for the source of most recent prescription drug misuse in the past year for the variables, SRCPNRNM, SRCTRQNM, SRCSTMNM, and SRCSEDNM:

1. Got Prescription(s) From One Doctor (XXXGOTLAS=1, 11)
2. Got Prescription(s) From More Than One Doctor (XXXGOTLAS=2, 12)
3. Stole from Dr Office, Clinic, Hospital, or Pharmacy (XXXGOTLAS=3, 13)
4. Got From Friend or Relative for Free (XXXGOTLAS=4, 14)
5. Bought from Friend or Relative (XXXGOTLAS=5, 15)
6. Took from Friend or Relative without Asking (XXXGOTLAS=6, 16)
7. Bought from Drug Dealer or Other Stranger (XXXGOTLAS=7, 17)
8. Got Some Other Way (XXXGOTLAS=8 and XXXGOTOTH=9-42, 71)

(System Missing): No Past Year Misuse/Unknown/Invalid Source (XXXGOTLAS=81, 83, 85, 89, 91, 93, 94, 97, 98 or [XXXGOTLAS=8 and XXXGOTOTH=70, 72-77, 81, 85, 89, 94, 97, 98])

3 = Got From Another Source (SRCSEDNM=7,8)

RECODED DRUG USE

NOTE: A respondent who misused prescription drugs in the past year was administered a question regarding the source of the drug during their most recent use. If they indicated that their most recent source was a 'friend or relative for free' from either of these questions, then a respondent was administered a follow-up question that asked the source the friend/relative had obtained the drug from. The following four variables pertain to the source from which a respondent's friend or relative obtained the drug for prescription pain relievers (SRCFRPNRNM), prescription tranquilizers (SRCFRTRQNM), prescription stimulants (SRCFRSTMNM), and prescription sedatives (SRCFRSEDNM) within the past year.

For each of the following four variables, there are eight mutually exclusive categories for specific sources that the friend/relative obtained the drug from and a missing category for respondents who did not indicate using the drug in the past year (or lifetime) or a respondent that indicated in one of the previous questions that they had obtained the drug for most recent use from a valid source other than a friend or relative for free and respondents with unknown or invalid values.

Based on the following conditions, a respondent was classified in one of the following nine categories (including System Missing) for the source of most recent prescription drug use in the past year for the variables, SRCFRPNRNM, SRCFRTRQNM, SRCFRSTMNM, and SRCFRSEDNM:

1. Got Prescription(s) from One Doctor (XXXGOTLAS=4 and XXXFFGOT=1, 11)
2. Got Prescription(s) from More Than One Doctor (XXXGOTLAS=4 and XXXFFGOT=2, 12)
3. Stole from Dr Office, Clinic, Hospital, or Pharmacy(XXXGOTLAS=4 and XXXFFGOT=3, 13)
4. Got From Friend or Relative for Free (XXXGOTLAS=4 and XXXFFGOT=4, 14)
5. Bought from Friend or Relative (XXXGOTLAS=4 and XXXFFGOT=5, 15)
6. Took from Friend or Relative without Asking (XXXGOTLAS=4 and XXXFFGOT=6, 16)
7. Bought from Drug Dealer or Other Stranger (XXXGOTLAS=4 and XXXFFGOT=7, 17)
8. Got Some Other Way (XXXGOTLAS=4 and XXXFFGOT=8 and XXXFFGTSP=valid "other" response, levels 9-38, 71)

(System Missing): No Past Year Misuse or Valid Source of Most Recent Misuse Not from Friend or Relative for Free /Unknown/Invalid Source (XXXGOTLAS not=4 or [XXXGOTLAS=4 and XXXFFGOT=94, 97, 98]) or [XXXGOTLAS=4 and XXXFFGOT=8 and XXXFFGTSP=70, 72-75, 85, 94, 97, 98])

(PNRFFGOT, PNRFFGTSP, PNRGOTLAS)

SRCFRPNRNM

- Len : 1 RC-SOURCE OF FRIEND/RELATIVE PAIN RELIEVERS FOR LAST MISUSE

RECODED SPECIAL DRUGS

**RECODED SPECIAL DRUGS**

*The values in this section may be inconsistent with values for variables in other sections of the interview. Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in earlier sections. Otherwise, variables in one section of the interview generally were not edited to make them consistent with variables in another section of the interview. This note applies to variables in this section marked by a<sup>1</sup>.*

NOTE: The variables in this section are recoded variables that were created from one or more of the variables from three of the preceding sections: Recoded Drug Use, Special Drugs, and Imputed Special Drugs.

NOTE: Certain source variables that were used to create recoded variables have valid values that might not have been reported or assigned for the current survey year. However, these values have been included in the general specifications in the codebook on how the recoded variables were created. See additional details about this issue in the Organization of the Data File section of this codebook introduction.

(CONDLREC, HRNDLREC, METHNDLRC, OTDGNDLRC)

- [ANYNDLREC<sup>1</sup>](#) Len : 2 RC-MOST RECENT USE OF ANY DRUG WITH A NEEDLE
  - 1 = Within the past 30 days

  - 97 = REFUSED
  - 98 = MISSING (BUT NOT REFUSED)

NOTE: The following ten recoded variables pertain to specific needle and heroin use. The ever used a needle to inject drugs recode was revised starting with the 2022 NSDUH to include data from the new questions in the Emerging Issues section about the use of a needle to inject illegally made fentanyl. Thus, ANYNEDFLAG (ever used a needle to inject heroin, cocaine, methamphetamine, illegally made fentanyl, or some other drug) in the Recoded Emerging Issues section replaces ANYNEDEVER (ever used a needle to inject heroin, cocaine, methamphetamine, or some other drug) that appeared in the Recoded Special Drugs section in 2021. A past year version of the any needle use recode which includes illegally made fentanyl needle use, ANYNEDYR, also appears in the Recoded Emerging Issues section starting with the 2022 NSDUH.

Sometimes people who use prescription pain relievers have serious problems at work, school, or home—such as:

- missing a lot of work or school
- getting demoted, having your hours cut, or losing a job
- not being able to get a job or keep a job
- getting suspended, expelled, or dropping out of school
- failing to take care of family

During the past 12 months, did you have any serious problems like these at work, school, or home because of your use of any prescription pain relievers?

SUBSTANCE USE DISORDER

Sometimes people who use prescription tranquilizers have serious problems at work, school, or home—such as:

- missing a lot of work or school
- getting demoted, having your hours cut, or losing a job
- not being able to get a job or keep a job
- getting suspended, expelled, or dropping out of school
- failing to take care of family

During the past 12 months, did you have any serious problems like these at work, school, or home because of your use of any prescription tranquilizers?

The next set of variables are substance use disorder measures for alcohol and drugs and are based on the criteria in the Diagnostic and Statistical Manual of Mental Disorders, 5th edition. Drugs include marijuana, cocaine, heroin, hallucinogens, inhalants, methamphetamine, and the use of prescription psychotherapeutic drugs (i.e., pain relievers, tranquilizers, stimulants, and sedatives). These variables include missing values, while the imputation-revised versions of these variables in which missing values are replaced with valid response categories are described in the "Imputed Substance Use Disorder" section. The construction of all SUD variables is described in more detail in the Nicotine Dependence and Substance Use Disorder appendix.

NOTE: Respondents who reported past year alcohol use but indicated use of alcohol on 5 or fewer days in the past year were not asked the questions on alcohol use disorder. However, respondents who reported past year alcohol use and had a missing value for the number of days they used alcohol in the past year were asked the questions on alcohol use disorder. Therefore, it is possible for a respondent to have used alcohol on 5 or fewer days in the past year according to IRALCFY but to be classified as having a past year substance use disorder of alcohol.

(ALCYR, UDALAVWALCO, UDALAVWOTH, UDALAVWSVTR, UDALBLCKCTD, UDALFMLYCTD, UDALFMLYPRB, UDALGETHURT, UDALHLTHCTD, UDALLESSEFF, UDALLRGAMTS, UDALMNTLCTD, UDALNEEDMOR, UDALNOTSTOP, UDALSTOPACT, UDALSTRURGE, UDALTIMEGET, UDALTIMEUSE, UDALWANTBAD, UDALWDFLANX, UDALWDHALUC, UDALWDSITST, UDALWDSLEEP, UDALWDSWEAT, UDALWDSZURE, UDALWDTRMBL, UDALWDVOMIT, UDALWORKPRB, UDALWSHSTOP)

PYUD5ALC Len : 2 ALCOHOL USE DISORDER IN THE PAST YEAR
. = Missing: Past year use known or imputed
0 = No
1 = Yes
91 = NEVER USED ALCOHOL
93 = DID NOT USE ALCOHOL PAST 12 MONTHS OR USED <6 DAYS

SUBSTANCE USE DISORDER

NOTE: Respondents who reported past year marijuana use but indicated use of marijuana on 5 or fewer days in the past year were not asked the questions on marijuana use disorder. However, respondents who reported past year marijuana use and had a missing value for the number of days they used marijuana in the past year were asked the questions on marijuana use disorder. Therefore, it is possible for a respondent to have used marijuana on 5 or fewer days in the past year according to IRMJFY but to be classified as having a past year substance use disorder of marijuana.

(MRJYR, UDMJAVWMARJ, UDMJAVWOTH, UDMJFMYCTD, UDMJFMYPRB, UDMJGETHURT, UDMJHLTHCTD, UDMJLESSEFF, UDMJLRGAMTS, UDMJMNTLCTD, UDMJNEEDMOR, UDMJNOTSTOP, UDMJSTOPACT, UDMJSTRURGE, UDMJTIMEGET, UDMJTIMEUSE, UDMJWANTBAD, UDMJWDANGRY, UDMJWDAPPET, UDMJWDCHILL, UDMJWDDEPRS", UDMJWDFEVER, UDMJWDFLANX, UDMJWDHEDAC, UDMJWDSSHAKE, UDMJWDSITST, UDMJWDSLEEP, UDMJWDSTMCH, UDMJWDSWEAT, UDMJWORKPRB, UDMJWSHSTOP)

## SUBSTANCE USE DISORDER

The next set of variables are measures of substance use disorder severity for alcohol and drugs and are based on the criteria in the *Diagnostic and Statistical Manual of Mental Disorders*, 5th edition. The severity of an SUD according to DSM-5 criteria is determined by the number of individual criteria recorded as positive for a particular substance. Respondents were classified as having an SUD of mild severity if they met two or three SUD criteria for that substance, an SUD of moderate severity if they met four or five SUD criteria for that substance, and a severe SUD if they met six or more SUD criteria for that substance. These variables include missing values, while the imputation-revised versions of these variables in which missing values are replaced with valid response categories are described in the "Imputed Substance Use Disorder" section. The construction of all SUD variables is described in more detail in the Nicotine Dependence and Substance Use Disorder appendix.

NOTE: Respondents who reported past year alcohol use but indicated use of alcohol on 5 or fewer days in the past year were not asked the questions on alcohol use disorder. However, respondents who reported past year alcohol use and had a missing value for the number of days they used alcohol in the past year were asked the questions on alcohol use disorder. Therefore, it is possible for a respondent to have used alcohol on 5 or fewer days in the past year according to IRALCFY but to be classified as having a past year substance use disorder of alcohol.

IMPUTED SUBSTANCE USE DISORDER

**IMPUTED SUBSTANCE USE DISORDER**

The next set of variables are imputation-revised substance use disorder measures for alcohol and drugs and are based on the criteria in the *Diagnostic and Statistical Manual of Mental Disorders*, 5th edition. Drugs include marijuana, cocaine, heroin, hallucinogens, inhalants, methamphetamine, and the use of prescription psychotherapeutic drugs (i.e., pain relievers, tranquilizers, stimulants, and sedatives). The construction of all SUD variables is described in more detail in the Nicotine Dependence and Substance Use Disorder appendix.

NOTE: Respondents who reported past year alcohol use but indicated use of alcohol on 5 or fewer days in the past year were not asked the questions on alcohol use disorder. However, respondents who reported past year alcohol use and had a missing value for the number of days they used alcohol in the past year were asked the questions on alcohol use disorder. Therefore, it is possible for a respondent to have used alcohol on 5 or fewer days in the past year according to IRALCFY but to be classified as having a past year substance use disorder of alcohol.

The next set of variables are imputation-revised measures of substance use disorder severity for alcohol and drugs and are based on the criteria in the *Diagnostic and Statistical Manual of Mental Disorders*, 5th edition. The severity of an SUD according to DSM-5 criteria is determined by the number of individual criteria recorded as positive for a particular substance. Respondents were classified as having an SUD of mild severity if they met two or three SUD criteria for that substance, an SUD of moderate severity if they met four or five SUD criteria for that substance, and a severe SUD if they met six or more SUD criteria for that substance. The construction of all SUD variables is described in more detail in the Nicotine Dependence and Substance Use Disorder appendix.

NOTE: Respondents who reported past year alcohol use but indicated use of alcohol on 5 or fewer days in the past year were not asked the questions on alcohol use disorder. However, respondents who reported past year alcohol use and had a missing value for the number of days they used alcohol in the past year were asked the questions on alcohol use disorder. Therefore, it is possible for a respondent to have used alcohol on 5 or fewer days in the past year according to IRALCFY but to be classified as having a past year substance use disorder of alcohol.

3 = Statistically imputed data  
9 = LEGITIMATE SKIP - NO PAST YEAR USE DISORDER

NOTE: Respondents who reported past year marijuana use but indicated use of marijuana on 5 or fewer days in the past year were not asked the questions on marijuana use disorder. However, respondents who reported past year marijuana use and had a missing value for the number of days they used marijuana in the past year were asked the questions on marijuana use disorder. Therefore, it is possible for a respondent to have used marijuana on 5 or fewer days in the past year according to IRMJFY but to be classified as having a past year substance use disorder of marijuana.

NOTE: Respondents were assigned legitimate skip codes of 99 or 89 in CIGYRBFR if they reported in the core TOBACCO module that they last smoked a cigarette more than 3 years ago. Logically, these respondents would not have smoked a cigarette in the past 12 to 24 months. In addition, CIGYRBFR was not edited with respect to CIGAGLST or CIGDLLST. Therefore, inconsistencies could exist between CIGYRBFR and these other variables.

Earlier questions were about the past 12 months. This question is about the year before that, that is, from [DATEFILL - 12 MONTHS] to [DATEFILL]. During that year, beginning [DATEFILL - 12 MONTHS] and ending [DATEFILL], did you smoke part or all of a cigarette, even once?

(LU37)

The following variable, YTHACT2, was created by counting the number of positive responses reported over the following four youth activity questions: School-based (YESCHACT), community-based (YECOMACT), church or faith-based (YEFIACT), or other activities (YEOTHACT). Youth respondents who reported participation in two or more activities were included in the "Two or more activities" category regardless of how many other activity questions were answered. Youth respondents who did not answer two or more of the four youth activity questions with a "yes" or "no" response were coded as system missing. To be included in the "None or one activity" category, a youth respondent must have answered two or more of the activity questions and reported they participated in either zero or one activity.

NOTE: The following variable, KSSLR6MONED, is a score with values ranging from 0 to 24 indicating the level of psychological distress over the past 30 days (past month). This variable is based on data collected from a series of six questions known as the K6, asking adult respondents how frequently they experienced symptoms of psychological distress during the past 30 days. These questions include the following symptoms of distress: feeling nervous (DSTNRV30), feeling hopeless (DSTHOP30), feeling restless or fidgety (DSTRST30), feeling so sad or depressed that nothing could cheer you up (DSTCHR30), feeling that everything was an effort (DSTEFF30), and feeling down on yourself, no good, or worthless (DSTNGD30). For each of the six items listed above, responses of "all of the time" were coded 4, "most of the time" were coded 3, "some of the time" were coded 2, "a little of the time" were coded 1, and "none of the time" were coded 0. These assigned values were summed across the six items to calculate a total score for KSSLR6MONED. Specific details about this variable are provided in the Recoded Mental Health Appendix.

(DSTCHR30, DSTEFF30, DSTHOP30, DSTNGD30, DSTNRV30, DSTRST30)

KSSLR6MONED Len : 2 K6 TOTAL SCORE IN PAST MONTH  
RANGE = 0 - 24  
. = Aged 12-17 or missing

NOTE: The following variable, KSSLR6YRED, is a score with values ranging from 0 to 24 indicating the level of psychological distress during the worst month of the past year, that was not the past 30 days. This variable is only defined for respondents who reported that there was a month in the past 12 months when he/she was more depressed, anxious, or emotionally stressed than during the past 30 days (DSTWORST=1). This score variable is based on a series of six questions asking respondents how frequently they experienced symptoms of psychological distress during their worst month in the past year (only if the worst month was not the past 30 days). These questions are from the K6 and include the following symptoms of distress: feeling nervous (DSTNRV12), feeling hopeless (DSTHOP12), feeling restless or fidgety (DSTRST12), feeling so sad or depressed that nothing could cheer them up (DSTCHR12), feeling that everything was an effort (DSTEFF12), and feeling down on themselves, no good, or worthless (DSTNGD12). For each of the six items listed above, responses of "all of the time" were coded 4, "most of the time" were coded 3, "some of the time" were coded 2, "a little of the time" were coded 1, and "none of the time" were coded 0. These assigned values were summed across the six items to calculate a total score for KSSLR6YRED. For respondents who indicated that they did not have a month in the past year worse than the past 30 days, KSSLR6YRED was set to missing. Specific details about this variable are provided in the Recoded Mental Health Appendix.

(DSTCHR12, DSTEFF12, DSTHOP12, DSTNGD12, DSTNRV12, DSTRST12, DSTWORST)

KSSLR6YRED Len : 2 K6 TOTAL SCORE IN PAST YEAR  
RANGE = 0 - 24  
. = Aged 12-17, missing, or DSTWORST in (2,85,94,97,98)

ADULT MENTAL HEALTH

NOTE: The following two variables, WHODASSCED and WHODASDAED, are score variables that indicate the level of impairment for respondents. These variables are based on data collected from a series of thirteen questions asking respondents how much difficulty they experienced in doing eight daily activities in the one month in the past year when they were at their worst emotionally. These questions, drawn from the World Health Organization Disability Assessment Schedule (WHODAS), comprise an abbreviated scale which is used to capture information on impairment (see the Recoded Mental Health Appendix for more information). Respondents who had indicated during the administration of any of the K6 items that they had experienced at least one of the K6 symptoms (defined in the note above variables KSSLR6MONED and KSSLR6YRED) at least "a little of the time" (i.e., KSSLR6MONED greater than 0 or KSSLR6YRED greater than 0) were asked about remembering to do things they needed to do (IMPREMEM), concentrating on doing something important when other things were going on around them (IMPCONCN), going out of the house and getting around on their own (IMPGOUT, IMPGOUTM), dealing with people they did not know well (IMPPEOP, IMPPEOPM), participating in social activities (IMPSOC, IMPSOCM), taking care of household responsibilities (IMPHHLD, IMPHHLDM), taking care of daily responsibilities at work or school (IMPRES, IMPRESM), and getting daily work done as quickly as needed (IMPWORK, IMPRESM). Respondents who reported that they did not engage in an activity were asked a follow-up question to determine if they did not do so because of emotions, nerves, or mental health.

For the WHODAS total score, WHODASSCED, a value of 3 was assigned for each of the daily activities that a respondent indicated having "severe" difficulty performing, or if the respondent indicated not performing the activity due to problems with emotions, nerves, or mental health. A value of 2 was assigned for each of the daily activities that a respondent indicated having "moderate" difficulty performing, and a value of 1 was assigned for "mild" difficulty. For activities that had a follow-up question, a response of "yes" was assigned a value of 3 as having "severe difficulty." A value of 0 was assigned for all other non-missing responses for each activity. These assigned values were summed to calculate a total score for WHODASSCED which ranges from 0 to 24. WHODASSCED was set equal to 0 for respondents with KSSLR6MAX=0.

For the alternative WHODAS total score, WHODASDAED, a value of 1 was assigned for each of the daily activities that a respondent indicated having "moderate" or "severe" difficulty performing, or if the respondent indicated not performing the activity due to problems with emotions, nerves, or mental health. For activities that had a follow-up question, a response of "yes" was assigned a value of a 1 as having "moderate or severe difficulty." A value of 0 was assigned for all other non-missing responses for each activity. These assigned values were summed to calculate a total score for WHODASDAED which ranges from 0 to 8. WHODASDAED was set equal to 0 for respondents with KSSLR6MAX=0.

Specific details about these variables are provided in the Recoded Mental Health Appendix.

RECODED ADULT MENTAL HEALTH

**RECODED ADULT MENTAL HEALTH**

NOTE: The following variable, KSSLR6MON, is a score with values ranging from 0 to 24 indicating the level of psychological distress over the past 30 days (past month). This variable is based on imputed data collected from a series of six questions known as the K6, asking adult respondents how frequently they experienced symptoms of psychological distress during the past 30 days. These questions include the following symptoms of distress: feeling nervous (IRDSTNRV30), feeling hopeless (IRDSTHOP30), feeling restless or fidgety (IRDSTRST30), feeling so sad or depressed that nothing could cheer you up (IRDSTCHR30), feeling that everything was an effort (IRDSTEFF30), and feeling down on yourself, no good, or worthless (IRDSTNGD30). For each of the six items listed above, responses of "all of the time" were coded 4, "most of the time" were coded 3, "some of the time" were coded 2, "a little of the time" were coded 1, and "none of the time" were coded 0. These assigned values were summed across the six items to calculate a total score for KSSLR6MON. Specific details about this variable are provided in the Recoded Mental Health Appendix.

(*IRDSTCHR30, IRDSTEFF30, IRDSTHOP30, IRDSTNGD30, IRDSTNRV30, IRDSTRST30*)  
KSSLR6MON Len : 2 RC-K6 TOTAL SCORE IN PAST MONTH  
RANGE = 0 - 24  
. = Aged 12-17

(*KSSLR6MON*)  
SPDPSTMON Len : 1 RC-PAST MONTH SERIOUS PSYCHOLOGICAL DISTRESS INDICATOR  
. = Aged 12-17  
0 = No (KSSLR6MON<13)  
1 = Yes (KSSLR6MON>=13)

NOTE: The following variable, KSSLR6YR, is a score with values ranging from 0 to 24 indicating the level of psychological distress during the worst month of the past year, that was not the past 30 days. This variable is only defined for respondents who reported that there was a month in the past 12 months when he/she was more depressed, anxious, or emotionally stressed than during the past 30 days (IRDSTWORST=1). This score variable is based on imputation-revised values for a series of six questions asking respondents how frequently they experienced symptoms of psychological distress during their worst month in the past year (only if the worst month was not the past 30 days). These questions are from the K6 and include the following symptoms of distress: feeling nervous (IRDSTNRV12), feeling hopeless (IRDSTHOP12), feeling restless or fidgety (IRDSTRST12), feeling so sad or depressed that nothing could cheer them up (IRDSTCHR12), feeling that everything was an effort (IRDSTEFF12), and feeling down on themselves, no good, or worthless (IRDSTNGD12). For each of the six items listed above, responses of "all of the time" were coded 4, "most of the time" were coded 3, "some of the time" were coded 2, "a little of the time" were coded 1, and "none of the time" were coded 0. These assigned values were summed across the six items to calculate a total score for KSSLR6YR. For respondents who indicated that they did not have a month in the past year worse than the past 30 days, KSSLR6YR was set to missing. Specific details about this variable are provided in the Recoded Mental Health Appendix.

(*IRDSTCHR12, IRDSTEFF12, IRDSTHOP12, IRDSTNGD12, IRDSTNRV12, IRDSTRST12, IRDSTWORST*)  
KSSLR6YR Len : 2 RC-K6 TOTAL SCORE IN PAST YEAR  
RANGE = 0 - 24  
. = Aged 12-17 or IRDSTWORST=2

NOTE: The following variable, KSSLR6MAX, is defined to be the higher K6 score between the past month K6 total score (KSSLR6MON) variable, and the K6 total score in the worst month of the past year if the worst month was not the past 30 days (KSSLR6YR) variable.

(*KSSLR6MON, KSSLR6YR*)

RANGE = 0 - 24  
. = Aged 12-17

(*KSSLR6MAX*)  
SPDPSTYR Len : 1 RC-PAST YEAR SERIOUS PSYCHOLOGICAL DISTRESS INDICATOR  
. = Aged 12-17  
0 = No (KSSLR6MAX<13)  
1 = Yes (KSSLR6MAX>=13)

NOTE: The following variable, AKSSLR6WRST, is an alternative version of the original worst K6 total score in the past year (KSSLR6MAX) with values ranging from 0 to 17 rather than 0 to 24. This alternative total score was calculated by assigning a value of 0 when KSSLR6MAX had a value from 0 to 7 and assigning a value of 1 to 17 when KSSLR6MAX had a corresponding value from 8 to 24. This alternative version was used in the regression model to determine SMI because SMI prevalence was typically extremely low for respondents with worst K6 total scores less than 8. Specific details about this variable are provided in the Recoded Mental Health Appendix.

RANGE = 0 - 17  
. = Aged 12-17

RECODED ADULT MENTAL HEALTH

NOTE: The following two variables, WHODASTOTSC and WHODASDASC, are score variables that indicate the level of impairment for respondents. These variables are based on imputation-revised data collected from a series of thirteen questions asking respondents how much difficulty they experienced in doing eight daily activities in the one month in the past year when they were at their worst emotionally (defined in the note above variables WHODASSED and WHODASDAED).

For the original WHODAS total score, WHODASTOTSC, a value of 3 was assigned for each of the daily activities that a respondent indicated having "severe" difficulty performing, or if the respondent indicated not performing the activity due to problems with emotions, nerves, or mental health. A value of 2 was assigned for each of the daily activities that a respondent indicated having "moderate" difficulty performing, and a value of 1 was assigned for "mild" difficulty. For activities that had a follow-up question, a response of "yes" was assigned a value of 3 as having "severe difficulty." A value of 0 was assigned for all other responses (or imputed values) for each activity. These assigned values were summed to calculate a total score for WHODASTOTSC which ranges from 0 to 24. WHODASTOTSC was set equal to 0 for respondents with KSSLR6MAX=0.

For the alternative WHODAS total score, WHODASDASC, a value of 1 was assigned for each of the daily activities that a respondent indicated having "moderate" or "severe" difficulty performing, or if the respondent indicated not performing the activity due to problems with emotions, nerves, or mental health. For activities that had a follow-up question, a response of "yes" was assigned a value of a 1 as having "moderate or severe difficulty." A value of 0 was assigned for all other responses (or imputed values) for each activity. These assigned values were summed to calculate a total score for WHODASDASC which ranges from 0 to 8. WHODASDASC was set equal to 0 for respondents with KSSLR6MAX=0. The alternative version of the WHODAS total score (WHODASDASC) was used in the regression model to determine SMI.

Specific details about these variables are provided in the Recoded Mental Health Appendix.

. = Aged 12-17

NOTE: The following eight mental illness variables are based on the 2012 mental illness prediction model. Starting with the 2021 NSDUH, the inputs to the 2012 mental illness prediction model were statistically imputed. Specific details about these variables and the prediction models are provided in the Recoded Mental Health Appendix.

The following variable, SMIPPPY, is a predicted probability that a respondent has Serious Mental Illness (SMI) estimated using the 2012 logistic regression model. SMIPPPY was used to determine these levels of mental illness: Serious (SMI), Serious or Moderate (SMMI), and Any (AMI). The categories of Moderate (MMI) and Mild (LMI) were determined by subtraction.

(AGE1830, AKSSLR6WRST, IRAMDEYR, IRSUICHTNK, WHODASDASC)  
SMIPPPY Len : 12 RC-IMP PREDICTED SERIOUS MENTAL ILLNESS PROB PY  
RANGE = 0.0025409721 - 0.9291205406  
. = Aged 12-17 (AGE<18)

NOTE: The following six variables (SMIPY, AMIPY, SMMIPY, MMIPY, LMIPY, and LMMIPY) are not recommended to be used when analyzing variables for past year suicidal thoughts, past year MDE, K6, or the WHODAS, nor are they recommended to be used when analyzing other variables closely linked with these variables (including past year suicide attempts, suicide plans, medical treatment for suicide attempts, lifetime MDE, SPD, or components used in the K6 or WHODAS scales). Specific details about the creation and use of these variables can be found in the Recoded Mental Health Appendix.

The following variable, SMIPY, is a Serious Mental Illness (SMI) indicator for respondents based on the 2012 predicted probability of SMI (SMIPPPY). If SMIPPPY is greater than or equal to a specified cutoff point (0.260573529) then SMIPY=1, and if SMIPPPY is less than the cutoff point then SMIPY=0. Specific details about this variable can be found in the Recoded Mental Health Appendix.

(SMIPPPY)

. = Aged 12-17 (AGE<18)  
0 = No Past Year SMI (See comment above)  
1 = Past Year SMI (See comment above)

RECODED ADULT MENTAL HEALTH

The following variable, AMIPY, is an indicator for Any Mental Illness (AMI) based on the 2012 predicted probability of SMI (SMIPPPY). If SMIPPPY is greater than or equal to a specified cutoff point (0.0192519810) then AMIPY=1, and if SMIPPPY is less than the cutoff point then AMIPY=0. AMI is defined as having Serious, Moderate, or Mild Mental Illness. Specific details about this variable can be found in the Recoded Mental Health Appendix.

(SMIPPPY)

ADULT DEPRESSION

**ADULT DEPRESSION**

*The values in this section may be inconsistent with values for variables in other sections of the interview. Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in earlier sections. Otherwise, variables in one section of the interview generally were not edited to make them consistent with variables in another section of the interview. This note applies to variables in this section marked by a<sup>1</sup>.*

NOTE: All of the respondents aged 18 or older were asked the questions in the Adult Depression module in this current survey year. In the 2004 survey, a subset of the adults was asked these questions.

Have you ever in your life had a period of time lasting several days or longer when most of the day you felt sad, empty or depressed?

(ASC21)

[ADDPREV<sup>1</sup>](#)

Len : 2 SEVERAL DAYS OR LNGR WHEN FELT SAD/EMPTY/DPRSD

ADULT DEPRESSION

NOTE: The following variable, AMDELT, identifies an adult as having a major depressive episode (MDE) in their lifetime and AMDEYR identifies an adult as having MDE in the prior year. Beginning in 2021, missing values for AMDELT and AMDEYR were replaced using statistical imputation. The imputation-revised variables used in analysis, IRAMDELT and IRAMDEYR, appear in the Imputed Adult Depression section.

A respondent was classified as having a major depressive episode (MDE) in their lifetime, AMDELT=1, if they reported experiencing at least five out of the nine criteria used to define an adult as having had MDE in their lifetime, where at least one of the criteria is a depressed mood or loss of interest or pleasure in daily activities (ADSMMDA=1). An adult was classified as NOT having a major depressive episode (MDE) in their lifetime, AMDELT=2, if they met either of these conditions:

1. Reported experiencing fewer than five out of the nine criteria used to define an adult as having had MDE in their lifetime (ADSMMDA=2).
2. If the number of criteria used to define an adult as having had MDE in their lifetime is unknown (ADSMMDA=94,97,98) and the respondent reported at least one of the following:
  1. Never having had a period of time lasting several days or longer when felt sad, empty, or depressed (ADDPREV=2), discouraged about how things were going in life (ADDSCEV=2), and lost interest in most things usually enjoyable (ADLOSEV=2).
  2. Experienced the feelings in (i), but they did not last most of the day, nearly every day for two weeks or longer (ADLSI2WK=2) or (ADDP2WK=2).
  3. Experienced the feelings in (i) most of the day, nearly every day for two weeks or longer, but the feelings lasted less than an hour when mood was most severe and frequent (ADWRHRS=1).
  4. Experienced the feelings in (i) most of the day, nearly every day for two weeks or longer for at least an hour during those times when mood was most severe and frequent, but emotional distress was mild (ADWRDST=1), there was never a time when emotional distress was so severe that you could not be cheered up (ADWRCHR=4), and there was never a time when your emotional distress was so severe that you could not carry out your daily activities (ADWRIMP=4).
  5. Experienced the feelings in (i) most of the day, nearly every day for two weeks or longer for at least an hour and the severe distress were more than mild or at some point could not be cheered up or could not carry out daily activities, but never had any other problems during those weeks, such as changes in sleep, appetite, energy, the ability to concentrate and remember, or feelings of low self-worth (ADPPROB=2).

(ADPPROB, ADDP2WK, ADDPREV, ADDSCEV, ADLOSEV, ADLSI2WK, ADSMMDEA, ADWRCHR, ADWRDST, ADWRHRS, ADWRIMP)  
AMDELT Len : 1 ADULT: LIFETIME MAJOR DEPRESSIVE EPISODE (MDE)  
 . = Aged 12-17/Unknown (Otherwise)  
 1 = Yes (ADSMMDA=1)  
 2 = No (See comment above)

NOTE: Beginning in 2021, missing values for AMDEYR were replaced using statistical imputation. The imputation-revised variable used in analysis, IRAMDEYR, appears in the Imputed Adult Depression section.

(ADPB2WK, AMDELT)  
AMDEYR Len : 1 ADULT: PAST YEAR MAJOR DEPRESSIVE EPISODE (MDE)

 1 = Yes (AMDELT=1 & ADPB2WK=1)  
 2 = No (AMDELT=2 or [AMDELT=1 & ADPB2WK=2])

NOTE: The following four variables make up the four role domains (home management, work, close relationships with others, and social life) of the Sheehan Disability Scale (SDS), which measures the impact of a disorder on an adult's life.

(ADPSHMG)  
ASDSHOM2 Len : 1 ADULT: DEPRESS FEELINGS ROLE IMPAIRMENT - HOME MANAGEMENT  
 . = Aged 12-17/Unkn/Legit Skip (Otherwise)  
 1 = None (ADPSHMG=0)  
 2 = Mild (ADPSHMG=1,2,3)  
 3 = Moderate (ADPSHMG=4,5,6)  
 4 = Severe (ADPSHMG=7,8,9)  
 5 = Very Severe (ADPSHMG=10)

(ADPSWORK)  
ASDSWRK2 Len : 1 ADULT: DEPRESS FEELINGS ROLE IMPAIRMENT - ABILITY TO WORK  
 . = Aged 12-17/Unkn/Legit Skip (Otherwise)  
 1 = None (ADPSWORK=0)  
 2 = Mild (ADPSWORK=1,2,3)  
 3 = Moderate (ADPSWORK=4,5,6)  
 4 = Severe (ADPSWORK=7,8,9)  
 5 = Very Severe (ADPSWORK=10)

ADULT DEPRESSION

(ADPSRELS)  
ASDSREL2

Len : 1 ADULT: DEP FEELINGS ROLE IMPAIRMENT - CLOSE RELATIONSHIPS  
. = Aged 12-17/Unkn/Legit Skip (Otherwise)  
1 = None (ADPSRELS=0)  
2 = Mild (ADPSRELS=1,2,3)  
3 = Moderate (ADPSRELS=4,5,6)  
4 = Severe (ADPSRELS=7,8,9)  
5 = Very Severe (ADPSRELS=10)

(ADPSSOC)  
ASDSSOC2

Len : 1 ADULT: DEPRESSIVE FEELINGS ROLE IMPAIRMENT - SOCIAL LIFE  
. = Aged 12-17/Unkn/Legit Skip (Otherwise)  
1 = None (ADPSSOC=0)  
2 = Mild (ADPSSOC=1,2,3)  
3 = Moderate (ADPSSOC=4,5,6)  
4 = Severe (ADPSSOC=7,8,9)  
5 = Very Severe (ADPSSOC=10)

The following variable, AMDEIMP, is restricted to adults with past year MDE (AMDEYR=1) and is derived from the maximum level of interference over the four role domains of SDS: home management (ASDSHOM2), ability to work (ASDSWRK2), close relationships (ASDSREL2), and social life (ASDSSOC2). Adults with a past year MDE (AMDEYR=1) and a "severe" or "very severe" maximum level of interference are assigned AMDEIMP=1. Adults without a past year MDE (AMDEYR=2) or a maximum level of interference of "none", "mild", or "moderate" (and no missing data across the four role domains) are assigned AMDEIMP=2. All other respondents are assigned a missing value for AMDEIMP. Beginning in 2021, missing values for AMDEIMP were replaced using statistical imputation. The imputation-revised variable used in analysis, IRAMDEIMP, appears in the Imputed Adult Depression section.

RECODED ADULT DEPRESSION

**RECODED ADULT DEPRESSION**

NOTE: The variables in this section are recoded variables that were created from one or more of the edited or imputed variables from the preceding sections.

NOTE: Certain source variables that were used to create recoded variables have valid values that might not have been reported or assigned for the current survey year. However, these values have been included in the general specifications in the codebook on how the recoded variables were created. See additional details about this issue in the Organization of the Data File section of this codebook introduction.

NOTE: The following 16 variables are among all adult respondents who were asked the respective questions and are not confined to those respondents who were ultimately classified as having a Major Depressive Episode (MDE) in their lifetime or past year. To produce estimates among adults with MDE, the analysis will need to be restricted by either the lifetime MDE variable (IRAMDELT) or the past year MDE variable (IRAMDEYR).

Starting with the 2022 NSDUH, the following variable for saw/talk to other professional about depressive feelings in the past year, AOTHMDE2, re-classified some of the write-in responses (ADOTHSP) between a valid write-in response and system missing. The revised version of this variable (AOTHMDE2) was used starting with the 2022 Detailed Tables and the revision was retroactively applied to the 2021 variable.

AOTHMDE2 is defined as an adult as having seen or talked to another professional about MDE during the past year, AOTHMDE2=1, if s/he entered a valid write-in response other than the responses that matched existing categories (ADOTHSP=11, 13-14, 16-24, 26-32, 34-36, 38-45, 48, 607, 801).

An adult was classified as NOT having seen or talked to another professional about MDE during the past year, AOTHMDE2=0, if s/he met any of these conditions:

- 1. Reported NOT seeing or talking to a medical doctor or other professional during the past year (ADSEEDOC=2).
2. Response not entered for whether other mental health professional was seen or talked to during the past year (ADOTHHLPL=6).
3. Write-in response entered matched an existing category (ADOTHSP=1-10, 12).

(ADOTHHLPL, ADOTHSP, ADSEEDOC)

RECODED ADOLESCENT DEPRESSION

**RECODED ADOLESCENT DEPRESSION**

NOTE: The variables in this section are recoded variables that were created from one or more of the edited or recoded variables from the preceding sections.

NOTE: Certain source variables that were used to create recoded variables have valid values that might not have been reported or assigned for the current survey year. However, these values have been included in the general specifications in the codebook on how the recoded variables were created. See additional details about this issue in the Organization of the Data File section of this codebook introduction.

NOTE: Respondents were administered separate age-appropriate depression modules designed to measure whether or not respondents had experienced a major depressive episode (MDE) in their lifetime and past year. All adolescent (youth) respondents aged 12 to 17 were asked questions from the Adolescent Depression section. All adults aged 18 or older were administered the questions in the Adult Depression section.

Additional details on these adolescent depression recoded variables are provided in the Recoded Adolescent Depression Variable Documentation Appendix.

The following variable, YMDEL<sub>T</sub>, classifies an adolescent as having a major depressive episode (MDE) in their lifetime, YMDEL<sub>T</sub>=1, if they reported experiencing at least 5 out of the 9 criteria used to define an adolescent as having had MDE in their lifetime, where at least one of the criteria is a depressed mood or loss of interest or pleasure in daily activities (YODSMMDE=1). An adolescent was classified as NOT having a major depressive episode (MDE) in their lifetime, YMDEL<sub>T</sub>=2, if they met either of these conditions.

- Reported experiencing fewer than five out of the nine criteria used to define an adolescent as having had MDE in their lifetime (YODSMMDE=2).
- If the number of criteria used to define an adolescent as having had MDE in their lifetime is unknown (YODSMMDE=94, 97, 98) and the respondent reported at least one of the following:
  - Never having had a period of time lasting several days or longer when felt sad, empty, or depressed (YODPREV=2), discouraged or hopeless about how things were going in life (YODSCEV=2), and lost interest and became bored with most things usually enjoyable (YOLOSEV=2).
  - Experienced the feelings in (i), but they did not last most of the day, almost every day for two weeks or longer [YOLS<sub>I</sub>2WK=2 or YODPR2WK=2].
  - Experienced the feelings in (i) most of the day, almost every day for two weeks or longer, but the feelings lasted less than an hour when mood was most severe and frequent (YOWRHRS=1).
  - Experienced the feelings in (i) most of the day, almost every day for two weeks or longer for at least an hour during those times when mood was most severe and frequent, but the bad feelings were mild (YOWRDST=1), there was never a time when you felt so bad that nothing could cheer you up (YOWRCHR=4), and there was never a time when you felt so bad that you could not carry out your daily activities (YOWRIMP=4).
  - Experienced the feelings in (i) most of the day, almost every day for two weeks or longer for at least an hour with bad feelings that were more than mild or at some point could not be cheered up or could not carry out daily activities, but never had any other problems during those weeks, such as changes in sleep, eating, energy, the ability to keep mind on things, or feeling badly about self (YODPPROB=2).

Starting with the 2022 NSDUH, the following variable for saw/talk to other professional about depressive feelings in the past year, YOTHMDE2, re-classified some of the write-in responses (YOOTHSP) between a valid write-in response and system missing. The revised version of this variable (YOTHMDE2) was used starting with the 2022 Detailed Tables and the revision was retroactively applied to the 2021 variable.

YOTHMDE2 is defined as an adolescent having seen or talked to another professional about MDE during the past year, YOTHMDE2=1, if s/he entered a valid write-in response other than the responses that matched the existing categories (YOOTHSP=11, 13-14, 16-24, 26-32,34-36, 38-45, 48, 607, 801).

An adolescent was classified as NOT having seen or talked to another professional about MDE during the past year, YOTHMDE2=0, if s/he met either of these conditions:

1. Reported NOT seeing or talking to a medical doctor or other professional during the past year (YOSEEDOC=2).
2. Response not entered for whether other mental health professional was seen or talked to during the past year (YOOTHHLP=6).
3. Write-in response entered matched an existing category (YOOTHSP=1-10, 12).

(*YOOTHHLP, YOOTHSP, YOSEEDOC*)

YOTHMDE2 Len : 1 RC-YOUTH: SAW/TALK TO OTHER PROF ABOUT MDE IN PST YR  
 . = Aged 18+/Unknown/Legit Skip/Invalid Spec. Resp.  
 0 = No (See comment above)  
 1 = Yes (See comment above)

The following variable, YHLTMDE, indicates whether a youth reported seeing or talking to a health professional about MDE in the past year. Youths were classified as having seen or talked to a health professional, YHLTMDE=1, if they reported seeing or talking to any of the following professionals: general practitioner or family doctor (YDOCMDE=1); other medical doctor (YOMDMDE=1); psychologist (YPSY1MDE=1); psychiatrist or psychotherapist (YPSY2MDE=1); social worker (YSOCMDE=1); counselor (YCOUNMDE=1); other mental health professional (YOMHMDE=1); or nurse, occupational therapist, or other health professional (YNURSMDE=1). Respondents were classified as having not seen or talked to a health professional, YHLTMDE=0, if they reported not seeing or talking to all of the professionals listed above (source variable=0).

RECODED ADOLESCENT DEPRESSION

The following variable, YALTMDE, indicates whether a youth reported seeing or talking to an alternative service professional about MDE in the past year. Youths were classified as having seen or talked to an alternative service professional, YALTMDE=1, if they reported seeing or talking to any of the following professionals: religious or spiritual advisor (YRELMDE=1); or herbalist, chiropractor, acupuncturist, or massage therapist (YHBCHMDE=1). Respondents were classified as having not seen or talked to an alternative service professional, YALTMDE=0, if they reported not seeing or talking to all of the professionals listed above (source variable=0).

HEALTH

What is your best guess of how many times you have visited a doctor, nurse, physician assistant or nurse practitioner about your own health at a doctor's office, a clinic, or some other place in the past 12 months?

(HLTH19DK)  
NMVSOEST

- Len : 2 # TIMES VISITED DR ABOUT OWN HEALTH PST YR
- 0 = I have not visited a Dr in the past 12 mos
- 1 = 1 time
- 2 = 2-3 times
- 3 = 4-5 times
- 4 = 6-7 times
- 5 = 8-9 times
- 6 = 10-12 times
- 7 = 13-15 times
- 8 = 16 or more times
- 94 = DON'T KNOW
- 97 = REFUSED
- 98 = BLANK (NO ANSWER)
- 99 = LEGITIMATE SKIP

During the past 12 months, have you talked to a doctor, physician assistant, or nurse practitioner about your own health **over the phone, by email, or through video calling** instead of going to an in-person appointment?

(HLTHTELE)  
TELEAPTYR

- Len : 2 TALK TO DOC ABOUT HEALTH OVER PHONE/EMAIL/VIDEO PST 12 MOS
- 1 = Yes
- 2 = No
- 85 = BAD DATA Logically assigned
- 94 = DON'T KNOW
- 97 = REFUSED
- 98 = BLANK (NO ANSWER)

NOTE: Beginning in Quarter 4 of 2020, the routing logic for questions HLTH20 through HLTH23 was revised to include respondents who indicated talking to a doctor, physician assistant, or nurse practitioner about own health over the phone, by email, or through video calling instead of an in-person appointment (HLTHTELE=1). This change affects the following edited variables: HPUSETOB, HPUSEALC, HPUSEDRG, HPQTTOB, HPALCAMT, HPALCFRQ, HPALCPRB, HPALCCUT, HPALCTX, HPALCNOT, and HPDRGTALK.

During the past 12 months, did any doctor or other health care professional ask, either in person or on a form, if you:

a. Smoke cigarettes or use any other tobacco products?

(HLTH20A)  
HPUSETOB

- Len : 2 HEALTH PROF ASKED PST 12 MOS: TOBACCO USE
- 1 = Yes
- 2 = No
- 85 = BAD DATA Logically assigned
- 94 = DON'T KNOW
- 97 = REFUSED
- 98 = BLANK (NO ANSWER)
- 99 = LEGITIMATE SKIP

b. Drink alcohol?

(HLTH20B)  
HPUSEALC

- Len : 2 HEALTH PROF ASKED PST 12 MOS: ALCOHOL USE
- 1 = Yes
- 2 = No
- 85 = BAD DATA Logically assigned
- 94 = DON'T KNOW
- 97 = REFUSED
- 98 = BLANK (NO ANSWER)
- 99 = LEGITIMATE SKIP

HEALTH

c. Use marijuana or other illegal drugs?

(*HLTH20C*)  
HPUSEDRG

Len : 2 HEALTH PROF ASKED PST 12 MOS: DRUG USE  
1 = Yes  
2 = No  
85 = BAD DATA Logically assigned  
94 = DON'T KNOW  
97 = REFUSED  
98 = BLANK (NO ANSWER)  
99 = LEGITIMATE SKIP

NOTE: If respondents reported that they last smoked cigarettes, used smokeless tobacco, or smoked cigars more than 12 months prior to their interview date and they did not smoke pipe tobacco in the past 30 days (or never smoked pipe tobacco), codes of 93 in HPQTTTOB indicate that these respondents had not used tobacco products in the past 12 months. Respondents who smoked tobacco in a pipe in their lifetime were asked whether they did so in the past 30 days but they were not asked whether they smoked tobacco in a pipe more than 30 days ago but within the past 12 months. If respondents reported never using tobacco products or not using them in the past 12 months (including not smoking tobacco in a pipe in the past 30 days) and also that they did not have any health care visits in the past 12 months (emergency room visits, overnight hospitalizations, or outpatient visits, or telehealth encounters), indication that these respondents had not used tobacco products in the past 12 months or in their lifetime (as indicated by codes of 91 or 93) took precedence over assignment of codes to indicate that these respondents did not have any health care visits in the past 12 months. Codes of 99 in HPQTTTOB applied to respondents who used tobacco products in the past 12 months or whose status as a tobacco user in the past 12 months was unknown but who did not have any health care visits in the past 12 months.

During the past 12 months, did any doctor or other health care professional advise you to quit smoking cigarettes or quit using any other tobacco products?

(*HLTH21*)  
HPQTTTOB

Len : 2 HEALTH PROF ADVISED YOU TO QUIT TOBACCO USE  
1 = Yes  
2 = No  
85 = BAD DATA Logically assigned  
91 = NEVER USED TOBACCO PRODUCTS  
93 = DID NOT USE TOBACCO IN PAST 12 MOS (See note)  
94 = DON'T KNOW  
97 = REFUSED  
98 = BLANK (NO ANSWER)  
99 = LEGITIMATE SKIP (No health care visits pst 12 mos)

HEALTH

NOTE: In HPALCAMP, HPALCFRQ, HPALCPRB, HPALCCUT, HPALCTX, and HPALCNOT, if respondents reported never using alcohol or not using it in the past 12 months and also that they did not have any health care visits in the past 12 months (emergency room visits, overnight hospitalizations, outpatient visits, or telehealth encounters), indication that respondents never used alcohol or did not use it in the past 12 months (as indicated by codes of 91 or 93) took precedence over assignment of codes to indicate that these respondents did not have any health care visits in the past 12 months. Codes of 99 in these variables applied to respondents who used alcohol in the past 12 months or whose status as a past year alcohol user was unknown but who did not have any health care visits in the past 12 months.

Please think about all of the talks you have had with a doctor or other health care professional during the past 12 months when you answer this question. Choose the statement or statements below that describe any discussions you may have had in person with a doctor or other health professional about your alcohol use.

RECODED HEALTH

**RECODED HEALTH**

NOTE: The variables in this section are recoded variables that were created from one or more of the edited variables from the preceding section.

NOTE: Certain source variables that were used to create recoded variables have valid values that might not have been reported or assigned for the current survey year. However, these values have been included in the general specifications in the codebook on how the recoded variables were created. See additional details about this issue in the Organization of the Data File section of this codebook introduction.

(*PREGNANT*)

PREG Len : 1 RC-PREGNANT FEMALES AGED 12-44  
0 = Otherwise  
1 = Pregnant Females Aged 12-44 (PREGNANT=1)

3 = Last 3 Months of Pregnancy (PREG=1 & PREGMOS=7-9)  
4 = Males/Not Pregnant Females (PREG=0)

BMI was created from the variables WTPOUNDS and HTINCHES according to the formula of 703 times WTPOUNDS divided by the square of HTINCHES. BMI was set to a system missing value (unknown) if WTPOUNDS had a value of 9985, 9994, 9997, or 9998 or if HTINCHES had a value of 985, 994, 997, or 998.

(*HTINCHES, WTPOUNDS*)

BMI Len : 12 RC-BODY MASS INDEX (BMI)  
RANGE = 2.4561080933 - 2774.7246094  
. = Unknown (See comment above)

(*TELEPTYR*)

TELEPTYR2 Len : 1 RC-TALK TO DOC ABOUT VIRTUAL SERVICE TREATMENT-PAST YEAR  
. = Not Applicable/Unknown (Otherwise)  
0 = No (TELEPTYR=2)  
1 = Yes (TELEPTYR=1)

**EMERGING ISSUES**

*The values in this section may be inconsistent with values for variables in other sections of the interview. Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in earlier sections. Otherwise, variables in one section of the interview generally were not edited to make them consistent with variables in another section of the interview. This note applies to variables in this section marked by a<sup>1</sup>.*

## **Appendix C**

### **Nicotine Dependence and Substance Use Disorder**

## C.1 Introduction

The 2022 National Survey on Drug Use and Health (NSDUH) included questions that were designed to measure dependence on nicotine (cigarettes) and drug<sup>1</sup> or alcohol use disorder. Drug or alcohol use disorder is also referred to as substance use disorder (SUD). This appendix includes information on the definitions and coding specifications of the variables that measure nicotine dependence and SUD, along with weighting and variance estimation information. The variable specifications are provided for nicotine dependence and SUD, respectively, within separate sections of this appendix. For information about comparing NSDUH data between years, see Sections 6 and 9.1 in the main Introduction of the codebook.

### C.1.1 Nicotine (Cigarette) Dependence and SUD Measures

For nicotine (cigarettes), questions pertaining to dependence were based on criteria from the Nicotine Dependence Syndrome Scale (NDSS; Shiffman et al., 1995; Shiffman et al., 2004) and the Fagerstrom Test of Nicotine Dependence (FTND; Fagerstrom, 1978; Heatherton et al., 1991). These criteria were first used to measure nicotine dependence in NSDUH in 2003. However, the measure was based on the use of cigarettes only. Nicotine dependence was not measured for respondents who did not smoke cigarettes in the past month but used other products containing nicotine.

For substances other than nicotine, which include alcohol, marijuana, cocaine, heroin, hallucinogens, inhalants, methamphetamine, prescription pain relievers, prescription tranquilizers, prescription stimulants, and prescription sedatives, the 2022 questionnaire included SUD questions based on the *Diagnostic and Statistical Manual of Mental Disorders*, 5th edition (DSM-5; American Psychiatric Association, 2013). This includes respondents who reported use but not misuse of prescription drugs in the past year; they were asked questions about their substance use and could be classified as having an SUD based on those responses beginning in 2021.

Users of NSDUH data should also be aware that questions about the use of illegally made fentanyl (IMF) appeared after SUD questions in the 2022 NSDUH questionnaire. For this reason, overall SUD, drug use disorder, and opioid use disorder measures do not capture disorders currently characterized by only IMF use in the past year. See Section 3.4.2 in the *2022 National Survey on Drug Use and Health (NSDUH): Methodological Summary and Definitions* (Center for Behavioral Health Statistics and Quality [CBHSQ], 2023a) for additional information about the IMF questions.

The additional data from users but not misusers of prescription drugs led to the creation of new SUD outcome variables beginning in 2021. SUD outcome variables are available on the 2022 data file that are based on data from (1) misusers of prescription drugs, (2) users but not misusers of prescription drugs, and (3) any users of prescription drugs (i.e., the combination of the first two outcomes). The version of SUD variables based on data from any users of prescription drugs was the primary version of SUD used to generate estimates presented in the *Results from the 2022 National Survey on Drug Use and Health: Detailed Tables* (CBHSQ, 2023c) and in the *Key*

---

<sup>1</sup> Drugs include marijuana (including vaping), cocaine (including crack), heroin, hallucinogens, inhalants, methamphetamine, and any use of prescription psychotherapeutic drugs (i.e., pain relievers, tranquilizers, stimulants, and sedatives).

*Substance Use and Mental Health Indicators in the United States: Results from the 2022 National Survey on Drug Use and Health* report (CBHSQ, 2023b). The version of SUD variables based on data from people who misused prescription drugs and on data from people who used but did not misuse prescription drugs was not used to produce estimates presented in the 2022 Detailed Tables but was used to produce estimates in the 2022 Key Substance Use and Mental Health Indicators report. More information on the three versions of SUD variables is available later in this appendix in Sections C.3.8 through C.3.11.

### **C.1.2 SUD Severity Measures**

For substances other than nicotine, in addition to being used to classify respondents with an SUD, the DSM-5 criteria questions included in the 2022 NSDUH can also be used to classify the severity of an SUD. The severity of an SUD according to DSM-5 criteria is determined by the number of individual criteria recorded as positive for a particular substance (or category of substances).

- People were classified as having an SUD of mild severity if they met two or three SUD criteria for that substance.
- People were classified as having an SUD of moderate severity if they met four or five SUD criteria for that substance.
- People were classified in the severe SUD category if they met six or more SUD criteria for that substance.

In addition to the three levels of SUD severity for individual substances, measures of severity were created for aggregate SUD categories starting with the 2022 NSDUH. These aggregate SUD categories include the following: any SUD, drug use disorder, prescription drug use disorder, tranquilizer or sedative use disorder, opioid use disorder, and CNS stimulant use disorder. SUD severity measures for these aggregate SUD categories were defined from the maximum severity level (i.e., mild, moderate, or severe) across the multiple SUDs that were included in the category. For example, if people had a moderate alcohol use disorder and a mild marijuana (cannabis) use disorder as their only SUDs in the past year, then they were classified as having moderate SUD.

## **C.2 Nicotine (Cigarette) Dependence**

The 2022 NSDUH questions designed to assess nicotine (cigarette) dependence were based on the NDSS and the FTND. To identify patterns of nicotine (cigarette) dependence within the 2022 NSDUH data, indicator variables were created to measure dependence on nicotine through the use of cigarettes. Respondents were classified as being dependent if they met either the NDSS or the FTND criteria for dependence. There was no change in the questions or variables definitions for nicotine (cigarette) dependence for the 2022 NSDUH.

### **C.2.1 Nicotine Dependence Syndrome Scale (NDSS)**

The conceptual roots of the NDSS are similar to those behind the concept of dependence based on the *Diagnostic and Statistical Manual of Mental Disorders*, 4th edition (DSM-IV;

American Psychiatric Association, 1994; Edwards & Gross, 1976). The 2022 NSDUH contains 19 NDSS questions that address five aspects of dependence:

1. Smoking drive (compulsion to smoke driven by nicotine craving and withdrawal)
  - a. After not smoking for a while, you need to smoke in order to feel less restless and irritable (CIGIRTBL)
  - b. When you don't smoke for a few hours, you start to crave cigarettes (CIGCRAVE)
  - c. You sometimes have strong cravings for a cigarette where it feels like you're in the grip of a force you can't control (CIGCRAGP)
  - d. You feel a sense of control over your smoking - that is, you can "take it or leave it" at any time (CIGINCTL)
  - e. You sometimes worry that you will run out of cigarettes (CIGRNOUT)
2. Nicotine tolerance
  - a. Since you started smoking, the amount you smoke has increased (CIGINCRS)
  - b. Compared to when you first started smoking, you need to smoke a lot more now in order to be satisfied (CIGSATIS)
  - c. Compared to when you first started smoking, you can smoke much, much more now before you start to feel anything (CIGLOTMR)
3. Continuous smoking
  - a. You smoke cigarettes fairly regularly throughout the day (CIGREGDY)
  - b. You smoke about the same amount on weekends as on weekdays (CIGREGWK)
  - c. You smoke just about the same number of cigarettes from day to day (CIGREGNM)
  - d. It's hard to say how many cigarettes you smoke per day because the number often changes (CIGNMCHG)
  - e. It's normal for you to smoke several cigarettes in an hour, then not have another one until hours later (CIGSVLHR)
4. Behavioral priority (preferring smoking over other reinforcing activities)
  - a. You tend to avoid places that don't allow smoking, even if you would otherwise enjoy them (CIGAVOID)
  - b. There are times when you choose not to be around your friends who don't smoke because they won't like it if you smoke (CIGFNLKE)
  - c. Even if you're traveling a long distance, you'd rather not travel by airplane because you wouldn't be allowed to smoke (CIGPLANE)
5. Stereotypy (fixed patterns of smoking)
  - a. Do you have any friends who do not smoke cigarettes (CIGFN SMK)
  - b. The number of cigarettes you smoke per day is often influenced by other things - how you're feeling, or what you're doing, for example (CIGINFLU)
  - c. Your smoking is not affected much by other things. For example, you smoke about the same amount whether you're relaxing or working, happy or sad, alone or with others (CIGNOINF).

Each of these five domains can be assessed as separate measures, but an average score across all domains also can be obtained for overall nicotine dependence (Shiffman et al., 2004). In accordance with the scoring methods described by Shiffman and colleagues, the NDSS algorithm

for calculating this average score was based on the respondent's answers to 17 of the 19 questions listed above. The items regarding nonsmoking friends (4b - CIGFNLKE and 5a - CIGFNSMK) were excluded due to higher item nonresponse rates.

Responses to items CIGIRTBL, CIGCRAVE, CIGCRAGP, CIGAVOID, CIGPLANE, CIGRNOUT, CIGREGDY, CIGREGWK, CIGREGNM, CIGNOINF, CIGINCRS, CIGSATIS, and CIGLOTMR were coded from 1 to 5, where

- 1=Not at all true,
- 2=Somewhat true,
- 3=Moderately true,
- 4=Very true, and
- 5=Extremely true.

Responses to items CIGINCTL, CIGNMCHG, CIGSVLHR, and CIGINFLU were reverse coded from 5 to 1, where

- 5=Not at all true,
- 4=Somewhat true,
- 3=Moderately true,
- 2=Very true, and
- 1=Extremely true.

For respondents who reported smoking cigarettes in the past month, the total NDSS score was calculated as the sum of the recoded responses to the previous 17 questions. A respondent was classified as nicotine dependent, NDSSDEPND=1, if the total NDSS score was greater than or equal to 46.75 (corresponding to an average score of 2.75), regardless of whether any of the 17 NDSS questions were missing. If a respondent provided a response to all 17 questions and the total NDSS score was less than 46.75, then the respondent was determined to be nondependent, NDSSDEPND=0, based on the NDSS. If a respondent was missing at least 1 of the 17 questions but the sum of the nonmissing items plus the number of questions with missing data multiplied by 5 was less than 46.75, then the respondent was also determined to be nondependent, NDSSDEPND=0, based on the NDSS. Otherwise, NDSSDEPND was set to missing for past month users of cigarettes. The average NDSS threshold of 2.75 was derived by the scale developers by examining the distribution of scores in other samples of smokers who were administered the NDSS, including a contrast of scores obtained for nondependent smokers (chippers) versus heavy smokers (Shiffman et al., 1994).

### **C.2.2 Fagerstrom Test of Nicotine Dependence (FTND)**

The FTND is a multi-item measure of dependence, but much of its ability to determine dependent smokers derives from a single item assessing how soon after waking smokers have their first cigarette (Heatherton et al., 1989). Because most nicotine is cleared from the bloodstream overnight, smokers typically wake in nicotine deprivation, and rapid movement to smoke is considered a sign of dependence. Respondents who reported smoking cigarettes in the past month were classified as nicotine dependent based on the FTND, FTNDDEPND=1, if the first cigarette smoked was within 30 minutes of waking up on the days they smoked (CIGWAKE=1 or 2). Past

month users of cigarettes who reported smoking their first cigarette more than 30 minutes after waking up on the days they smoked (CIGWAKE=3 or 4) were determined to be nondependent, FTNDDEPN=0, based on the FTND. Otherwise, FTNDDEPN was set to missing for past month users of cigarettes.

### **C.2.3 Overall Nicotine (Cigarette) Dependence**

Using both the NDSS and the FTND measures, respondents were classified as having nicotine (cigarette) dependence in the past month, PMNICDEP=1, if they met either the NDSS (NDSSDEPN=1) or FTND (FTNDDEPN=1) criteria for dependence. A past month cigarette user was determined to be nondependent in the past month if NDSSDEPN=0 and FTNDDEPN=0. Otherwise, nicotine dependence status was unknown for past month cigarette users.

Starting with the 2021 NSDUH, missing values in the composite recode, PMNICDEP, were replaced using statistical imputation. The imputed variable for nicotine dependence, IRPMNICDEP, was used to create estimates presented in the 2022 Detailed Tables (CBHSQ, 2023c). For more information on the imputation of nicotine dependence, see the *2022 National Survey on Drug Use and Health (NSDUH) Methodological Resource Book, Section 10: Editing and Imputation Report* (CBHSQ, forthcoming).

## **C.3 SUD**

Beginning in 2021, all respondents received SUD questions that were based on the DSM-5. Missing values for the SUD and SUD severity measures for alcohol, marijuana, cocaine, heroin, inhalants, hallucinogens, methamphetamine, pain relievers, stimulants, sedatives, and tranquilizers were replaced with valid response categories using statistical imputation. However, the individual SUD criteria variables for a given substance were not imputed and may contain missing values.

This section describes the recodes for the individual SUD measures. Listed below are the definitions used for each of the individual SUD measures along with the corresponding severity variable names. Specific notes about any inconsistency issues for each measure are also included. Additional variables that were created using a combination of these individual SUD measures are described in Section C.4 and are also listed in the body of the codebook.

### **C.3.1 ALCOHOL**

To be classified with alcohol use disorder, IRPYUD5ALC, a respondent must have met two or more of the following alcohol criteria in the past year. More specifically, respondents with two or three criteria are considered to have “mild” disorder (IRPYSEV5ALC=1); respondents with four or five criteria are considered to have “moderate” disorder (IRPYSEV5ALC=2); and respondents with six or more criteria are considered to have “severe” disorder (IRPYSEV5ALC=3).

- (1) Ended up drinking alcohol many times in larger amounts or for a longer time than intended (UDALLRGAMTS=1)

- (2) One or more times tried and was unable to cut down or stop drinking alcohol or wished could cut down or stop drinking alcohol (UDALNOTSTOP=1 or UDALWSHSTOP=1)
- (3) Spent a great deal of time drinking alcohol, feeling its effects, or getting over the effects of drinking, or trying to get alcohol (UDALTIMEGET=1 or UDALTIMEUSE=1)
- (4) Wanted to use alcohol so badly could not think of anything else (UDALWANTBAD=1) or had a strong urge to use alcohol (UDALSTRURGE=1)
- (5) Serious problems at work, school, or home, such as
  - missing a lot of work or school
  - getting demoted, having your hours cut, or losing a job
  - not being able to get a job or keep a job
  - getting suspended, expelled, or dropping out of school
  - failing to take care of family (UDALWORKPRB=1)
- (6) Problems with family or friends that were caused or made worse by using alcohol (UDALFMLYPRB=1) and continued to use alcohol even though it often caused arguments or problems with family or friends (UDALFMLYCTD=1)
- (7) Gave up or spent a lot less time doing important social, occupational, or recreational activities because of alcohol use (UDALSTOPACT=1)
- (8) Repeatedly got into situations where drinking alcohol increased your chances of getting physically hurt (UDALGETHURT=1)
- (9) Continued to use alcohol even though it was causing problems with emotions, mental health, or physical health, or drinking gave you repeated blackouts (UDALMNTLCTD=1 or UDALHLTHCTD=1 or UDALBLCKCTD=1)
- (10) Needed to drink a lot more alcohol to get the desired feeling, or drinking the same amount had less of an effect (UDALNEEDMOR=1 or UDALLESSEFF=1)
- (11) Reported experiencing two or more alcohol withdrawal symptoms after alcohol use was cut back or stopped or respondent used the same or similar substance to avoid having alcohol withdrawal symptoms during the past 12 months. Symptoms include (i) sweating or feeling that heart was beating fast (UDALWDSWEAT=1); (ii) having hands tremble (UDALWDTRMBL=1); (iii) having trouble sleeping (UDALWDSLEEP=1); (iv) vomiting or feeling nauseous (UDALWDVOMIT=1); (v) seeing, hearing, or feeling things that were not really there (UDALWDHALUC=1); (vi) feeling like could not sit still (UDALWDSITST=1); (vii) feeling anxious (UDALWDFLANX=1); and (viii) having seizures or fits (UDALWDSZURE=1). Substances used to avoid withdrawal symptoms could include alcohol (UDALAVWALCO=1) or prescription sedatives, tranquilizers, sleeping pills, or downers (UDALAVWSVTR=1).

Note: Respondents who reported past year alcohol use but indicated use of alcohol on 5 or fewer days in the past year were not asked the questions on alcohol use disorder. However, respondents who reported past year alcohol use and had a missing value for the number of days they used alcohol in the past year were asked the questions on alcohol use disorder. Therefore, it is possible for a respondent to have been imputed to have used alcohol on 5 or fewer days in the past year according to IRALCFY but to be classified as having a past year substance use disorder of alcohol.

### C.3.2 MARIJUANA

To be classified with marijuana use disorder, IRPYUD5MRJ, a respondent must have met two or more of the following marijuana criteria in the past year. More specifically, respondents with two or three criteria are considered to have “mild” disorder (IRPYSEV5MRJ=1); respondents with four or five criteria are considered to have “moderate” disorder (IRPYSEV5MRJ=2); and respondents with six or more criteria are considered to have “severe” disorder (IRPYSEV5MRJ=3).

- (1) Ended up using marijuana many times in larger amounts or for a longer time than intended (UDMJLRGAMTS=1)
- (2) One or more times tried and was unable to cut down or stop using marijuana or wished could cut down or stop using marijuana (UDMJNOTSTOP=1 or UDMJWSHSTOP=1)
- (3) Spent a great deal of time using marijuana, feeling its effects, or getting over the effects, or trying to get marijuana (UDMJTIMEGET=1 or UDMJTIMEUSE=1)
- (4) Wanted to use marijuana so badly could not think of anything else (UDMJWANTBAD=1) or had a strong urge to use marijuana (UDMJSTRURGE=1)
- (5) Serious problems at work, school, or home, such as
  - missing a lot of work or school
  - getting demoted, having your hours cut, or losing a job
  - not being able to get a job or keep a job
  - getting suspended, expelled, or dropping out of school
  - failing to take care of family (UDMJWORKPRB=1)
- (6) Problems with family or friends that were caused or made worse by using marijuana (UDMJFMLYPRB=1) and continued to use marijuana even though it often caused arguments or problems with family or friends (UDMJFMLYCTD=1)
- (7) Gave up or spent a lot less time doing important social, occupational, or recreational activities because of marijuana use (UDMJSTOPACT=1)
- (8) Repeatedly got into situations where using marijuana increased your chances of getting physically hurt (UDMJGETHURT=1)
- (9) Continued to use marijuana even though it was causing problems with emotions, mental health, or physical health (UDMJMNTLCTD=1 or UDMJHLTHCTD=1)
- (10) Needed to use marijuana a lot more to get the desired feeling, or use of the same amount had less of an effect (UDMJNEEDMOR=1 or UDMJLESSEFF=1)
- (11) Reported experiencing three or more marijuana withdrawal symptoms after marijuana use was cut back or stopped or respondent used the same or similar substance to avoid having marijuana withdrawal symptoms during the past 12 months. Symptoms include (i) feeling irritable or angry (UDMJWDANGRY=1); (ii) feeling anxious or nervous (UDMJWDFLANX=1); (iii) having trouble sleeping (UDMJWDSLEEP=1); (iv) losing your appetite or losing weight without trying to (UDMJWDAPPET=1); (v) feeling like you couldn't sit still (UDMJWDSITST=1); (vi) feeling depressed (UDMJWDDEPRS=1); and experiencing at least one for the following physical symptoms: stomach ache (UDMJWDSTMCH=1), shaking or tremors (UDMJWDSHAKE=1), sweating (UDMJWDSWEAT=1), fever (UDMJWDFEVER=1), chills (UDMJWDCHILL=1), or headache

(UDMJWDHEDAC=1). Substances used to avoid withdrawal symptoms could include marijuana, hashish, or another cannabis product (UDMJAVWMARJ=1).

Note: Respondents who reported past year marijuana use but indicated use of marijuana on 5 or fewer days in the past year were not asked the questions on marijuana use disorder. However, respondents who reported past year marijuana use and had a missing value for the number of days they used marijuana in the past year were asked the questions on marijuana use disorder. Therefore, it is possible for a respondent to have been imputed to have used marijuana on 5 or fewer days in the past year according to IRMJFY but to be classified as having a past year substance use disorder of marijuana.

### **C.3.3 COCAINE**

To be classified with cocaine use disorder, IRPYUD5COC, a respondent must have met two or more of the following cocaine criteria in the past year. More specifically, respondents with two or three criteria are considered to have “mild” disorder (IRPYSEV5COC=1); respondents with four or five criteria are considered to have “moderate” disorder (IRPYSEV5COC=2); and respondents with six or more criteria are considered to have “severe” disorder (IRPYSEV5COC=3).

- (1) Ended up using cocaine many times in larger amounts or for a longer time than intended (UDCCLRGAMTS=1)
- (2) One or more times tried and was unable to cut down or stop using cocaine or wished could cut down or stop using cocaine (UDCCNOTSTOP=1 or UDCCWSHSTOP=1)
- (3) Spent a great deal of time using cocaine, feeling its effects, or getting over the effects, or trying to get cocaine (UDCCTIMEGET=1 or UDCCTIMEUSE=1)
- (4) Wanted to use cocaine so badly could not think of anything else (UDCCWANTBAD=1) or had a strong urge to use cocaine (UDCCSTRURGE=1)
- (5) Serious problems at work, school, or home, such as
  - missing a lot of work or school
  - getting demoted, having your hours cut, or losing a job
  - not being able to get a job or keep a job
  - getting suspended, expelled, or dropping out of school
  - failing to take care of family (UDCCWORKPRB=1)
- (6) Problems with family or friends that were caused or made worse by using cocaine (UDCCFMLYPRB=1) and continued to use cocaine even though it often caused arguments or problems with family or friends (UDCCFMLYCTD=1)
- (7) Gave up or spent a lot less time doing important social, occupational, or recreational activities because of cocaine use (UDCCSTOPACT=1)
- (8) Repeatedly got into situations where using cocaine increased your chances of getting physically hurt (UDCCGETHURT=1)
- (9) Continued to use cocaine even though it was causing problems with emotions, mental health, or physical health (UDCCMNTLCTD=1 or UDCCHLTHCTD=1)
- (10) Needed to use cocaine a lot more to get the desired feeling, or use of the same amount had less of an effect (UDCCNEEDMOR=1 or UDCCLESSEFF=1)

- (11) Reported at least one of the following: (1) feeling blue or down when trying to stop or cut down using cocaine (UDCCWDFLBU=1) as well as experiencing two or more additional cocaine withdrawal symptoms (listed below) after cocaine use was cut back or stopped; or (2) having used the same or similar substance to avoid having cocaine withdrawal symptoms during the past 12 months. Symptoms include (i) feeling tired or exhausted (UDCCWDTIRED=1), (ii) having bad dreams (UDCCWDDREAM=1), (iii) having trouble sleeping or sleeping more than normal (UDCCWDSLEEP=1), (iv) feeling hungry more often (UDCCWDHNGRY=1), and (v) feeling either very slowed down or like could not sit still (UDCCWDSITST=1). Substances used to avoid withdrawal symptoms could include cocaine (UDCCAVWCOCN=1), methamphetamine (UDCCAVWMETH=1), or prescription stimulants or uppers (UDCCAVWSTIM=1).

Note: Respondents could answer the cocaine use disorder questions if they reported injecting cocaine with a needle in the past year in the special drugs section, even if they reported not using cocaine in the past year in the cocaine section. Thus, situations may exist where respondents were classified as having a cocaine use disorder, even though they had not used cocaine in the past year according to the imputed recency variable (IRCOCRC).

### **C.3.4 HEROIN**

To be classified with heroin use disorder, IRPYUD5HER, a respondent must have met two or more of the following heroin criteria in the past year. More specifically, respondents with two or three criteria are considered to have “mild” disorder (IRPYSEV5HER=1); respondents with four or five criteria are considered to have “moderate” disorder (IRPYSEV5HER=2); and respondents with six or more criteria are considered to have “severe” disorder (IRPYSEV5HER=3).

- (1) Ended up using heroin many times in larger amounts or for a longer time than intended (UDHELRGAMTS=1)
- (2) One or more times tried and was unable to cut down or stop using heroin or wished could cut down or stop using heroin (UDHENOTSTOP=1 or UDHEWSHSTOP=1)
- (3) Spent a great deal of time using heroin, feeling its effects, or getting over the effects, or trying to get heroin (UDHETIMEGET=1 or UDHETIMEUSE=1)
- (4) Wanted to use heroin so badly could not think of anything else (UDHEWANTBAD=1) or had a strong urge to use heroin (UDHESTRURGE=1)
- (5) Serious problems at work, school, or home, such as
  - missing a lot of work or school
  - getting demoted, having your hours cut, or losing a job
  - not being able to get a job or keep a job
  - getting suspended, expelled, or dropping out of school
  - failing to take care of family (UDHEWORKPRB=1)
- (6) Problems with family or friends that were caused or made worse by using heroin (UDHEFMLYPRB=1) and continued to use heroin even though it often caused arguments or problems with family or friends (UDHEFMLYCTD=1)
- (7) Gave up or spent a lot less time doing important social, occupational, or recreational activities because of heroin use (UDHESTOPACT=1)

- (8) Repeatedly got into situations where using heroin increased your chances of getting physically hurt (UDHEGETHURT=1)
- (9) Continued to use heroin even though it was causing problems with emotions, mental health, or physical health (UDHEMNTLCTD=1 or UDHEHLTHCTD=1)
- (10) Needed to use heroin a lot more to get the desired feeling, or use of the same amount had less of an effect (UDHENEEDMOR=1 or UDHELESSEFF=1)
- (11) Reported experiencing three or more heroin withdrawal symptoms after heroin use was cut back or stopped or respondent used the same or similar substance to avoid having heroin withdrawal symptoms during the past 12 months. Symptoms include (i) feeling kind of blue or down (UDHEWDFLBLU=1); (ii) vomiting or feeling nauseous (UDHEWDVOMIT=1); (iii) having cramps or muscle aches (UDHEWDCRAMP=1); (iv) having teary eyes or a runny nose (UDHEWDRUNNY=1); (v) feeling sweaty, having enlarged eye pupils, or having body hair standing up on skin (UDHEWDSWEAT=1); (vi) having diarrhea (UDHEWDDIARR=1); (vii) yawning (UDHEWDYAWNS=1); (viii) having a fever (UDHEWDFEVER=1); and (ix) having trouble sleeping (UDHEWDSLEEP=1). Substances used to avoid withdrawal symptoms could include heroin (UDHEAVWHERN=1) or prescriptions pain relievers (UDHEAVWPNRL=1).

Note: Respondents could answer the heroin use disorder questions if they reported injecting with a needle, smoking, sniffing, or snorting heroin in the past year in the special drugs section, even if they reported not using heroin in the past year in the heroin section. Thus, situations may exist where respondents were classified as having a heroin use disorder, even though they had not used heroin in the past year according to the imputed recency variable (IRHERRC).

### **C.3.5 HALLUCINOGENS**

To be classified with hallucinogen use disorder, IRPYUD5HAL, a respondent must have met two or more of the following hallucinogen criteria in the past year. More specifically, respondents with two or three criteria are considered to have “mild” disorder (IRPYSEV5HAL=1); respondents with four or five criteria are considered to have “moderate” disorder (IRPYSEV5HAL=2); and respondents with six or more criteria are considered to have “severe” disorder (IRPYSEV5HAL=3).

- (1) Ended up using hallucinogens many times in larger amounts or for a longer time than intended (UDHALRGAMTS=1)
- (2) One or more times tried and was unable to cut down or stop using hallucinogens or wished could cut down or stop using hallucinogens (UDHANOTSTOP=1 or UDHAWSHSTOP=1)
- (3) Spent a great deal of time using hallucinogens, feeling its effects, or getting over the effects, or trying to get hallucinogens (UDHATIMEGET=1 or UDHATIMEUSE=1)
- (4) Wanted to use hallucinogens so badly could not think of anything else (UDHAWANTBAD=1) or had a strong urge to use hallucinogens (UDHASTRURGE=1)
- (5) Serious problems at work, school, or home, such as
  - missing a lot of work or school

- getting demoted, having your hours cut, or losing a job
  - not being able to get a job or keep a job
  - getting suspended, expelled, or dropping out of school
  - failing to take care of family  
(UDHAWORKPRB=1)
- (6) Problems with family or friends that were caused or made worse by using hallucinogens (UDHAFMLYPRB=1) and continued to use hallucinogens even though it often caused arguments or problems with family or friends (UDHAFMLYCTD=1)
  - (7) Gave up or spent a lot less time doing important social, occupational, or recreational activities because of hallucinogen use (UDHASTOPACT=1)
  - (8) Repeatedly got into situations where using hallucinogens increased your chances of getting physically hurt (UDHAGETHURT=1)
  - (9) Continued to use hallucinogens even though it was causing problems with emotions, mental health, or physical health (UDHAMNTLCTD=1 or UDHAHLTHCTD=1)
  - (10) Needed to use hallucinogens a lot more to get the desired feeling, or use of the same amount had less of an effect (UDHANEEDMOR=1 or UDHALESSEFF=1)

### **C.3.6 INHALANTS**

To be classified with inhalant use disorder, IRPYUD5INH, a respondent must have met two or more of the following inhalant criteria in the past year. More specifically, respondents with two or three criteria are considered to have “mild” disorder (IRPYSEV5INH=1); respondents with four or five criteria are considered to have “moderate” disorder (IRPYSEV5INH=2); and respondents with six or more criteria are considered to have “severe” disorder (IRPYSEV5INH=3).

- (1) Ended up using inhalants many times in larger amounts or for a longer time than intended (UDINLRGAMTS=1)
- (2) One or more times tried and was unable to cut down or stop using inhalants or wished could cut down or stop using inhalants (UDINNOTSTOP=1 or UDINWSHSTOP=1)
- (3) Spent a great deal of time using inhalants, feeling its effects, or getting over the effects, or trying to get inhalants (UDINTIMEGET=1 or UDINTIMEUSE=1)
- (4) Wanted to use inhalants so badly could not think of anything else (UDINWANTBAD=1) or had a strong urge to use inhalants (UDINSTRURGE=1)
- (5) Serious problems at work, school, or home, such as
  - missing a lot of work or school
  - getting demoted, having your hours cut, or losing a job
  - not being able to get a job or keep a job
  - getting suspended, expelled, or dropping out of school
  - failing to take care of family  
(UDINWORKPRB=1)
- (6) Problems with family or friends that were caused or made worse by using inhalants (UDINFMLYPRB=1) and continued to use inhalants even though it often caused arguments or problems with family or friends (UDINFMLYCTD=1)
- (7) Gave up or spent a lot less time doing important social, occupational, or recreational activities because of inhalant use (UDINSTOPACT=1)

- (8) Repeatedly got into situations where using inhalants increased your chances of getting physically hurt (UDINGETHURT=1)
- (9) Continued to use inhalants even though it was causing problems with emotions, mental health, or physical health (UDINMNTLCTD=1 or UDINHLTHCTD=1)
- (10) Needed to use inhalants a lot more to get the desired feeling, or use of the same amount had less of an effect (UDINNEEDMOR=1 or UDINLESSEFF=1)

### **C.3.7 METHAMPHETAMINE**

To be classified with methamphetamine use disorder, IRPYUD5MTH, a respondent must have met two or more of the following methamphetamine criteria in the past year. More specifically, respondents with two or three criteria are considered to have “mild” disorder (IRPYSEV5MTH=1); respondents with four or five criteria are considered to have “moderate” disorder (IRPYSEV5MTH=2); and respondents with six or more criteria are considered to have “severe” disorder (IRPYSEV5MTH=3).

- (1) Ended up using methamphetamine many times in larger amounts or for a longer time than intended (UDMELRGAMTS=1)
- (2) One or more times tried and was unable to cut down or stop using methamphetamine or wished could cut down or stop using methamphetamine (UDMENOTSTOP=1 or UDMEWSHSTOP=1)
- (3) Spent a great deal of time using methamphetamine, feeling its effects, or getting over the effects, or trying to get methamphetamine (UDMETIMEGET=1 or UDMETIMEUSE=1)
- (4) Wanted to use methamphetamine so badly could not think of anything else (UDMEWANTBAD=1) or had a strong urge to use methamphetamine (UDMESTRURGE=1)
- (5) Serious problems at work, school, or home, such as
  - missing a lot of work or school
  - getting demoted, having your hours cut, or losing a job
  - not being able to get a job or keep a job
  - getting suspended, expelled, or dropping out of school
  - failing to take care of family
 (UDMEWORKPRB=1)
- (6) Problems with family or friends that were caused or made worse by using methamphetamine (UDMEFMLYPRB=1) and continued to use methamphetamine even though it often caused arguments or problems with family or friends (UDMEFMLYCTD=1)
- (7) Gave up or spent a lot less time doing important social, occupational, or recreational activities because of methamphetamine use (UDMESTOPACT=1)
- (8) Repeatedly got into situations where using methamphetamine increased your chances of getting physically hurt (UDMEGETHURT=1)
- (9) Continued to use methamphetamine even though it was causing problems with emotions, mental health, or physical health (UDMEMNTLCTD=1 or UDMEHLTHCTD=1)
- (10) Needed to use methamphetamine a lot more to get the desired feeling, or use of the same amount had less of an effect (UDMENEEDMOR=1 or UDMELESSEFF=1)

- (11) Reported at least one of the following: (1) feeling blue or down when trying to stop or cut down using methamphetamine (UDMEWDFLBLU=1) as well as experiencing two or more additional methamphetamine withdrawal symptoms (listed below) after methamphetamine use was cut back or stopped; or (2) having used the same or similar substance to avoid having methamphetamine withdrawal symptoms during the past 12 months. Symptoms include (i) feeling tired or exhausted (UDMEWDTIRED=1), (ii) having bad dreams (UDMEWDDREAM=1), (iii) having trouble sleeping or sleeping more than normal (UDMEWDSLEEP=1), (iv) feeling hungry more often (UDMEWDHNGRY=1), and (v) feeling either very slowed down or like could not sit still (UDMEWDSITST=1). Substances used to avoid withdrawal symptoms could include methamphetamine (UDMEAVWMETH=1), cocaine or crack (UDMEAVWCOCN=1), or prescription stimulants or uppers (UDMEAVWSTIM=1).

Note: Respondents could answer the methamphetamine use disorder questions if they reported injecting methamphetamine with a needle in the past year in the special drugs section, even if they reported not using methamphetamine in the past year in the methamphetamine section. Thus, situations may exist where respondents were classified as having a methamphetamine use disorder, even though they had not used methamphetamine in the past year according to the imputed recency variable (IRMETHAMREC).

### **C.3.8 PRESCRIPTION PAIN RELIEVERS**

Past year misusers of prescription pain relievers are classified with prescription pain reliever use disorder (IRUD5PNRMIS=1) if they met two or more of the following prescription pain reliever criteria in the past year. More specifically, past year misusers with two or three criteria are considered to have “mild” disorder (IRSEVPNRMIS=1); past year misusers with four or five criteria are considered to have “moderate” disorder (IRSEVPNRMIS=2); and past year misusers with six or more criteria are considered to have “severe” disorder (IRSEVPNRMIS=3). For past year users but not misusers of prescription pain relievers, the number of positive criteria required to classify a respondent with disorder (IRUD5PNRUNM) and to define disorder severity (IRSEVPNRUNM) are the same as for past year misusers. However, criteria 10 and 11 in the list below do not apply to respondents who used but did not misuse prescription drugs in the past year because tolerance and withdrawal can occur as normal physiological adaptations when people use these prescription drugs appropriately under medical supervision. Two additional recodes that include data from all past year users of prescription pain relievers, UDYR5PNRANY and SEVYRPNRANY, are also included on the data file. For past year misusers, UDYR5PNRANY and SEVYRPNRANY will equal IRUD5PNRMIS and IRSEVPNRMIS, respectively. For past year users but not misusers, UDYR5PNRANY and SEVYRPNRANY will equal IRUD5PNRUNM and IRSEVPNRUNM, respectively.

- (1) Ended up using pain relievers many times in larger amounts or for a longer time than intended (UDPRLRGAMTS=1)
- (2) One or more times tried and was unable to cut down or stop using pain relievers or wished could cut down or stop using pain relievers (UDPRNOTSTOP=1 or UDPRWSHSTOP=1)
- (3) Spent a great deal of time using pain relievers, feeling its effects, or getting over the effects, or trying to get pain relievers (UDPRTIMEGET=1 or UDPRTIMEUSE=1)

- (4) Wanted to use pain relievers so badly could not think of anything else (UDPRWANTBAD=1) or had a strong urge to use pain relievers (UDPRSTRURGE=1)
- (5) Serious problems at work, school, or home, such as
  - missing a lot of work or school
  - getting demoted, having your hours cut, or losing a job
  - not being able to get a job or keep a job
  - getting suspended, expelled, or dropping out of school
  - failing to take care of family (UDPRWORKPRB=1)
- (6) Problems with family or friends that were caused or made worse by using pain relievers (UDPRFMLYPRB=1) and continued to use pain relievers even though it often caused arguments or problems with family or friends (UDPRFMLYCTD=1)
- (7) Gave up or spent a lot less time doing important social, occupational, or recreational activities because of pain reliever use (UDPRSTOPACT=1)
- (8) Repeatedly got into situations where using pain relievers increased your chances of getting physically hurt (UDPRGETHURT=1)
- (9) Continued to use pain relievers even though it was causing problems with emotions, mental health, or physical health (UDPRMNTLCTD=1 or UDPRHLTHCTD=1)
- (10) Needed to use pain relievers a lot more to get the desired feeling, or use of the same amount had less of an effect (UDPRNEEDMOR=1 or UDPRLESSEFF=1)
- (11) Reported experiencing three or more pain reliever withdrawal symptoms after pain reliever use was cut back or stopped or respondent used the same or similar substance to avoid having pain reliever withdrawal symptoms during the past 12 months. Symptoms include (i) feeling kind of blue or down (UDPRWDFLBLU=1); (ii) vomiting or feeling nauseous (UDPRWDVOMIT=1); (iii) having cramps or muscle aches (UDPRWDCRAMP=1); (iv) having teary eyes or a runny nose (UDPRWDRUNNY=1); (v) feeling sweaty, having enlarged pupils, or having body hair standing up on skin (UDPRWDSWEAT=1); (vi) having diarrhea (UDPRWDDIARR=1); (vii) yawning (UDPRWDYAWNS=1); (viii) having a fever (UDPRWDFEVER=1); and (ix) having trouble sleeping (UDPRWDSLEEP=1). Substances used to avoid withdrawal symptoms could include prescription pain relievers (UDPRAVWP NRL=1) or heroin (UDPRAVWHERN=1).

### **C.3.9 PRESCRIPTION TRANQUILIZERS**

Past year misusers of prescription tranquilizers are classified with prescription tranquilizer use disorder (IRUD5TRQMIS=1) if they met two or more of the following prescription tranquilizer criteria in the past year. More specifically, past year misusers with two or three criteria are considered to have “mild” disorder (IRSEVTRQMIS=1); past year misusers with four or five criteria are considered to have “moderate” disorder (IRSEVTRQMIS=2); and past year misusers with six or more criteria are considered to have “severe” disorder (IRSEVTRQMIS=3). For past year users but not misusers of prescription tranquilizers, the number of positive criteria required to classify a respondent with disorder (IRUD5TRQUNM) and to define disorder severity (IRSEVTRQUNM) are the same as for past year misusers. However, criteria 10 and 11 in the list below do not apply to respondents who used but did not misuse prescription drugs in the past year because tolerance and withdrawal can occur as normal physiological adaptations when people use

these prescription drugs appropriately under medical supervision. Two additional recodes that include data from all past year users of prescription tranquilizers, UDYR5TRQANY and SEVYRTRQANY, are also included on the data file. For past year misusers, UDYR5TRQANY and SEVYRTRQANY will equal IRUD5TRQMIS and IRSEVTRQMIS, respectively. For past year users but not misusers, UDYR5TRQANY and SEVYRTRQANY will equal IRUD5TRQUNM and IRSEVTRQUNM, respectively.

- (1) Ended up using tranquilizers many times in larger amounts or for a longer time than intended (UDTRLRGAMTS=1)
- (2) One or more times tried and was unable to cut down or stop using tranquilizers or wished could cut down or stop using tranquilizers (UDTRNOTSTOP=1 or UDTRWSHSTOP=1)
- (3) Spent a great deal of time using tranquilizers, feeling its effects, or getting over the effects, or trying to get tranquilizers (UDTRTIMEGET=1 or UDTRTIMEUSE=1)
- (4) Wanted to use tranquilizers so badly could not think of anything else (UDTRWANTBAD=1) or had a strong urge to use tranquilizers (UDTRSTRURGE=1)
- (5) Serious problems at work, school, or home, such as
  - missing a lot of work or school
  - getting demoted, having your hours cut, or losing a job
  - not being able to get a job or keep a job
  - getting suspended, expelled, or dropping out of school
  - failing to take care of family (UDTRWORKPRB=1)
- (6) Problems with family or friends that were caused or made worse by using tranquilizers (UDTRFMLYPRB=1) and continued to use tranquilizers even though it often caused arguments or problems with family or friends (UDTRFMLYCTD=1)
- (7) Gave up or spent a lot less time doing important social, occupational, or recreational activities because of tranquilizer use (UDTRSTOPACT=1)
- (8) Repeatedly got into situations where using tranquilizers increased your chances of getting physically hurt (UDTRGETHURT=1)
- (9) Continued to use tranquilizers even though it was causing problems with emotions, mental health, or physical health (UDTRMNTLCTD=1 or UDTRHLTHCTD=1)
- (10) Needed to use tranquilizers a lot more to get the desired feeling, or use of the same amount had less of an effect (UDTRNEEDMOR=1 or UDTRLESSEFF=1)
- (11) Reported experiencing two or more tranquilizer withdrawal symptoms after tranquilizer use was cut back or stopped or respondent used the same or similar substance to avoid having tranquilizer withdrawal symptoms during the past 12 months. Symptoms include (i) sweating or feeling that your heart was beating fast (UDTRWDSWEAT=1); (ii) having your hands tremble (UDTRWDTRMBL=1); (iii) having trouble sleeping (UDTRWDSLEEP=1); (iv) vomiting or having an upset stomach (UDTRWDVOMIT=1); (v) seeing, hearing, or feeling things that weren't really there (UDTRWDHALUC=1); (vi) feeling like you couldn't sit still (UDTRWDSITST=1); feeling anxious (UDTRWDFLANX=1); having seizures or fits (UDTRWDSZURE=1). Substances used to avoid withdrawal symptoms could include prescription tranquilizers, sedatives, downers, or sleeping pills (UDTRAVWSVTR=1) or alcohol (UDTRAVWALCO=1).

### C.3.10 PRESCRIPTION STIMULANTS

Past year misusers of prescription stimulants are classified with prescription stimulant use disorder (IRUD5STMMIS=1) if they met two or more of the following prescription stimulant criteria in the past year. More specifically, past year misusers with two or three criteria are considered to have “mild” disorder (IRSEVSTMMIS=1); past year misusers with four or five criteria are considered to have “moderate” disorder (IRSEVSTMMIS=2); and past year misusers with six or more criteria are considered to have “severe” disorder (IRSEVSTMMIS=3). For past year users but not misusers of prescription stimulants, the number of positive criteria required to classify a respondent with disorder (IRUD5STMUNM) and to define disorder severity (IRSEVSTMUNM) are the same as for past year misusers. However, criteria 10 and 11 in the list below do not apply to respondents who used but did not misuse prescription drugs in the past year because tolerance and withdrawal can occur as normal physiological adaptations when people use these prescription drugs appropriately under medical supervision. Two additional recodes that include data from all past year users of prescription stimulants, UDYR5STMANY and SEVYRSTMANY, are also included on the data file. For past year misusers, UDYR5STMANY and SEVYRSTMANY will equal IRUD5STMMIS and IRSEVSTMMIS, respectively. For past year users but not misusers, UDYR5STMANY and SEVYRSTMANY will equal IRUD5STMUNM and IRSEVSTMUNM, respectively.

- (1) Ended up using stimulants many times in larger amounts or for a longer time than intended (UDSTLRGAMTS=1)
- (2) One or more times tried and was unable to cut down or stop using stimulants or wished could cut down or stop using stimulants (UDSTNOTSTOP=1 or UDSTWSHSTOP=1)
- (3) Spent a great deal of time using stimulants, feeling its effects, or getting over the effects, or trying to get stimulants (UDSTTIMEGET=1 or UDSTTIMEUSE=1)
- (4) Wanted to use stimulants so badly could not think of anything else (UDSTWANTBAD=1) or had a strong urge to use stimulants (UDSTSTRURGE=1)
- (5) Serious problems at work, school, or home, such as
  - missing a lot of work or school
  - getting demoted, having your hours cut, or losing a job
  - not being able to get a job or keep a job
  - getting suspended, expelled, or dropping out of school
  - failing to take care of family(UDSTWORKPRB=1)
- (6) Problems with family or friends that were caused or made worse by using stimulants (UDSTFMLYPRB=1) and continued to use stimulants even though it often caused arguments or problems with family or friends (UDSTFMLYCTD=1)
- (7) Gave up or spent a lot less time doing important social, occupational, or recreational activities because of stimulant use (UDSTSTOPACT=1)
- (8) Repeatedly got into situations where using stimulants increased your chances of getting physically hurt (UDSTGETHURT=1)
- (9) Continued to use stimulants even though it was causing problems with emotions, mental health, or physical health (UDSTMNTLCTD=1 or UDSTHLTHCTD=1)
- (10) Needed to use stimulants a lot more to get the desired feeling, or use of the same amount had less of an effect (UDSTNEEDMOR=1 or UDSTLESSEFF=1)

- (11) Reported at least one of the following: (1) feeling blue or down when trying to stop or cut down using stimulants (UDSTWDFLBU=1) as well as experiencing two or more additional stimulant withdrawal symptoms after stimulant use was cut back or stopped; or (2) having used the same or similar substance to avoid having stimulant withdrawal symptoms (listed below) during the past 12 months. Symptoms include (i) feeling tired or exhausted (UDSTWDTIRED=1), (ii) having bad dreams (UDSTWDDREAM=1), (iii) having trouble sleeping or sleeping more than normal (UDSTWDSLEEP=1), (iv) feeling hungry more often (UDSTWDHNGRY=1), and (v) feeling either very slowed down or like could not sit still (UDSTWDSITST=1). Substances used to avoid withdrawal symptoms could include prescription stimulants or uppers (UDSTAVWSTIM=1), cocaine or crack (UDSTAVWCOCN=1), or methamphetamine (UDSTAVWMETH=1).

### **C.3.11 PRESCRIPTION SEDATIVES**

Past year misusers of prescription sedatives are classified with prescription sedative use disorder (IRUD5SEDMIS=1) if they met two or more of the following prescription sedative criteria in the past year. More specifically, past year misusers with two or three criteria are considered to have “mild” disorder (IRSEVSEDMIS=1); past year misusers with four or five criteria are considered to have “moderate” disorder (IRSEVSEDMIS=2); and past year misusers with six or more criteria are considered to have “severe” disorder (IRSEVSEDMIS=3). For past year users but not misusers of prescription sedatives, the number of positive criteria required to classify a respondent with disorder (IRUD5SEDUNM) and to define disorder severity (IRSEVSEDUNM) are the same as for past year misusers. However, criteria 10 and 11 in the list below do not apply to respondents who used but did not misuse prescription drugs in the past year because tolerance and withdrawal can occur as normal physiological adaptations when people use these prescription drugs appropriately under medical supervision. Two additional recodes that include data from all past year users of prescription sedatives, UDYR5SEDANY and SEVYRSEDANY, are also included on the data file. For past year misusers, UDYR5SEDANY and SEVYRSEDANY will equal IRUD5SEDMIS and IRSEVSEDMIS, respectively. For past year users but not misusers, UDYR5SEDANY and SEVYRSEDANY will equal IRUD5SEDUNM and IRSEVSEDUNM, respectively.

- (1) Ended up using sedatives many times in larger amounts or for a longer time than intended (UDSVLRGAMTS=1)
- (2) One or more times tried and was unable to cut down or stop using sedatives or wished could cut down or stop using sedatives (UDSVNOTSTOP=1 or UDSVWSHSTOP=1)
- (3) Spent a great deal of time using sedatives, feeling its effects, or getting over the effects, or trying to get sedatives (UDSVTIMEGET=1 or UDSVTIMEUSE=1)
- (4) Wanted to use sedatives so badly could not think of anything else (UDSVWANTBAD=1) or had a strong urge to use sedatives (UDSVSTRURGE=1)
- (5) Serious problems at work, school, or home, such as
  - missing a lot of work or school
  - getting demoted, having your hours cut, or losing a job
  - not being able to get a job or keep a job
  - getting suspended, expelled, or dropping out of school
  - failing to take care of family

- (UDSVWORKPRB=1)
- (6) Problems with family or friends that were caused or made worse by using sedatives (UDSVFMLYPRB=1) and continued to use sedatives even though it often caused arguments or problems with family or friends (UDSVFMLYCTD=1)
  - (7) Gave up or spent a lot less time doing important social, occupational, or recreational activities because of sedative use (UDSVSTOPACT=1)
  - (8) Repeatedly got into situations where using sedatives increased your chances of getting physically hurt (UDSVGETHURT=1)
  - (9) Continued to use sedatives even though it was causing problems with emotions, mental health, or physical health (UDSMNTLCTD=1 or UDSVHLTHCTD=1)
  - (10) Needed to use sedatives a lot more to get the desired feeling, or use of the same amount had less of an effect (UDSVNEEDMOR=1 or UDSVLESSEFF=1)
  - (11) Reported experiencing two or more sedative withdrawal symptoms after sedative use was cut back or stopped or respondent used the same or similar substance to avoid having sedative withdrawal symptoms during the past 12 months. Symptoms include (i) sweating or feeling that heart was beating fast (UDSVWDSWEAT=1); (ii) having hands tremble (UDSVWDTRMBL=1); (iii) having trouble sleeping or sleeping more than normal (UDSVWDSLEEP=1); (iv) vomiting or feeling nauseous (UDSVWDVOMIT=1); (v) seeing, hearing, or feeling things that were not really there (UDSVWDHALUC=1); (vi) feeling like could not sit still (UDSVWDSITST=1); (vii) feeling anxious (UDSVWDFLANX=1); and (viii) having seizures or fits (UDSVWDSZURE=1). Substances used to avoid withdrawal symptoms could include prescription sedatives, tranquilizers, sleeping pills, or downers (UDSVAVWSVTR=1), or alcohol (UDSVAVWALCO=1).

#### C.4 SUD Summary Measures

The Drug Use Disorder version of SUD was created beginning in 2021 and incorporates data from respondents with *any use* of prescription drugs (i.e., misuse or use without misuse). This version of SUD was used to produce the primary measures of SUD for the 2022 Detailed Tables (CBHSQ, 2023c) and 2022 Key Substance Use and Mental Health Indicators report (CBHSQ, 2023b).

Summary indicators of overall SUD (i.e., disorder, no disorder) based on DSM-5 criteria were created using combinations of “ANY” SUD variables. [Table C.1](#) includes the summary variable names, the substance for which use disorder is being described, and a short description of each variable. To be classified as having SUD for a summary variable, a respondent must have been classified as having a disorder of at least one of the corresponding substances included in the summary measure. The variables used to create each summary measure can be found in the main body of the codebook.

Beginning in 2022, summary variables that incorporate prescription drug use disorder for respondents who were users but not misusers of prescription drugs and for respondents who misused prescription drugs are no longer created. The individual SUD variables for pain reliever, stimulant, tranquilizers, and sedative use disorders exist for respondents who were users but not misusers of prescription drugs and for respondents who misused prescription drugs.

## C.5 Analysis Weights and Variance Estimation Variables

Estimates for SUD were created for 2022 using the standard analysis weight (ANALWT2) and the variance estimation variables (VESTR and VEREP). For more information on the use of the weighting and variance estimation variables, see Section 14 in the main Introduction of the codebook.

**Table C.1 Summary SUD Variables that Incorporate Prescription Drug Use Disorder from Respondents with Any Use of Prescription Drugs**

Summary Any Use SUD Variable Name	SUD	Description
UD5ILLANY	Drugs	Drug use disorder including prescription drug use disorder due to <b>any use</b> of prescription drugs
UD5IEMANY	Drugs Other than Marijuana	Drugs other than marijuana use disorder including prescription drug use disorder due to <b>any use</b> of prescription drugs
UD5ILALANY	Drugs or Alcohol	Drug use disorder including prescription drug use disorder due to <b>any use</b> of prescription drugs, or alcohol use disorder
UD5PSYANY	Prescription Psychotherapeutics	Prescription psychotherapeutic use disorder including prescription drug use disorder due to <b>any use</b> of prescription drugs
UD5TRQSDANY	Prescription Tranquilizers or Sedatives	Prescription tranquilizer or sedative use disorder including prescription tranquilizer or sedative use disorder due to <b>any use</b> of tranquilizers or sedatives
UD5OPIANY	Prescription Opioids	Prescription opioid use disorder including prescription pain reliever use disorder due to <b>any use</b> of pain relievers; the opioid use disorder estimates do not capture symptoms that arose solely from the use of illegally made fentanyl
UD5CNSANY	Central Nervous System Stimulants	Central nervous system stimulant use disorder including prescription stimulant use disorder due to <b>any use</b> of stimulants
UD5ILAALANY	Both Drugs and Alcohol	Drug use disorder including prescription drug use disorder due to <b>any use</b> of prescription drugs, and alcohol use disorder
UD5ILNALANY	Drugs Only (No Alcohol)	Drug use disorder including prescription drug use disorder due to <b>any use</b> of prescription drugs, and no alcohol use disorder
UD5ALNILANY	Alcohol Only (No Drugs)	Alcohol use disorder, and no drug use disorder including prescription drug use disorder due to <b>any use</b> of prescription drugs

SUD = substance use disorder.

## **Appendix D**

### **Recoded Mental Health**

## D.1 Introduction

The 2022 National Survey on Drug Use and Health (NSDUH) included a “mental health” section of the questionnaire that was designed to provide data on various mental health measures for adults aged 18 or older, such as:

- serious psychological distress (SPD),
- mental illness
  - any mental illness (AMI),
  - serious mental illness (SMI),
  - moderate mental illness (MMI),
  - serious or moderate mental illness (SMMI),
  - low [i.e., mild] mental illness (LMI), and
  - low or moderate mental illness (AMI excluding SMI; LMMI), and
- suicidal ideation and behavior (i.e., thoughts, plans, and attempts).

Estimates of past year and past month SPD, past year mental illness, and past year suicidal ideation and behavior, including past year suicidal ideation and behavior because of coronavirus disease 2019 (COVID-19), are presented in the *Results from the 2022 National Survey on Drug Use and Health: Detailed Tables* (Center for Behavioral Health Statistics and Quality [CBHSQ], 2023c). These measures, except SPD and COVID-19 related measures, are also presented in the *Key Substance Use and Mental Health Indicators in the United States: Results from the 2022 National Survey on Drug Use and Health* report (CBHSQ, 2023b).

This appendix includes details on the creation of the mental illness measures. Guidance regarding analysis of these measures, including weighting and variance estimation information, is also provided in this appendix. Details on the variables used to create the mental illness measures are included in the main body of the codebook. For information about comparing NSDUH data between years, see Sections 6 and 9.1 in the main Introduction of the codebook.

## D.2 Mental Illness Measures

Past year mental illness estimates found in tables and reports published for the 2022 NSDUH were based on a prediction model for mental illness originally developed using the 2008 data from the Mental Health Surveillance Study (MHSS) and later updated to include data from 2008 through 2012. The original 2008 model was created from a randomly selected subsample of approximately 1,500 adults in 2008 who had completed the NSDUH interview. Respondents were recruited for a follow-up clinical interview consisting of a diagnostic assessment for mental

disorders.<sup>1</sup> For more information on the 2008 MHSS design and analysis, see Colpe et al. (2009) and Office of Applied Studies (2009). Information about the 2008 model is available in Appendix B of the *Results from the 2012 National Survey on Drug Use and Health: Mental Health Findings* (CBHSQ, 2013).

Based on the accumulated MHSS clinical data collected from 2008 to 2012, the Substance Abuse and Mental Health Services Administration (SAMHSA) determined the 2008 model had some important shortcomings not detected in the original model fitting because of the small sample of clinical interview respondents in 2008. Specifically, estimates of SMI and AMI among young adults based on the 2008 model were higher than the estimates for this age group based on the clinical interview data. In addition, improvements were needed in the weighting procedures for the MHSS clinical data to account better for undercoverage and nonresponse. Only NSDUH respondents in 2008 who answered their surveys in English were eligible for the clinical follow-up, and people with mental illness appeared to be more likely to participate in the follow-up.

Because of these concerns, SAMHSA fit a more accurate model using combined 2008-2012 clinical data for the 2012 model. To reduce bias and improve prediction, mental health-related variables and an age variable were added to the model. In addition, to protect against potential coverage and nonresponse error, alternatives for the weights were applied to the clinical sample data for the model development.

### **D.2.1 SMI Prediction Model**

The 2012 model is a weighted logistic regression prediction model for mental illness. The response variable  $Y$  was defined so that  $Y = 1$  when an SMI diagnosis was positive based on the clinical interview; otherwise,  $Y = 0$ . If  $\mathbf{x}$  is a vector of realized explanatory variables, then the response probability  $\pi = \Pr(Y = 1 | \mathbf{x})$  can be estimated using a weighted logistic regression model. Details about the 2012 prediction model for SMI are included below. For further technical details on the 2012 prediction models, see the *2012 National Survey on Drug Use and Health: Methodological Resource Book (Section 16a, 2012 Mental Health Surveillance Study: Design and Estimation Report)* (CBHSQ, 2014).

### **D.2.2 2012 Model**

The 2012 SMI prediction model was fit with data from 4,912 MHSS respondents from 2008 through 2012, excluding those respondents in 2008 who were not assigned to receive the abbreviated World Health Organization Disability Assessment Schedule (WHODAS).<sup>2</sup> The final calibration model for the 2012 prediction model for SMI was determined as

---

<sup>1</sup> Structured Clinical Interview for the DSM-IV-TR Axis I Disorders, Research Version, Non-patient Edition (SCID-I/NP); clinical interviews would require the use of a diagnostic assessment to identify mental disorders according to criteria based on the 5th edition of the *Diagnostic and Statistical Manual of Mental Disorders* (DSM-5; American Psychiatric Association, 2013; First et al., 2002).

<sup>2</sup> One case from 2008 and the one case from 2009 were dropped because of data errors and were also not included in the 2012 model.

$$\text{Logit}(\hat{\pi}) = \text{Log}(\hat{\pi}/1 - \hat{\pi}) = B_0 + B_1X_k + B_2X_w + B_3X_s + B_4X_m + B_5X_a$$

or (1)

$$\hat{\pi} = \frac{1}{1 + \exp[-(-B_0 + B_1X_k + B_2X_w + B_3X_s + B_4X_m + B_5X_a)]}$$

where  $\hat{\pi}$  refers to an estimate of the SMI response probability  $\pi$ .

The beta values are displayed in [Table D.1](#). The covariates came from the main NSDUH interview data and were statistically imputed:

- $X_k$  = *Alternative Past Year K6 Score (AKSSLR6WRST)*: Past year maximum K6 score of less than 8 recoded as 0; past year maximum K6 score of 8 to 24 recoded as 1 to 17.
- $X_w$  = *Alternative WHODAS Score (WHODASDASC)*: WHODAS item score of less than 2 recoded as 0; WHODAS item score of 2 to 3 recoded as 1, then summed for a score ranging from 0 to 8.
- $X_s$  = *Serious Thoughts of Suicide in the Past Year (IRSUICTHNK)*: Coded as 1 if “Yes”; coded as 0 otherwise.
- $X_m$  = *Past Year MDE (IRAMDEYR)*: Coded as 1 if the criteria for past year major depressive episode (MDE) were met;<sup>3</sup> coded as 0 otherwise.
- $X_a$  = *Recoded Age (AGE1830)*: Coded as age minus 18 if aged 18 to 30; coded as 12 otherwise.

[Table D.1](#) displays the WHODAS model specifications for the 2012 SMI prediction model.

**Table D.1 Final 2012 WHODAS SMI Prediction Model**

Final 2012 Model: AKSSLR6WRST + WHODASDASC + IRSUICTHNK + IRAMDEYR + AGE1830						
Term	Beta	Beta SE	T-statistic	P-value	DF	Wald P-value
Intercept	-5.9727	0.3201	-18.6586	0.0000		
AKSSLR6WRST	0.0873	0.0248	3.5247	0.0009	1	0.0009
WHODASDASC	0.3385	0.0349	9.7034	0.0000	1	0.0000
IRSUICTHNK	1.9553	0.2164	9.0342	0.0000	1	0.0000
IRAMDEYR	1.1267	0.2196	5.1308	0.0000	1	0.0000
AGE1830	0.1059	0.0244	4.3380	0.0001	1	0.0001

DF = degrees of freedom, SE = standard error, SMI = serious mental illness, WHODAS = abbreviated eight-item World Health Organization Disability Assessment Schedule.

<sup>3</sup> In this situation, the past year MDE measure is from the main NSDUH interview (i.e., not from the Structured Clinical Interview for DSM-IV [SCID]). See Section 3.4.8 in the 2022 Methodological Summary and Definitions report (CBHSQ, 2023a).

The formula for the predicted probability of SMI (SMIPPPY) using the model parameter estimates in [Table D.1](#) (but expressed with more decimal points) is as follows:

$$\text{SMIPPPY} = 1/(1 + \exp[-(-5.972664 + 0.0873416* \text{AKSSLR6WRST} + 0.3385193* \text{WHODASDASC} + 1.9552664* \text{IRSUICTHINK} + 1.1267330* \text{IRAMDEYR} + 0.1059137* \text{AGE1830})]).$$

Using the predicted probability of SMI (SMIPPPY), a cut point probability of 0.260573529 was determined so that any respondent with an SMI probability greater than or equal to the cut point was predicted to be SMI positive (SMIPY=1); otherwise, the respondent was predicted to be SMI negative (SMIPY=0). The cut point was chosen so that the weighted numbers of false positives and false negatives in the MHSS dataset were as close to equal as possible. The predicted SMI status for all adult NSDUH respondents was used to compute prevalence estimates of SMI. The estimates of the parameters of the SMI prediction model displayed in the equation are shown in [Table D.1](#).

A second cut point probability of 0.0192519810 was determined so that any respondent with an SMI probability greater than or equal to the cut point was predicted to be positive for AMI (AMIPY=1), and the remainder were predicted to be negative for AMI (AMIPY=0). The second cut point was chosen so that the weighted numbers of AMI false positives and false negatives were as close to equal as possible. The 2022 tables and reports show estimates for AMI, SMI, and AMI excluding SMI.

### D.3 Analysis Variables

All of the covariate variables used in the SMI prediction model as shown in [Table D.1](#) are included on the 2022 data file. [Table D.2](#) displays the 2022 mental illness variables used to create the estimates in the 2022 Detailed Tables (CBHSQ, 2023c). Combination mental illness and substance use disorder variables were also created and used in the 2022 Detailed Tables but are not included in [Table D.2](#). Beginning in 2021, the variables used in the prediction model were all statistically imputed, so the mental illness variables have no missing data.

**Table D.2 Mental Illness Variable Names: NSDUH, 2022**

Mental Illness Variable Name	Variable Label
SMIPY	RC-IMP SMI IND (1/0) BASED ON PREDICTED SMI PROB PY
SMIPPPY	RC-IMP PREDICTED SERIOUS MENTAL ILLNESS PROB PY
SMMIPY	RC-IMP SMMI IND (1/0) BASED ON PREDICTED SMI PROB PY
AMIPY	RC-IMP AMI IND (1/0) BASED ON PREDICTED SMI PROB PY
MMIPY	RC-IMP MOD MI IND (1/0) BASED ON PRED SMI PROB PY
LMIPY	RC-IMP MILD MI IND (1/0) BASED ON PRED SMI PROB PY
LMMIPY	RC-IMP LMMI IND (1/0) BASED ON PREDICTED SMI PROB PY
MICATPY	RC-IMP CATEGORICAL MI INDICATOR PY

NOTE: Mental illness aligns with criteria from the *Diagnostic and Statistical Manual of Mental Disorders*, 5th edition (DSM-5; American Psychiatric Association, 2013), and is defined as having a diagnosable mental, behavioral, or emotional disorder, other than a developmental or substance use disorder (SUD). Serious mental illness (SMI) is a subset of any mental illness (AMI) because SMI is limited to people with AMI that resulted in serious functional impairment. These mental illness variables are based on a predictive model and are not direct measures of diagnostic status.

#### **D.4 Limitations in Using the Mental Illness Variables in Analyses**

The predicted mental illness variables that were derived from the 2012 model were examined to determine how they were associated with the mental health predictor variables in the 2012 model. It was found that the 2012 model significantly overestimated the proportion of adults aged 18 or older with SMI (and those with AMI) who had suicidal thoughts in the past year and also the proportion of adults who had MDE in the past year. Therefore, it is recommended that the mental illness variables derived from the 2012 model should not be used when analyzing past year suicidal thoughts, past year MDE, or other associated variables (including past year suicide attempts, suicide plans, medical treatment for suicide attempts, or lifetime MDE). Similarly, it is recommended that model-based mental illness variables should not be used in conjunction with the Kessler-6 (K6) variables (including SPD) or WHODAS variables in any analyses. For details, see the *Estimating Mental Illness among Adults in the United States: Revisions to the 2008 Estimation Procedures* report (CBHSQ, 2015).

#### **D.5 Analysis Weights and Variance Estimation Variables**

Estimates for mental illness were created for 2022 using the standard analysis weight (ANALWT2) and the variance estimation variables (VESTR and VEREP). For more information on the use of the weighting and variance estimation variables, see Section 14 in the main Introduction of the codebook.

#### **D.6 Standard Errors for Mental Illness Measures**

Standard errors for SMI estimates (and, likewise, estimates for AMI, SMMI, and AMI excluding SMI) were computed using the NSDUH dichotomous variables without taking into account any variance introduced through using a model based on the clinical subsample data. This ignores the added error resulting from fitting the 2012 SMI model, which can be very large (see the 2012 MHSS Design and Estimation Report; CBHSQ, 2014). These *conditional* standard errors (conditional on the model predictions being correct) are useful when making comparisons across years and across subpopulations (except those involved in modeling) within years because the errors due to model fitting are nearly the same across the estimates being compared.

However, caution is advised when these mental illness measures are used as explanatory variables within a regression analysis because the resulting estimated regression coefficients often will be biased toward zero (Carroll et al., 2006). Stated another way, values of the regression coefficients for these mental illness variables are likely to be attenuated. Consequently, situations in which AMI or specific levels of mental illness (e.g., SMI) are true predictors of a dependent variable of interest in the population may not be significant predictors in regression models that use these variables. If a statistically significant association is identified between these mental illness variables and the dependent variable, however, one can be more confident that this truly is a significant association.

## **Appendix E**

### **Initiation Documentation**

## E.1 Introduction

In the National Survey on Drug Use and Health (NSDUH), initiation refers to the first use of a particular substance (or first misuse for psychotherapeutic drugs, including pain relievers, tranquilizers, stimulants, and sedatives).<sup>1</sup> Likewise, past year initiation refers to respondents whose date of first use of a substance was within the 12 months prior to their interview date. This appendix provides more information on the past year initiation measures used to create estimates presented in the *Results from the 2022 National Survey on Drug Use and Health: Detailed Tables* (Center for Behavioral Health Statistics and Quality [CBHSQ], 2023b). More specifically, this appendix describes the two types of recoded analysis variables used to generate the past year initiation estimates: recent initiation and eligible-for-initiation variables. Recent initiation variables are used to compute the number of initiates and rates of initiation among standard populations. Eligible-for-initiation variables are used for the denominator to compute initiation rates among individuals at risk for initiation. Additional details on initiation and instructions on generating initiation estimates using NSDUH data are included below. Examples that show how to compute past year initiation estimates and mean age of first use are also included at the end of this appendix. For information about comparing NSDUH data between years, see Sections 6 and 9.1 in the main Introduction of the codebook.

## E.2 Past Year Initiation

Past year initiation refers to respondents whose date of first use of a substance (or misuse for psychotherapeutic drugs) was within the 12 months prior to their interview date. This time frame reduces recall bias,<sup>2</sup> because the estimates are based on a recent time period, and also provides timely data on emerging patterns of substance use. This measure is determined by self-reported year and month of first use, an imputed day of first use, self-reported past year use (with the exception of daily cigarette use), and the interview date.<sup>3</sup>

These past year initiation measures do not take into account whether a respondent initiated substance use in the United States or elsewhere and therefore can be analyzed in conjunction with other standard measures of substance use. This is because they reflect the same time period and population of interest (all respondents, not only those initiating in the United States), which provides a more complete and consistent picture of substance users. For instance, if a respondent moved to the United States in the past year, there is no indication in the measure whether they used the substance for the first time in the United States or their country of origin. Nevertheless, past year initiation is reported as the number of initiates in the United States to be consistent with substance use measures.

Past year initiation is reported in the 2022 Detailed Tables (CBHSQ, 2023b) as the number of new users or initiates of a substance in the past 12 months. Estimates of the number of

---

<sup>1</sup> For brevity, “misuse” is not repeated in every instance that text refers to first use. Readers are advised that terms such as “past year use” and “first use” that are used in the remainder of this section for substance use in general refer to *misuse* for prescription psychotherapeutic drugs.

<sup>2</sup> Recall bias is a systematic error caused by differences in the accuracy or completeness of the recollections retrieved by study participants regarding events or experiences from the past.

<sup>3</sup> “Self-reported” refers to responses provided by the respondents within the questionnaire. Responses are imputed for respondents who do not self-report for these items. Day-of-first-use data are imputed because this information is not asked in the questionnaire.

initiates are also reported in the *Key Substance Use and Mental Health Indicators in the United States: Results from the 2022 National Survey on Drug Use and Health* report (CBHSQ, 2023a). The number of initiates in the past year is estimated by computing the number of people who began using a given substance for the first time during the 12-month period immediately prior to their interview.

Rates of past year initiation of a particular substance are reported within the detailed tables among the total population, among the population of past year users or misusers of a particular substance, and among the population of people at risk of initiation of a particular substance.<sup>4</sup> All rates are expressed as percentages:

- **Past year initiation rates among the total population** are calculated as the number of people initiating substance use in the past 12 months divided by the estimated population total.
- **Past year initiation rates among past year users** are calculated as the number of people initiating substance use in the past 12 months divided by the number of people reporting use in the past 12 months, or divided by the number of people imputed to have used the substance in the past 12 months.<sup>5</sup>
- **Past year initiation rates among people at risk for initiation** are calculated as the number of people initiating substance use in the past 12 months divided by the number of people eligible to initiate substance use.
  - The number of people eligible to initiate substance use refers to respondents who reported no use of a particular substance in their lifetime or reported their initial use was in the 12 months prior to the interview. These respondents were identified as members of the “at-risk” population and were classified as eligible initiates.

Initiation estimates in the 2022 Detailed Tables (CBHSQ, 2023b) and reports are presented for the use of marijuana, cocaine, crack, heroin, hallucinogens, lysergic acid diethylamide (LSD), phencyclidine (PCP), Ecstasy, inhalants, methamphetamine, cigarettes (including daily cigarette use), smokeless tobacco, cigars, nicotine vaping, and alcohol. Initiation estimates are also presented for the specific misuse of prescription pain relievers, tranquilizers, stimulants, and sedatives.

Initiation estimates are not presented for the aggregate substance use measures of use of illicit drugs, use of illicit drugs other than marijuana, and misuse of any prescription psychotherapeutic drug, tranquilizer or sedative, benzodiazepines, misuse of opioids, and misuse of central nervous system stimulants (i.e., cocaine, methamphetamine, or prescription stimulants). This is because of methodological limitations that prevent the estimation of past year initiates for aggregate substance use categories that have at least one prescription psychotherapeutic. See Chapter 3 in the *2022 National Survey on Drug Use and Health (NSDUH): Methodological Summary and Definitions* report for more information (CBHSQ, 2023c).

---

<sup>4</sup> Mean age of past year initiates of substances were also reported based on past year initiation status and age.

<sup>5</sup> Substances that are imputed are available for the following prescription drug categories: pain relievers, tranquilizers, stimulants, and sedatives.

Additionally, initiation estimates are not presented for the aggregate measure for use of any tobacco product because respondents are not asked an initiation question for pipe tobacco. For the same reason, the aggregate measure of any tobacco product or nicotine vaping cannot be determined, even though nicotine vaping initiation data are available starting with the 2022 NSDUH. Respondents are also not asked initiation questions about GHB use or misuse, nonprescription cough and cold medicine misuse, kratom use, marijuana vaping, vaping of flavoring, illegally made fentanyl, synthetic marijuana use, or synthetic stimulant use. Therefore, initiation estimates are not presented for these substances.

### **E.3 Initiation Variables**

To generate estimates for initiation, two types of recoded analysis variables are created. A recent initiate recode is used to calculate both the number of initiates and rates of initiation. Members of the at-risk population, also known as those eligible for initiation, were respondents who reported no use of a particular substance in their lifetime or reported their initial use was during the time period 12 months prior to their interview date (excluding daily cigarette use) and reported past year use. Past year initiation rates among individuals at risk for initiation use a combination of the recent initiate recode and the respondents' eligibility for initiation recode. More detailed information about availability and naming conventions for these recodes is described below.

#### **E.3.1 Recent Initiation Variables**

Recent initiation variables are also referred to as past year initiation variables. Respondents were classified as recent (past year) initiates of a given substance if they used or misused the substance for the first time in the 12 months prior to the date of the interview (as determined by the imputation-revised month, day, and year of first use and date of the interview) and, aside from daily cigarette use, reported past year use. Respondents who never used or are lifetime users whose initiation of use was before the 12-month period prior to the interview are not classified as recent (past year) initiates.

The past year initiation variables include recodes for recent initiates whose naming conventions vary by substance. The four prescription drugs (pain relievers, tranquilizers, stimulants, and sedatives) are recoded directly from imputation-revised initiation variables in the form IRXXXNMINIT, where XXX is the three-letter abbreviation for the drugs: PNR, TRQ, STM, or SED, respectively. The imputation-revised variables distinguish between those who initiated more than a year ago, those who never misused, and those who did not misuse in the past year. These imputed variables are then recoded to create the recent initiate variables (RECXXXNM, where XXX is again the three-letter abbreviation for the drugs). The recent initiate variables for hallucinogens, Ecstasy, inhalants, smokeless tobacco, methamphetamine, and nicotine vaping are named RECHALLUC, RECECSTMO, RECINHAL, RECSMKLSS, RECMETHAM, and RECNICVAP, respectively. Recent initiate recodes for all other applicable substances are named RECXX2 or RECXXX2, where XX or XXX is the letter abbreviation of the substance name: alcohol (ALC), cigars (CGR), cigarettes (CIG), cocaine (COC), crack (CRK), daily cigarette use (CD), heroin (HER), marijuana (MJ), LSD (LSD), and PCP (PCP).

### E.3.2 Eligible-for-Initiation Variables

Eligible-for-initiation variables identify respondents who are members of the at-risk initiation population for a given substance. Respondents were classified as being at risk for initiation in the past 12 months if they did not use a given substance in their lifetime or if they used it for the first time 12 months prior to the interview date (as determined by the imputation-revised month, day, and year of first use and date of the interview) and, aside from daily cigarette use, reported past year use. Respondents who first used the substance more than 12 months prior to the interview were no longer considered to be at risk for initiation.

Most of the recent initiate variables use ELIGXX2 or ELIGXXX2 as the naming convention, where XX or XXX is the letter abbreviation of the substance name. These include alcohol (ALC), cigars (CGR), cigarettes (CIG), cocaine (COC), crack (CRK), daily cigarette use (CD), heroin (HER), marijuana (MJ), LSD (LSD), and PCP (PCP). Exceptions include hallucinogens (ELIGHALLUC), Ecstasy (ELIGECSTMO), inhalants (ELIGINHAL), smokeless tobacco (ELIGSMKLSS), methamphetamine (ELIGMETHAM), and nicotine vaping (ELIGNICVAP). Variables for eligible for prescription drug misuse initiation were not created. See Section 3.4.3 in the 2022 Methodological Summary and Definitions report (CBHSQ, 2023c).

## E.4 Computing Initiation Measures

Included at the end of this appendix are examples of how to compute past year initiation and age-of-first-use estimates. Example A contains SAS<sup>®</sup> code<sup>6</sup> showing how to create the numerator and denominator variables that are used to compute cigarette and marijuana past year initiation estimates<sup>7</sup> (SAS Institute Inc., 2014). Example A also contains SUDAAN<sup>®</sup> code<sup>8</sup> showing how to create the estimated number of initiates and the rate of initiation (RTI International, 2013), followed by SAS code showing how to invoke the NSDUH suppression criteria. Example B contains SAS code for converting the imputed past year initiation variables for prescription psychotherapeutic drugs into the recent initiate recode, and the example also contains SUDAAN and SAS code for invoking suppression criteria for these estimates derived from imputed variables. Example C contains SUDAAN code showing how to compute the mean age of first marijuana use among past year marijuana initiates aged 12 to 49 and code for invoking the suppression criteria for averages.

For details on the NSDUH suppression criteria, see Table 3.2 in the 2022 Methodological Summary and Definitions report (CBHSQ, 2023c). Notes have been included within this code to explain the various steps and how similar code can be used to create indicators and estimates for other substances. These examples do not show any code to allow for testing between subdomains or between years.

## E.5 Analysis Weights and Variance Estimation Variables

Estimates for initiation were created for 2022 using the standard analysis weight (ANALWT2) and variance estimation variables (VESTR and VEREP). For more information on

the use of the weighting and variance estimation variables, see Section 14 in the main Introduction of the codebook.

## Example A: Past Year Initiation Excluding Prescription Drugs

---

```
*****  
EXAMPLE OF SAS CODE TO COMPUTE ANALYSIS VARIABLES FOR PAST YEAR  
INITIATION
```

The following example SAS code creates analysis variables used in the generation of estimates for past year initiation of cigarettes and marijuana. Two separate variables are created for each substance. The first variable, ELIGXXX2, denotes whether the respondent was eligible to initiate substance use in the past year, and the second variable, RECXXX2, denotes whether the respondent initiated substance use in the past year. For both variables, XXX indicates the substance abbreviation (CIG = cigarettes, MJ or MRJ = marijuana) and 2 is the code for specific substance measures. These two variables are used in combination to estimate the rate of initiation in the past year. This code can be applied to other measures as listed with their variable abbreviations shown: cigars (CGR), daily cigarettes (CD), cocaine (COC), crack (CRK), heroin (HER), LSD (LSD), PCP (PCP), and alcohol (ALC).

This same code was also used to create both the recent initiate (RECXXXXXX) variables and the eligible-for-initiation(ELIGXXXXXX) variables for hallucinogens (HALLUC), Ecstasy (ECSTMO), inhalants (INHAL), smokeless tobacco (SMKLSS), methamphetamine (METHAM), and nicotine vaping (NICVAP).

\*\*\*\*\*  
EXAMPLE OF SUDAAN CODE

The following SUDAAN code shows how to use the variables created with the SAS code above in order to estimate the initiation rate of marijuana in the past year. The input variables include the analysis weight (ANALWT2), the design-based nesting variables (VESTR and VEREP), and two of the variables created in the above SAS code (ELIGMJ2 and RECMJ2). The output includes the estimated rate of initiation (and its respective standard error) and the estimated number of initiates (and its respective standard error).

NOTE: Estimates for only a single substance are produced with the program below. Estimates for multiple substances can be calculated simultaneously; however, keep in mind that all substance estimates are calculated over all subgroups, and as a result, many estimates in the output will not necessarily make sense. For example, if estimates are calculated for marijuana and cigarettes, the output will show the number of initiates of marijuana among those eligible to be initiates of cigarettes.

EXAMPLE OF SAS CODE TO INVOKE THE SUPPRESSION CRITERIA

The following example SAS code invokes the suppression criteria on the SUDAAN output file from above. The variable OUTMEAN denotes the estimated rate of initiation, whereas OUTTOTAL denotes the estimated number of initiates in thousands. The corresponding standard errors are denoted by the variables OUTSEMEAN and OUTSETOTAL, respectively. Suppression rules are only evaluated on the means and percentages. Totals are suppressed if means are suppressed. For all four of these variables, an estimate that fails to meet the suppression criteria will appear as an asterisk (\*).

\*\*\*\*\*/

```
data PYINIT;
  set PYINIT_OUT;

  /*calculate relative standard error (RSE)*/

  if MEAN gt 0 then RSE = SEMEAN / MEAN;
  else RSE = .;

  /*calculate the relative standard error of natural log p*/

  if 0 < MEAN =< 0.5 then RSELNP = RSE / abs(log(MEAN));
  else if 0.5 < MEAN < 1.0 then
    RSELNP = RSE * (MEAN / (1 - MEAN)) / (abs(log(1 - MEAN)));

  /*calculate effective sample size*/

  EFFNSUM = NSUM / DEFFMEAN;

  /*create SUPPRESS variable that will be 1 when one of the suppression
  rules is met. Otherwise, SUPPRESS will be 0. Note that the variables
  MEAN, RSELNP, and EFFSUM are not rounded. So, for example, if
  EFFNSUM=67.9999999999, the result would be suppression. */

  if MEAN < .00005 or MEAN > .99995 then SUPPRESS = 1;
  else if RSELNP > 0.175 then SUPPRESS = 1;
  else if EFFNSUM < 68 then SUPPRESS = 1;
  else if NSUM < 100 then SUPPRESS = 1;
  else SUPPRESS = 0;

  /*create OUTMEAN, OUTSEMEAN, OUTTOTAL, and OUTSETOTAL*/

  OUTMEAN = put(MEAN * 100, 10.1);
  OUTSEMEAN = put(SEMEAN * 100, 10.2);
  OUTTOTAL = put(TOTAL / 1000, commal2.);
  OUTSETOTAL = put(SETOTAL / 1000, commal2.);

INITIATION FOR PRESCRIPTION PSYCHOTHERAPEUTIC DRUGS
```

The following example SAS code converts imputed past year initiate of psychotherapeutics variables into recoded recent initiate analysis variables used in the generation of estimates for the past year initiation of pain relievers, tranquilizers, stimulants, and sedatives. RECXXXNM denotes whether the respondent initiated prescription drug misuse in the past year. For this variable, XXX indicates the substance abbreviation (PNR = pain relievers, TRQ = tranquilizers, STM = stimulants, and SED = sedatives).

/\*  
EXAMPLE OF SUDAAN CODE

The following SUDAAN code shows how to use the variables created with the SAS code above in order to estimate the initiation rate of pain reliever misuse in the past year. The input variables include the analysis weight (ANALWT2), the design-based nesting variables (VESTR and VEREP), and one of the variables created in the above SAS code (RECPRNNM). The output includes the estimated rate of initiation (and its respective standard error).

NOTE: Estimates for only a single substance are produced with the program below. Estimates for multiple substances can be calculated simultaneously.

\*\*\*\*\*  
PROC DESCRIPT DATA=INDICAT FILETYPE=SAS DESIGN=WR;  
WEIGHT ANALWT2;  
NEST VESTR VEREP;  
VAR RECPRNNM;  
SETENV COLWIDTH=12 DECWIDTH=4;  
PRINT MEAN SEMEAN TOTAL SETOTAL NSUM DEFFMEAN / STYLE=NCHS;  
OUTPUT MEAN SEMEAN TOTAL SETOTAL NSUM DEFFMEAN / REPLACE  
    MEANFMT=F15.10 SEMEANFMT=F15.10  
    TOTALFMT=F12.0 SETOTALFMT=F12.0  
    NSUMFMT=F8.0 DEFFMEANFMT=F15.10  
    FILENAME="PNRINIT\_OUT";  
    RTITLE "PAIN RELIEVER - ESTIMATES OF PAST YEAR INITIATION";  
RUN;

## Example B: Past Year Initiation for Prescription Psychotherapeutic Drugs (continued)

---

EXAMPLE OF SAS CODE TO INVOKE THE SUPPRESSION CRITERIA

The following example SAS code invokes the suppression criteria on the SUDAAN output file from above. The variable OUTMEAN denotes the estimated rate of initiation, whereas OUTTOTAL denotes the estimated number of initiates in thousands. The corresponding standard errors are denoted by the variables OUTSEMEAN and OUTSETOTAL, respectively. Suppression rules are only evaluated on the means and percentages. Totals are suppressed if means are suppressed. For all four of these variables, an estimate that fails to meet the suppression criteria will appear as an asterisk (\*).

```
*****/
data PNRINIT;
  set PNRINIT_OUT;

  /*calculate relative standard error (RSE)*/

  if MEAN gt 0 then RSE = SEMEAN / MEAN;
  else RSE = .;

  /*calculate the relative standard error of natural log p*/

  if 0 < MEAN =< 0.5 then RSELNP = RSE / abs(log(MEAN));
  else if 0.5 < MEAN < 1.0 then
    RSELNP = RSE * (MEAN / (1 - MEAN)) / (abs(log(1 - MEAN)));

  /*calculate effective sample size*/

  EFFNSUM = NSUM / DEFFMEAN;

  /*create SUPPRESS variable that will be 1 when one of the suppression
  rules is met. Otherwise, SUPPRESS will be 0. Note that the variables
  MEAN, RSELNP, and EFFSUM are not rounded. So, for example, if
  EFFNSUM=67.9999999999, the result would be suppression.*/

  if MEAN < .00005 or MEAN > .99995 then SUPPRESS=1;
  else if RSELNP > 0.175 then SUPPRESS=1;
  else if EFFNSUM < 68 then SUPPRESS = 1;
  else if NSUM < 100 then SUPPRESS = 1;
  else SUPPRESS = 0;

  /*create OUTMEAN, OUTSEMEAN, OUTTOTAL, and OUTSETOTAL*/

  OUTMEAN = put(MEAN * 100, 10.1);
  OUTSEMEAN = put(SEMEAN * 100, 10.2);
  OUTTOTAL = put(TOTAL / 1000, comma12.);
  OUTSETOTAL = put(SETOTAL / 1000, comma12.);
```

---

(continued)

## Example B: Past Year Initiation for Prescription Psychotherapeutic Drugs (continued)

---

```
/*use the SUPPRESS variable to replace any estimates that fail the
suppression criteria with an asterisk*/

if SUPPRESS = 1 then do;
    OUTMEAN = '*';
    OUTSEMEAN = '*';
    OUTTOTAL = '*';
    OUTSETOTAL = '*';
end;
run;
```

## Example C: Mean Age of First Use among Past Year Initiates Aged 12 to 49

---

\*\*\*\*\*  
EXAMPLE OF SUDAAN CODE

The following SUDAAN code shows how to use imputed age-of-first-use variables in order to estimate the mean age of first marijuana use among past year marijuana initiates aged 12 to 49. The input variables include the analysis weight (ANALWT2), the design-based nesting variables (VESTR and VEREP), the imputed age-of-first-marijuana-use variable (IRMJAGE), an age recode (INCAGE3<sup>2</sup>) that is restricted to those aged 12 to 49, and the recent initiate recode for marijuana (RECMJ2). The output includes the estimated mean age of first use (and its respective standard error).

NOTE: Estimates for only a single substance are produced with the program below. Estimates for multiple substances can be calculated simultaneously. Further restrictions could be added if interested in those respondents who initiated prior to a specific age.

\*\*\*\*\*/

```
PROC DESCRIPT DATA=DATANAME FILETYPE=SAS DESIGN=WR MEANS DEFT;
WEIGHT ANALWT2;
NEST VESTR VEREP;
VAR IRMJAGE;
SUBPOPN INCAGE3=1 AND RECMJ2=1;
SETENV COLWIDTH=12 DECWIDTH=4;
PRINT MEAN SEMEAN NSUM DEFFMEAN / STYLE=NCHS;
OUTPUT MEAN SEMEAN NSUM DEFFMEAN / REPLACE
      MEANFMT=F15.10 SEMEANFMT=F15.10
      NSUMFMT=F8.0 DEFFMEANFMT=F15.10
      FILENAME="IRMJAGE_OUT";
      RTITLE "MARIJUANA- ESTIMATES OF AGE OF FIRST USE AMONG PAST YEAR MARIJUANA
INITIATES AGED 12 to 49";
RUN;
```

---

(continued)

---

<sup>2</sup> The variable INCAGE3 is not available on the data files. Users can create a similar variable or restrict the data to 12 to 49 using the AGE variable in the SUBPOPN statement.

## Example C: Mean Age of First Use among Past Year Initiates Aged 12 to 49 (continued)

---

\*\*\*\*\*  
EXAMPLE OF SAS CODE TO INVOKE THE SUPPRESSION CRITERIA

The following example SAS code invokes the suppression criteria on the SUDAAN output file from above. This differs from the suppression criteria invocation found in the other examples because this applies to averages. Estimates of means not bounded between 0 and 1 (e.g., mean age of first use, mean number of drinks consumed) were suppressed if the relative standard errors (RSEs) of the estimates were larger than 0.5 or if the sample sizes were smaller than 10 respondents. The variable OUTMEAN denotes the estimated mean age of first use, and the corresponding standard error is denoted by the variable OUTSEMEAN. Suppression rules are only evaluated on the means and percentages. For these two variables, an estimate that fails to meet the suppression criteria will appear as an asterisk (\*).

\*\*\*\*\*/

```
data IRMJAGE;
  set IRMJAGE_OUT;

  /*calculate relative standard error (RSE)*/

  if MEAN gt 0 then RSE = SEMEAN / MEAN;
  else RSE = .;

  /*calculate suppression rule for means and continuous variables*/

  if (RSE gt 0.5) or (NSUM < 10) then SUPPRESS=1;
  else SUPPRESS=0;

  /*create OUTMEAN and OUTSEMEAN*/

  OUTMEAN = put(MEAN, 10.1);
  OUTSEMEAN = put(SEMEAN, 10.2);

  /*use the SUPPRESS variable to replace any estimates that fail the
  suppression criteria with an asterisk*/

  if SUPPRESS = 1 then do;
    OUTMEAN = '*';
    OUTSEMEAN = '*';
  end;

run;
```

## **Appendix G**

### **Recoded Adolescent Depression Variable Documentation**

## G.1 Introduction

The 2022 National Survey on Drug Use and Health (NSDUH) instrumentation included two modules, the adult depression module and the adolescent depression module, which were designed to measure whether respondents had experienced a major depressive episode (MDE) in their lifetime and past year. Additional questions to assess impairment levels caused by MDE and treatment received for depression were included at the end of each MDE module.

The NSDUH questions designed to assess MDE symptoms were based on the criteria in the 5<sup>th</sup> edition of the *Diagnostic and Statistical Manual of Mental Disorders* (DSM-5; American Psychiatric Association, 2013). More specifically, MDE questions for adults were adapted from the depression section of the National Comorbidity Survey-Replication (NCS-R; Harvard School of Medicine, 2005), and questions for youths were adapted from the depression section of the National Comorbidity Survey-Adolescent (NCS-A; Harvard School of Medicine, 2005). To make the modules developmentally appropriate for youths, there are minor wording differences in a few questions between the adult and youth modules. People were classified as having had a lifetime MDE if they had five or more of nine symptoms for MDE in the same 2-week period in their lifetime, in which at least one of the symptoms was a depressed mood or loss of interest or pleasure in daily activities. People were classified as having MDE in the past year if they had a lifetime MDE and a period of time in the past 12 months when they felt depressed or lost interest or pleasure in daily activities for 2 weeks or longer, while also having some of the other symptoms for lifetime MDE.

Estimates of depression are presented in the *Results from the 2022 National Survey on Drug Use and Health: Detailed Tables* (Center for Behavioral Health Statistics and Quality [CBHSQ], 2023c) and in the *Key Substance Use and Mental Health Indicators in the United States: Results from the 2022 National Survey on Drug Use and Health* report (CBHSQ, 2023b).

Starting in 2021, the adult depression variables were imputed. Information about the adult depression variables can be found in the main codebook text and in Section 3.4.9 of the *2022 National Survey on Drug Use and Health (NSDUH): Methodological Summary and Definitions* report (CBHSQ, 2023a). The youth depression variables are not imputed. Respondents aged 12 to 17 who had missing data for whether they had an MDE in the past 12 months were excluded from the analyses to produce published estimates for the 2022 NSDUH. This appendix provides youth MDE variable specifications and analysis and weighting information. A flowchart ([Figure G.1](#)) is included to provide details regarding the routing logic leading up to the MDE questions specifying which youth respondents were asked the MDE questions and were classified as having MDE. For information about comparing NSDUH data between years, see Sections 6 and 9.1 in the main Introduction of the codebook.

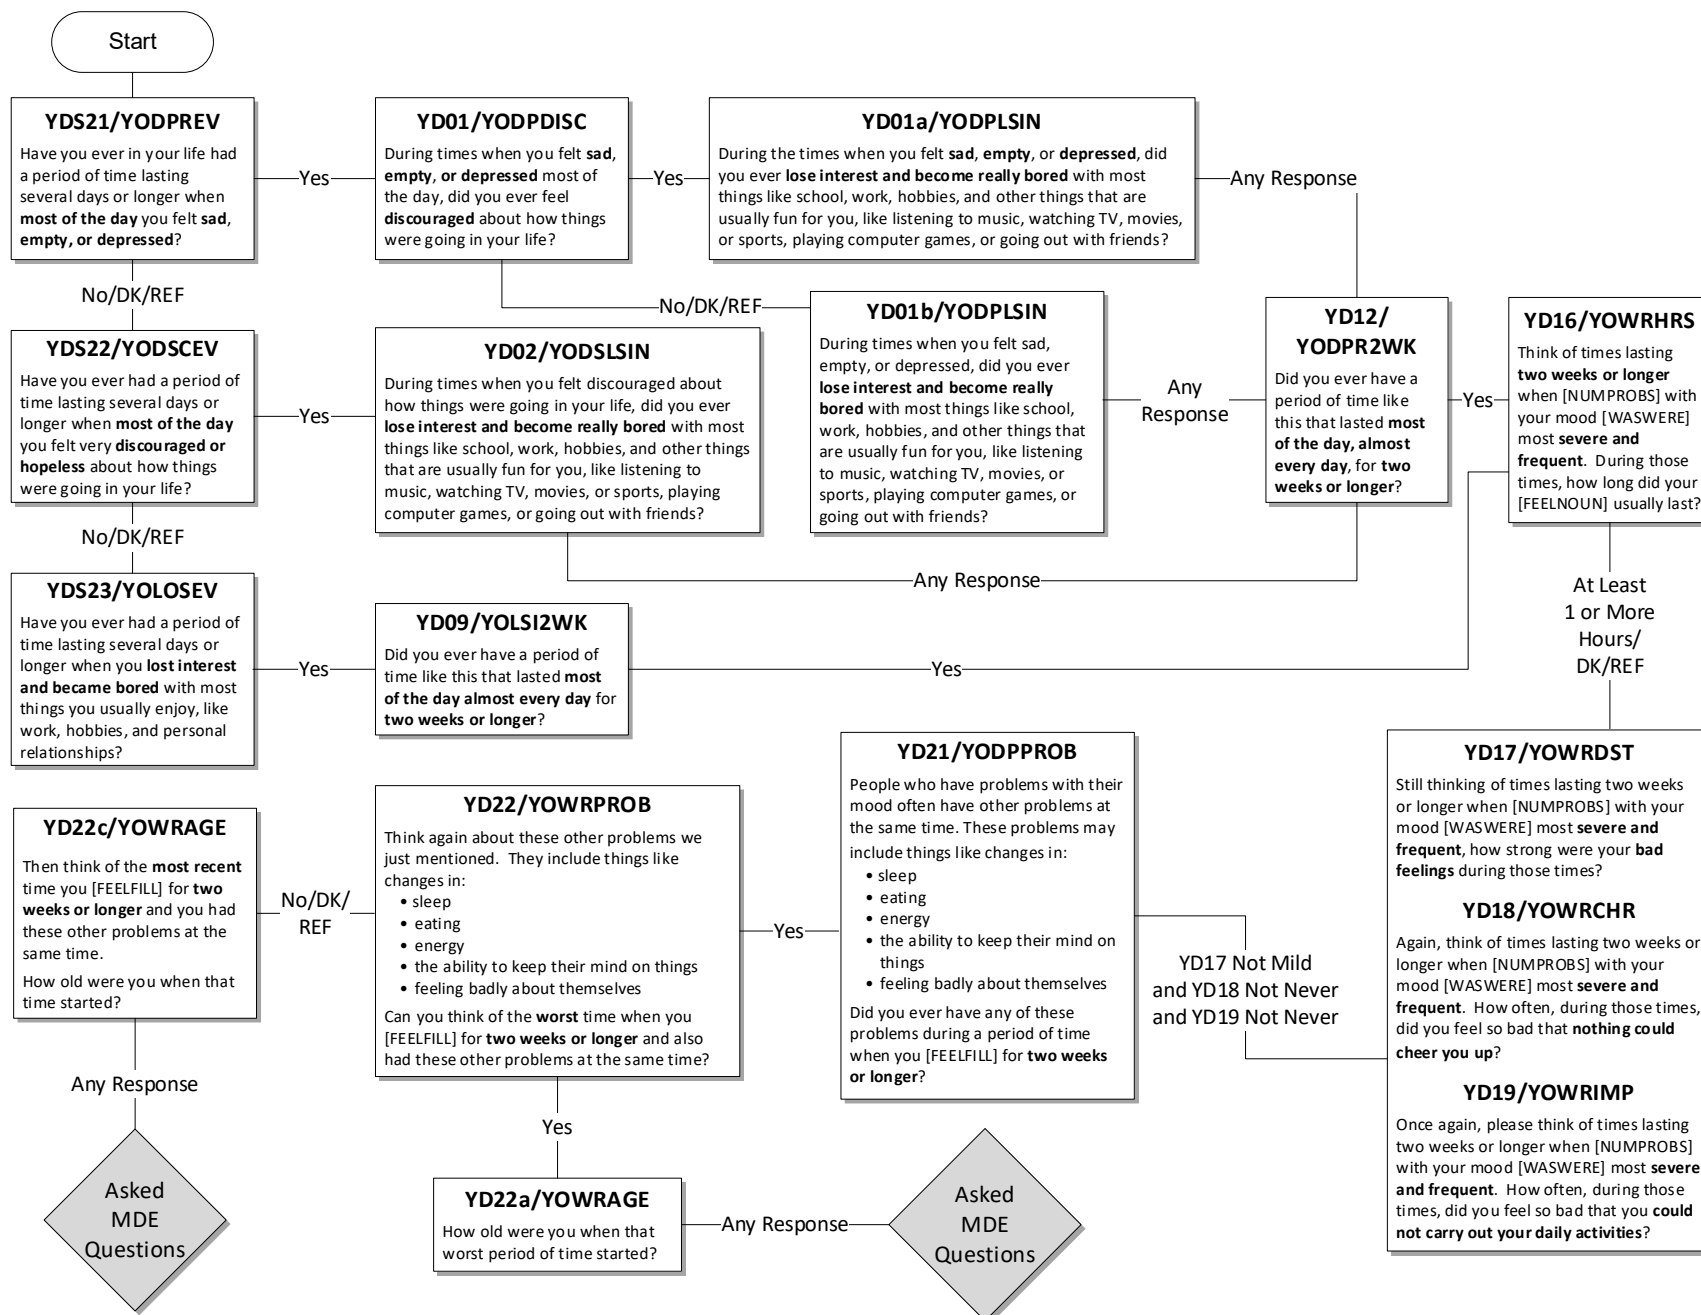

## G.2 MDE Variable Specifications

In the adolescent depression module of NSDUH, respondents aged 12 to 17 were asked a series of introductory questions to determine whether they had a worst period of time where they experienced feeling sad, empty, depressed, discouraged, or a loss of interest. If respondents fit certain criteria based on the routing logic found in these introductory questions, then they were asked the questions related to the nine attributes (symptoms) of MDE. To demonstrate the

responses that would lead respondents to be asked the MDE attributes questions based on these introductory questions, a flowchart using the youth questions is included as [Figure G.1](#). The questions shown in the flowchart refer to the youth depression-associated question name from the computer-assisted interviewing (CAI) instrument specifications as well as the corresponding edited variable name to assist users in mapping the information back to the CAI. The flowchart does not show responses that would lead to a respondent not being asked the MDE attribute questions or being sent to the next section of the questionnaire.

**Figure G.1 Routing Logic Prior to Youth Major Depressive Episode (MDE) Attribute Questions**

G-3

The questions showing the nine attributes of MDE refer to the worst period of time the respondent has had that stood out in the respondent's mind, or, if the respondent did not recall a worst period of time, the questions refer to the most recent period of time when the respondent experienced any or all of the following: sadness, discouragement, or lack of interest in most things. These questions were asked once a youth respondent was routed through the CAI as indicated in the flowchart. **It should be noted that no exclusions were made for MDE caused by medical illness, bereavement, or substance use disorders.**

The coding specifications below for all recoded MDE variables include in parentheses both the youth depression-associated question name from the CAI instrument specifications and the corresponding edited variable name to assist users in mapping the information back to the CAI.

Respondents were classified with lifetime MDE (YMDEL=1) if they had at least five of the nine attributes where at least one of the criteria is a depressed mood or loss of interest or pleasure in daily activities (DSMMDEAY/YODSMMDE=1). Respondents were classified with not having lifetime MDE (YMDEL=2) if they met either of these conditions:

1. Reported experiencing fewer than five out of the nine criteria used to classify youths as having had MDE in their lifetime (DSMMDEAY/YODSMMDE=2).
2. If the number of criteria is unknown (DSMMDEAY/YODSMMDE=94, 97, and 98) and the respondent reported at least one of the following:
  - a. Never having had a period of time lasting several days or longer when felt sad, empty, or depressed (YDS21/YODPREV =2); discouraged about how things were going in life (YDS22/YODSCEV =2); and lost interest in most things usually enjoyable (YDS23/YOLOSEV =2).
  - b. Experienced the feelings in (a), but they did not last most of the day, nearly every day for 2 weeks or longer (YD09/YOLSI2WK=2) or (YD12/YODPR2WK=2).
  - c. Experienced the feelings in (a) most of the day, nearly every day for 2 weeks or longer, but the feelings lasted less than an hour when mood was most severe and frequent (YD16/YOWRHRS=1).
  - d. Experienced the feelings in (a) most of the day, nearly every day for 2 weeks or longer for at least an hour during those times when mood was most severe and frequent, but emotional distress was mild (YD17/YOWRDST=1); there was never a time when emotional distress was so severe that respondent could not be cheered up (YD18/YOWRCHR=4); and there was never a time when emotional distress was so severe that respondent could not carry out daily activities (YD19/YOWRIMP=4).
  - e. Experienced the feelings in (a) most of the day, nearly every day for 2 weeks or longer for at least an hour and the severe distress was more than mild or at some point could not be cheered up or could not carry out daily activities, but never had any other problems during those weeks, such as changes in sleep, appetite, energy, the ability to concentrate and remember, or feelings of low self-worth (YD21/YODPPROB=2).

Respondents who were classified with lifetime MDE (YMDEL=1) and who reported that during the past 12 months they had a period of depression lasting 2 weeks or longer, while also having some of the other symptoms mentioned (YOPB2WK=1), were classified as having past year depression (YMDEYR=1). Respondents with no lifetime MDE (YMDEL=2) or respondents with lifetime MDE (YMDEL=1) but no period of depression lasting 2 weeks or longer while having other symptoms (YOPB2WK=2) were classified as not having past year MDE (YMDEYR=2). Otherwise, respondents were classified as system missing for lifetime or past year MDE if they had unknown depression information and/or they were aged 18 or older.

Respondents with lifetime MDE and respondents with recurrent thoughts of death or recurrent suicide ideation (D\_MDEA9Y/YO\_MDEA9=1), regardless of MDE classification, were guided through the remainder of the depression module. Because of this second criterion, variables for treatment of depression may have values for respondents who were not classified as having lifetime MDE. If the subpopulation of interest is respondents with lifetime MDE or past year MDE, these restrictions should be implemented in the analysis using the appropriate variables. Users who are interested in the suicide ideation data<sup>1</sup> from the depression modules should also be aware of the routing logic shown in [Figure G.1](#) because only a subset of respondents are asked the suicide-related questions.

### **G.3 MDE with Severe Impairment Variable Specifications**

The Sheehan Disability Scale (SDS) is used to measure impairment due to emotions, nerves, or mental health. Respondents classified as having had MDE in the past year were then asked questions from the SDS to measure the level of functional impairment in major life activities reported to be caused by the MDE in the past 12 months (Leon et al., 1997).

The youth SDS measures mental health-related impairment in four major life activities or role domains: (1) cause problems with your chores at home, (2) cause problems with your ability to do well at school or work, (3) cause problems with your ability to get along with your family during that time, and (4) cause problems with your ability to have a social life during that time. These four questions are assessed on a 0 to 10 visual analog scale with categories of “no interference” (0), “mild” (1-3), “moderate” (4-6), “severe” (7-9), and “very severe” (10).

The four SDS role domain variables (YOPSHMGT, YOPSWORK, YOPSRELS, and YOPSSOC, respectively) were recoded as follows: no interference = 1, mild = 2, moderate = 3, severe = 4, and very severe = 5. A maximum impairment score, YSDSOVRL, was then defined as the single highest severity level of role impairment across all four recoded SDS role domains (YSDSHOME, YSDSWRK, YSDSREL, and YSDSSOC). Youths with past year MDE (YMDEYR=1) and ratings greater than or equal to 7 on the original SDS scale (YSDSOVRL=4 or 5) were considered to have severe role impairment (MDEIMPY=1). Respondents aged 12 to 17 were classified as system missing if they had unknown impairment information for all four SDS domain variables, were not asked the question due to routing logic, and/or they were aged 18 or older.

---

<sup>1</sup> The youth suicide estimates presented in the 2022 Detailed Tables (CBHSQ, 2023c) are from the youth experiences module data, not the adolescent depression suicide module data.

#### **G.4 Analysis Weights and Variance Estimation Variables**

Estimates for lifetime and past year MDE and MDE with severe impairment were created for 2022 using the standard analysis weight (ANALWT2) and the variance estimation variables (VESTR and VEREP). For more information on the use of the weighting and variance estimation variables, see Section 14 in the main Introduction of the codebook.

## **Appendix H**

### **Variable Map for Analytic Codebook Variables**

The purpose of this appendix is to help the user determine the relationship between variables for the 2022 National Survey on Drug Use and Health. By searching for a variable listed within the codebook one may find the associated variables used in their creation, called parent variables. It should be noted, however, that not all parent variables listed in this appendix are included in the codebook.

In particular, many of these parent variables may be found in the Raw Data File and Codebook that was previously delivered to SAMHSA. Thus, if users of this appendix cannot find a parent variable on the Analytic File or in the associated Analytic File Codebook, they may wish to search the Raw Data File and Codebook.

Raw variables typically (though not always) have a two-letter prefix associated with the corresponding module. For example, the parent variables AL01 and ALREF in this appendix are raw variables from the alcohol module that begin with the prefix “AL” and are associated with the edited variable ALCEVER.

In contrast, parent variables that underwent editing or recoding will have a mnemonic name associated with them. For example, the parent variables ABODALC (abuse of or dependence on alcohol in the past year) and UDPYILL (abuse of or dependence on any illicit drug in the past year) are recoded variables that were used to create UDPYILAAL (abuse of or dependence on both alcohol and illicit drugs in the past year). Similarly, variables that were statistically imputed will have the prefix “IR” in the variable names. For example, the imputed alcohol recency-of-use variable IRALCRC served as the parent variable for ALCFLAG, ALCMON, and ALCYR.

In addition, users of this appendix need to be aware that this appendix may not constitute an exhaustive listing of all variables and the associated relationships with parent variables. In particular, not all parent variables that were used to create a given variable shown in the left-hand columns may be listed in this appendix.
